## Chapter 27

# Digital Signature Algorithm (DSA)

## 27.1 Overview

The Digital Signature Algorithm (DSA) is used to verify the authenticity and integrity of a message using a cryptographic algorithm. This can be used to validate a device's identity to a server or to check the integrity of a message.

ESP32-P4 includes a Digital Signature Algorithm (DSA) module providing hardware acceleration of messages' signatures based on RSA. HMAC is used as the key derivation function (KDF) to output the DSA\_KEY key using a key stored in eFuse as the input key. Subsequently, the DSA module uses DSA\_KEY to decrypt the pre-encrypted parameters and calculate the signature. The whole process happens in hardware so that all the keys involved during the calculating process cannot be seen by users, guaranteeing the security of the operation.

## 27.2 Features

- RSA digital signatures with key length up to 4096 bits
- Encrypted private key data, only decryptable by the DSA module
- SHA-256 digest to protect private key data against tampering by an attacker

## 27.3 Functional Description

### 27.3.1 Overview

The DSA peripheral calculates RSA signatures as  $Z = X^Y \bmod M$ , where  $Z$  is the signature,  $X$  is the input message, and  $Y$  and  $M$  are the RSA private key parameters.

Private key parameters are stored in flash as ciphertext. They are decrypted using a key (*DSA\_KEY*) which can only be calculated by the DSA peripheral via the HMAC peripheral. The required inputs (*HMAC\_KEY*) to generate the key are only stored in eFuse and can only be accessed by the HMAC peripheral. That is to say, the DSA peripheral hardware can decrypt the private key, and the private key in plaintext is never accessed by the software. For more detailed information about eFuse and HMAC peripherals, please refer to [Chapter 7 eFuse Controller](#) and [Chapter 24 HMAC Accelerator \(HMAC\)](#).

The input message  $X$  will be sent directly to the DSA peripheral by the software each time a signature is needed. After the RSA signature operation, the signature  $Z$  is read back by the software.

For better understanding, we define some symbols and functions here, which are only applicable to this chapter:

- $1^s$ : A bit string consisting of  $s$  bits with the value of “1”.
- $[x]_s$ : A bit string of  $s$  bits, in which  $s$  is an integer multiple of 8 bits. If  $x$  is a number ( $x < 2^s$ ), it is represented in little-endian byte order in the bit string.  $x$  may be a variable such as  $[Y]_{4096}$  or a hexadecimal constant such as  $[0x0C]_8$ . If necessary, the value  $[x]_t$  can be right-padded with  $(s - t)$  number of zeros to reach  $s$  bits in length, and finally get  $[x]_s$ . For example,  $[0x05]_8 = 00000101$ ,  $[0x05]_{16} = 0000010100000000$ ,  $[0x0005]_{16} = 0000000000000101$ ,  $[0x13]_8 = 00010011$ ,  $[0x13]_{16} = 0001001100000000$ ,  $[0x0013]_{16} = 0000000000010011$ .
- $||$ : A bit string concatenation operator for joining multiple-bit strings into a longer bit string.

## 27.3.2 Private Key Operands

Private key operands  $Y$  (private key exponent) and  $M$  (key modulus) are generated by the user. They have a particular RSA key length (up to 4096 bits). Two additional private key operands are needed:  $\bar{r}$  and  $M'$ . These two operands are derived from  $Y$  and  $M$ .

Operands  $Y$ ,  $M$ ,  $\bar{r}$ , and  $M'$  are encrypted by the user along with an authentication digest and stored as a single ciphertext  $C$ .  $C$  is input to the DSA peripheral in this encrypted format, decrypted by the hardware, and then used for RSA signature calculation. A detailed description of how to generate  $C$  is provided in Section [27.3.3](#).

The DSA peripheral supports RSA signature calculation  $Z = X^Y \bmod M$ , in which the length of operands should be  $N = 32 \times x$  where  $x \in \{1, 2, 3, \dots, 128\}$ . The bit lengths of arguments  $Z$ ,  $X$ ,  $Y$ ,  $M$ , and  $\bar{r}$  should be an arbitrary value in  $N$ , and all of them in a calculation must be of the same length, while the bit length of  $M'$  should always be 32. For more detailed information about RSA calculation, please refer to Section [25.3.2 Large-Number Modular Exponentiation](#) in Chapter [25 RSA Accelerator \(RSA\)](#).

## 27.3.3 Software Prerequisites

If you want to use the DSA module, the software needs a series of preparations, as shown in Figure [27.3-1](#). The left side lists preparations required by the software before the hardware starts the RSA signature calculation, while the right side lists the hardware workflow during the entire calculation procedure.

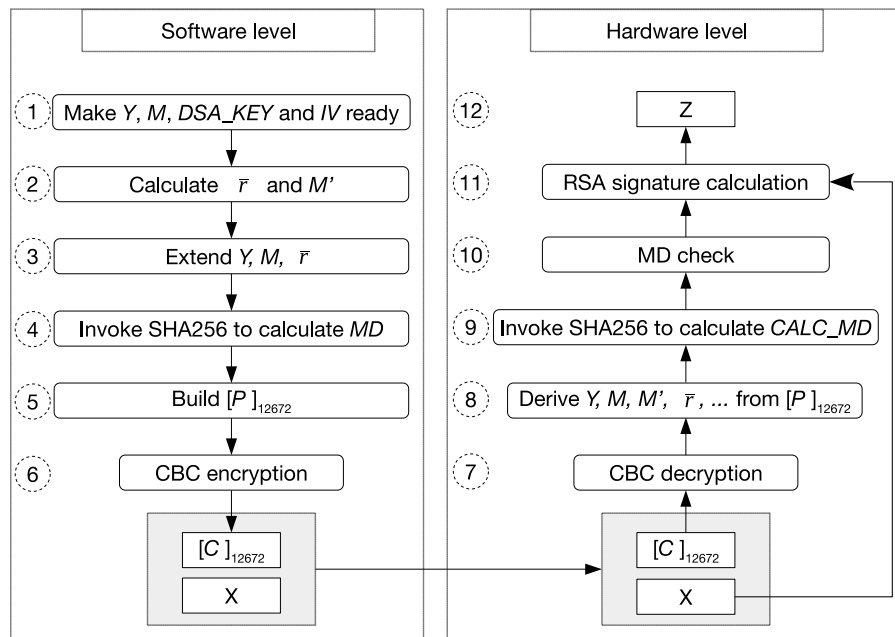

Figure 27.3-1. Software Preparations and Hardware Working Process

**Note:**

1. The software preparation (left side in Figure 27.3-1) is a one-time operation before any signature is calculated, while the hardware calculation (right side in Figure 27.3-1) repeats for every signature calculation.
2. Software preparation requires configuring the clock reset. For more information, please refer to Chapter 9 [Reset and Clock](#).

Users need to follow the steps shown in the left part of Figure 27.3-1 to calculate  $C$ . Detailed instructions are as follows:

- **Step 1:** Prepare operands  $Y$  and  $M$  whose lengths should meet the requirements in Section 27.3.2. Define  $[L]_{32} = \frac{N}{32} - 1$  (i.e., for RSA 4096,  $[L]_{32} = [0x80-1]_{32}$ ). Prepare  $[HMAC\_KEY]_{256}$  and calculate  $[DSA\_KEY]_{256}$  based on  $DSA\_KEY = \text{HMAC-SHA256}([HMAC\_KEY]_{256}, 1^{256})$ . Generate a random  $[IV]_{128}$  which should meet the requirements of the AES-CBC block encryption algorithm. For more information on AES, please refer to Chapter 22 [AES Accelerator \(AES\)](#).
- **Step 2:** Calculate  $\bar{r}$  and  $M'$  based on  $M$ .
- **Step 3:** Extend  $Y$ ,  $M$ , and  $\bar{r}$  in order to get  $[Y]_{4096}$ ,  $[M]_{4096}$ , and  $[\bar{r}]_{4096}$ , respectively. This step is only required for  $Y$ ,  $M$ , and  $\bar{r}$  whose length are less than 4096 bits, since their largest length are 4096 bits.
- **Step 4:** Calculate MD authentication code using the SHA-256:  
 $[MD]_{256} = \text{SHA256}([Y]_{4096} || [M]_{4096} || [\bar{r}]_{4096} || [M']_{32} || [L]_{32} || [IV]_{128})$
- **Step 5:** Build  $[P]_{12672} = ([Y]_{4096} || [M]_{4096} || [\bar{r}]_{4096} || [Box]_{384})$ , where  $[Box]_{384} = ([MD]_{256} || [M']_{32} || [L]_{32} || [\beta]_{64})$  and  $[\beta]_{64}$  is a PKCS#7 padding value, i.e., a  $[0x0808080808080808]_{64}$  string composed of 8 bytes (0x80). The purpose of  $[\beta]_{64}$  is to make the bit length of  $P$  a multiple of 128.
- **Step 6:** Calculate  $C = [C]_{12672} = \text{AES-CBC-ENC}([P]_{12672}, [DSA\_KEY]_{256}, [IV]_{128})$ , where  $C$  is the ciphertext with a length of 1200 bytes.  $C$  can also be calculated as  $C = [C]_{12672} = ([\hat{Y}]_{4096} || [\hat{M}]_{4096} || [\hat{\bar{r}}]_{4096} || [\hat{Box}]_{384})$ , where  $[\hat{Y}]_{4096}$ ,  $[\hat{M}]_{4096}$ ,  $[\hat{\bar{r}}]_{4096}$ ,  $[\hat{Box}]_{384}$  are the four sub-parameters

of  $C$ , and correspond to the ciphertext of  $[Y]_{4096}$ ,  $[M]_{4096}$ ,  $[\bar{r}]_{4096}$ ,  $[Box]_{384}$  respectively.

### 27.3.4 DSA Operation at the Hardware Level

The hardware operation is triggered each time a digital signature needs to be calculated. The inputs are the pre-generated private key ciphertext  $C$ , a unique message  $X$ , and  $IV$ .

The DSA operation at the hardware level can be divided into the following three stages:

#### 1. Decryption: Step 7 and 8 in Figure 27.3-1

The decryption process is the inverse of Step 6 in Figure 27.3-1. The DSA module will call the AES accelerator to decrypt  $C$  in CBC block mode and get the resulting plaintext. The decryption process can be represented by  $P = \text{AES-CBC-DEC}(C, DSA\_KEY, IV)$ , where  $IV$  (i.e.,  $[IV]_{128}$ ) is defined by the user.  $[DSA\_KEY]_{256}$  is provided by the HMAC module, derived from  $HMAC\_KEY$  stored in eFuse.  $[DSA\_KEY]_{256}$ , as well as  $[HMAC\_KEY]_{256}$  are not readable by users. For more information, please refer to Chapter 24 [HMAC Accelerator \(HMAC\)](#).

With  $P$ , the DSA module can derive  $[Y]_{4096}$ ,  $[M]_{4096}$ ,  $[\bar{r}]_{4096}$ ,  $[M']_{32}$ ,  $[L]_{32}$ , MD authentication code, and the padding value  $[\beta]_{64}$ . This process is the inverse of Step 5.

#### 2. Check: Step 9 and 10 in Figure 27.3-1

The DSA module will perform two checks: MD check and padding check. The padding check is not shown in Figure 27.3-1, as it happens at the same time as the MD check.

- MD check: The DSA module calls SHA-256 to calculate the hash value  $[CALC\_MD]_{256}$  ( $[CALC\_MD]_{256}$  is calculated the same way and with same parameters as  $[MD]_{256}$ , see step 4). Then,  $[CALC\_MD]_{256}$  is compared against the MD authentication code  $[MD]_{256}$  from step 4. Only when the two match does the MD check pass.
- Padding check: The DSA module checks if  $[\beta]_{64}$  complies with the aforementioned PKCS#7 format. Only when  $[\beta]_{64}$  complies with the format does the padding check pass.

The DSA module will only perform subsequent operations if MD check passes. If the padding check fails, a warning is generated, but it does not affect the subsequent operations.

#### 3. Calculation: Step 11 and 12 in Figure 27.3-1

The DSA module treats  $X$  (input by the user) and  $Y$ ,  $M$ ,  $\bar{r}$  (decrypted in step 8) as big numbers. With  $M'$ , all operands to perform  $X^Y \bmod M$  are in place. The operand length is defined by  $L$  only. The DSA module will calculate the signed result  $Z$  by calling RSA to perform  $Z = X^Y \bmod M$ .

### 27.3.5 DSA Operation at the Software Level

The software steps below should be followed each time a digital signature needs to be calculated. The inputs are the pre-generated private key ciphertext  $C$ , a unique message  $X$ , and  $IV$ . These software steps trigger the hardware steps described in Section 27.3.4.

We assume that the software has called the HMAC peripheral and the HMAC peripheral has calculated  $DSA\_KEY$  based on  $HMAC\_KEY$ .

1. **Prerequisites:** Prepare operands  $C$ ,  $X$ ,  $IV$  according to Section 27.3.3.
2. **Activate the DSA peripheral:** Write 1 to [DSA\\_SET\\_START\\_REG](#).

3. **Check if  $DSA\_KEY$  is ready:** Poll [DSA\\_QUERY\\_BUSY\\_REG](#) until the software reads 0.

If the software does not read 0 in [DSA\\_QUERY\\_BUSY\\_REG](#) after approximately 1 ms, it indicates a problem with HMAC initialization. In such a case, the software can read register [DSA\\_QUERY\\_KEY\\_WRONG\\_REG](#) to get more information:

- If the software reads 0 in [DSA\\_QUERY\\_KEY\\_WRONG\\_REG](#), it indicates that the HMAC peripheral has not been called.
- If the software reads any value from 1 to 15 in [DSA\\_QUERY\\_KEY\\_WRONG\\_REG](#), it indicates that HMAC was called, but the DSA module did not successfully get the  $DSA\_KEY$  value from the HMAC peripheral. This may indicate that the HMAC operation has been interrupted due to a software concurrency problem.

4. **Configure register:** Write the content in the  $IV$  block to register [DSA\\_IV\\_m\\_REG](#) ( $m$ : 0 ~ 3). For more information on the  $IV$  block, please refer to Chapter [22 AES Accelerator \(AES\)](#).
5. **Write  $X$  to memory block [DSA\\_X\\_MEM](#):** Write  $X_i$  ( $i \in \{0, 1, \dots, n-1\}$ ), where  $n = \frac{N}{32}$ , to memory block [DSA\\_X\\_MEM](#) whose capacity is 96 words. Each word can store one base- $b$  digit. The memory block uses the little endian format for storage, i.e., the least significant digit of the operand is in the lowest address. Words in [DSA\\_X\\_MEM](#) block after the configured length of  $X$  ( $N$  bits, as described in Section [27.3.2](#)), are ignored.
6. **Write  $C$  to corresponding memory blocks:** Write the four sub-parameters of  $C$  to corresponding memory blocks:

- Write  $\widehat{Y}_i$  ( $i \in \{0, 1, \dots, 127\}$ ) to [DSA\\_Y\\_MEM](#).
- Write  $\widehat{M}_i$  ( $i \in \{0, 1, \dots, 127\}$ ) to [DSA\\_M\\_MEM](#).
- Write  $\widehat{r}_i$  ( $i \in \{0, 1, \dots, 127\}$ ) to [DSA\\_RB\\_MEM](#).
- write  $\widehat{Box}_i$  ( $i \in \{0, 1, \dots, 11\}$ ) to [DSA\\_BOX\\_MEM](#).

The capacity of [DSA\\_Y\\_MEM](#), [DSA\\_M\\_MEM](#), and [DSA\\_RB\\_MEM](#) is 128 words, whereas the capacity of [DSA\\_BOX\\_MEM](#) is only 12 words. Each word can store one base- $b$  digit. The memory blocks use the little endian format for storage, i.e., the least significant digit of the operand is in the lowest address.

7. **Start DSA operation:** Write 1 to register [DSA\\_SET\\_ME\\_REG](#).
8. **Wait for the operation to be completed:** Poll register [DSA\\_QUERY\\_BUSY\\_REG](#) until the software reads 0.
9. **Query check result:** Read register [DSA\\_QUERY\\_CHECK\\_REG](#) and conduct subsequent operations as illustrated below based on the return value:
- If the value is 0, it indicates that both the padding check and MD check pass. Users can continue to get the signed result  $Z$ .
  - If the value is 1, it indicates that the padding check passes but MD check fails. The signed result  $Z$  is invalid. The operation will resume directly from Step 11.
  - If the value is 2, it indicates that the padding check fails but the MD check passes. Users can continue to get the signed result  $Z$ . But please note that the data does not comply with the aforementioned PKCS#7 padding format, which may not be what you want.

- If the value is 3, it indicates that both the padding check and MD check fail. In this case, some fatal errors have occurred and the signed result  $Z$  is invalid. The operation will resume directly from Step 11.
10. **Read the signed result:** Read the signed result  $Z_i$  ( $i \in \{0, 1, \dots, n - 1\}$ ), where  $n = \frac{N}{32}$ , from memory block [DSA\\_Z\\_MEM](#). The memory block stores  $Z$  in little-endian byte order.
  11. **Exit the operation:** Write 1 to [DSA\\_SET\\_FINISH\\_REG](#), and then poll [DSA\\_QUERY\\_BUSY\\_REG](#) until the software reads 0.

After the operation, all the input/output registers and memory blocks are cleared.

## 27.4 Memory Summary

The addresses in this section are relative to the Digital Signature Algorithm base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

| Name        | Description            | Size (byte) | Starting Address | Ending Address | Access |
|-------------|------------------------|-------------|------------------|----------------|--------|
| DSA_Y_MEM   | Memory block Y         | 512         | 0x0000           | 0x01FF         | WO     |
| DSA_M_MEM   | Memory block M         | 512         | 0x0200           | 0x03FF         | WO     |
| DSA_RB_MEM  | Memory block $\bar{r}$ | 512         | 0x0400           | 0x05FF         | WO     |
| DSA_BOX_MEM | Memory block Box       | 48          | 0x0600           | 0x062F         | WO     |
| DSA_X_MEM   | Memory block X         | 512         | 0x0800           | 0x09FF         | WO     |
| DSA_Z_MEM   | Memory block Z         | 512         | 0x0A00           | 0x0BFF         | RO     |

## 27.5 Register Summary

The addresses in this section are relative to Digital Signature Algorithm base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

The abbreviations given in Column **Access** are explained in Section *Access Types for Registers*.

| Name                                    | Description                                       | Address | Access |
|---|---|---------|--------|
| <b>Configuration Registers</b>          |   |         |        |
| <a href="#">DSA_IV_0_REG</a>            | IV block data                                     | 0x0630  | WO     |
| <a href="#">DSA_IV_1_REG</a>            | IV block data                                     | 0x0634  | WO     |
| <a href="#">DSA_IV_2_REG</a>            | IV block data                                     | 0x0638  | WO     |
| <a href="#">DSA_IV_3_REG</a>            | IV block data                                     | 0x063C  | WO     |
| <b>Status/Control Registers</b>         |   |         |        |
| <a href="#">DSA_SET_START_REG</a>       | Activates the DSA module                          | 0x0E00  | WO     |
| <a href="#">DSA_SET_ME_REG</a>          | Starts DSA operation                              | 0x0E04  | WO     |
| <a href="#">DSA_SET_FINISH_REG</a>      | Ends DSA operation                                | 0x0E08  | WO     |
| <a href="#">DSA_QUERY_BUSY_REG</a>      | Status of the DSA module                          | 0x0E0C  | RO     |
| <a href="#">DSA_QUERY_KEY_WRONG_REG</a> | Checks the reason why <i>DSA_KEY</i> is not ready | 0x0E10  | RO     |
| <a href="#">DSA_QUERY_CHECK_REG</a>     | Queries DSA check result                          | 0x0E14  | RO     |
| <b>Version control register</b>         |   |         |        |
| <a href="#">DSA_DATE_REG</a>            | Version control register                          | 0x0E20  | W/R    |

### Register 27.4. DSA\_SET\_FINISH\_REG (0x0E08)

**DSA\_SET\_FINISH** Configures whether to end the DSA operation.

- 0: No effect  
1: End the DSA operation  
(WO)

### Register 27.5. DSA\_QUERY\_BUSY\_REG (0x0E0C)

**DSA\_QUERY\_BUSY** Represents whether the DSA module is idle.

- 0: The DSA module is idle.  
1: The DSA module is busy.  
(RO)

### Register 27.6. DSA\_QUERY\_KEY\_WRONG\_REG (0x0E10)

**DSA\_QUERY\_KEY\_WRONG** Represents the specific problem with HMAC initialization.

- 0: HMAC is not called.  
1-15: HMAC was activated, but the DSA peripheral did not successfully receive the *DSA\_KEY* from the HMAC peripheral.  
(RO)

(reserved)

DSA\_PADDING\_BAD  
DSA\_MD\_ERROR

(RO)

(RO)

(reserved)

DSA\_DATE

Reset

## Chapter 28

# Elliptic Curve Digital Signature Algorithm (ECDSA)

## 28.1 Introduction

In cryptography, the Elliptic Curve Digital Signature Algorithm (ECDSA) offers a variant of the Digital Signature Algorithm (DSA) which uses elliptic-curve cryptography.

ESP32-P4's ECDSA accelerator provides a secure and efficient environment for computing ECDSA signatures. It offers fast computations while ensuring the confidentiality of the signing process to prevent information leakage. This makes it a valuable tool for applications that require high-speed cryptographic operations with strong security guarantees. By using the ECDSA accelerator, users can be confident that their data is being protected without sacrificing performance.

## 28.2 Features

ESP32-P4's ECDSA accelerator supports:

- Digital signature verification
- Two different elliptic curves, namely P-192 and P-256, defined in [FIPS 186-3 Spec](#)
- Two hash algorithms for message hash in the ECDSA operation, namely SHA-224 and SHA-256, defined in [FIPS PUB 180-4 Spec](#)
- Dynamic access permission in different operation statuses to ensure information security

## 28.3 ECDSA Basics

### 28.3.1 Domain Parameters

ECDSA uses parameters that define the elliptic curve over a finite field, as well as the generator point and the order of the base point. These parameters are usually referred to as domain parameters, and they are required for key generation, signature generation, and signature verification.

The domain parameters used in ECDSA consist of the followings:

- The elliptic curve domain parameters, which include:
  - The prime modulus  $p$ , which specifies the size of the finite field over which the elliptic curve is defined.
  - The base point  $G$  on the curve, which can be used to generate public keys.

- The order  $n$  of the base point, which is the number of points on the curve that can be generated by repeatedly adding  $G$  to itself.
- The parameters for the hash function, which include:
  - The hash algorithm used to generate a fixed-length hash value from the message being signed.
  - The length of the hash value, which determines the size of the signature.

Together, these parameters define the ECDSA domain.

### 28.3.2 Key Generation

The process of key generation in ECDSA is described below:

1. Select an elliptic curve domain by defining:
  - the prime modulus  $p$
  - the coefficients  $a$  and  $b$
  - the base point  $G$  and its order  $n$
2. Generate a private key:
  - A private key  $d$  is a randomly chosen integer between 1 and  $n-1$ . It is essential to use a secure [Random Number Generator \(RNG\)](#) to ensure that the private key is truly random and cannot be predicted or reproduced.
  - The private key is used for signature generation. This key must be kept secret and secure.
3. Compute the public key:
  - The public key  $Q$  is calculated as  $Q = dG$ .
4. Export the public key:
  - The public key  $Q$  is typically represented as a pair of coordinates  $(Qx, Qy)$  that can be shared with others.

### 28.3.3 Signature Generation

The ECDSA signature generation process is described below:

1. Select a message  $m$  to be signed.
2. Calculate the hash of the message  $e$ :  $e$  is equal to HASH ( $m$ ), where HASH is a cryptographic hash function, such as SHA-256.
3. Compute the digest of the message hash  $z$ : Let  $z$  be the  $L_n$  leftmost bits of  $e$ , where  $L_n$  is the bit length of the base point order  $n$ .
4. Select a random number  $k$ , which is chosen between 1 and  $n-1$ , where  $n$  is the order of the base point on the elliptic curve.
5. Compute the signature: The signature is calculated as follows:
  - (a) Compute the point  $(x, y) = kG$

- (b) Calculate  $r = x \bmod n$ . If  $r$  is equal to zero, return to the previous step and select a new random value of  $k$ .
  - (c) Calculate  $s = k^{-1} * (z + d * r) \bmod n$ . If  $s$  is equal to zero, return to step 4 and select a new random value of  $k$ .
  - (d) The signature is the pair  $(r, s)$ .
6. Send the message  $m$  and signature  $(r, s)$  to the recipient.

### 28.3.4 Signature Verification

The recipient can then use the public key associated with the private key used for signature generation to verify the signature. The verification process involves checking that the signature was generated using the correct private key and that the signature is valid for the given message.

The ECDSA signature verification process is described below:

1. Obtain public key  $Q$  and receive the message  $m$  and signature  $(r, s)$ .
2. Calculate the hash of the message  $e$ :  $e$  is equal to HASH ( $m$ ), where HASH is a cryptographic hash function, such as SHA-256.
3. Compute the digest of the message  $z$ : Let  $z$  be the  $L_n$  leftmost bits of  $e$ , where  $L_n$  is the bit length of the base point order  $n$ .
4. Verify the signature: The signature is verified as follows:
  - (a) Verify that  $r$  and  $s$  are integers between 1 and  $n-1$ , where  $n$  is the order of the base point on the elliptic curve. If either  $r$  or  $s$  is outside of this range, the signature is invalid.
  - (b) Calculate  $u_1 = z * s^{-1} \bmod n$  and  $u_2 = r * s^{-1} \bmod n$ .
  - (c) Calculate the point  $(x_1, y_1) = u_1 * G + u_2 * Q$ , where  $G$  is the base point on the elliptic curve, and  $Q$  is the public key associated with the private key used for signature generation.
  - (d) Verify that  $r = x_1 \bmod n$ . If  $r$  is not equal to  $x_1 \bmod n$ , the signature is invalid.
5. Accept or reject the signature: If the signature is valid, the recipient can be confident that the message was not tampered with and that it came from the expected sender, thus can accept the message as authentic. Otherwise, the recipient rejects the message as invalid.

## 28.4 Functional Description

This section describes the details of ESP32-P4's ECDSA accelerator.

### 28.4.1 ECDSA Working Modes

The ECDSA accelerator integrated in the ESP32-P4 supports Signature Verification mode.

Users can select the elliptic curves used by configuring the [ECDSA\\_ECC\\_CURVE](#) according to Table [28.4-1](#).

Table 28.4-1. ECDSA Elliptic Curves Selection

| ECDSA_ECC_CURVE | Elliptic Curve |
|-----------------|----------------|
| 0               | P-192          |
| 1               | P-256          |

Users can select the SHA algorithms for message hash by configuring the [ECDSA\\_SHA\\_MODE](#) according to Table 28.4-2.

Table 28.4-2. ECDSA SHA Algorithm

| ECDSA_SHA_MODE | SHA Algorithm |
|----------------|---------------|
| 1              | SHA-224       |
| 2              | SHA-256       |
| Others         | Invalid       |

Additionally, users can check the working status of the ECDSA accelerator by inquiring the [ECDSA\\_STATE\\_REG](#) register and comparing the return value against the Table 28.4-3 below.

Table 28.4-3. ECDSA Working Status

| ECDSA_STATE_REG | Status   | Description  |
|-----------------|----------|--|
| 0               | IDLE     | Idle or completed operation. Corresponding to IDLE Stage.                        |
| 1               | LOAD     | Waiting for users to load information into ECDSA. Corresponding to LOAD Stage.   |
| 2               | Reserved | –  |
| 3               | BUSY     | In the middle of a hardware operation. Corresponding to PREP, PROC & POST Stage. |

## 28.4.2 Data and Data Block

ESP32-P4's ECDSA accelerator operates on data of 256 or 512 bits. This data ( $D[255 : 0]$ ) can be divided into 32-bit data blocks.

Take 256-bit long data as an example,  $D[n][31 : 0]$  ( $n = 0, 1, \dots, 7$ ). Data blocks with the smaller serial number correspond to the lower binary bits. To be specific:

$$D[255 : 0] = D[7][31 : 0], D[6][31 : 0], D[5][31 : 0], D[4][31 : 0], D[3][31 : 0], D[2][31 : 0], D[1][31 : 0], D[0][31 : 0]$$

### 28.4.2.1 Writing Data

Writing data means writing data to an ECDSA memory block and using this data as the input to the ECDSA algorithm. To be specific, writing data to an ECDSA memory block means writing  $D[n][31 : 0]$  to the “starting address of this ECDSA memory block +  $4 \times n$ ” For a 256-bit long data example:

- write  $D[0]$  to “starting address”
- write  $D[1]$  to “starting address + 4”

- ...
- write  $D[7]$  to “starting address + 28”

**Note:**

When the data size of 192 bits is used, you need to append 0 after 192 bits of data and write 256 bits of data.

### 28.4.2.2 Reading Data

Reading data means reading data from the starting address of an ECDSA memory block and using this data as the output from the ECDSA algorithm. To be specific, reading data from an ECDSA memory block means reading  $D[n][31 : 0]$  from the “starting address of this ECDSA memory block +  $4 \times n$ ”. For a 256-bit long data example:

- read  $D[0]$  from “starting address”
- read  $D[1]$  from “starting address + 4”
- ...
- read  $D[7]$  from “starting address + 28”

**Note:**

When the data size of 192 bits is used, only use the low 192 bits (6 blocks) of data.

### 28.4.2.3 Padding the Message

The SHA accelerator can only process message blocks of 512 bits. Thus, all the messages should be padded to a multiple of 512 bits before the hash operation.

Suppose that the length of the message  $M$  is  $L_M$  bits. Then  $M$  shall be padded as introduced below:

1. First, append the bit “1” to the end of the message;
2. Second, append  $L_A$  bits of zeros, where  $L_A$  is the smallest, non-negative solution to the equation  $L_M + 1 + L_A \equiv 448 \pmod{512}$ ;
3. Last, append the 64-bit block of value equal to the number  $L_M$  expressed using a binary representation.

For more details, please refer to [FIPS PUB 180-4 Spec](#) > Section “Padding the Message”.

### 28.4.2.4 Parsing the Message

The message and its padding must be parsed into  $N$  512-bit message blocks:  $M^{(1)}, M^{(2)}, \dots, M^{(N)}$ .

**Note:**

1. For more details about “parsing the message”, please refer to [FIPS PUB 180-4 Spec](#) > Section “Parsing the Message”.
2. For more information on “message block”, please refer to [FIPS PUB 180-4 Spec](#) > Section “Glossary of Terms and Acronyms”.

### 28.4.3 Security Features

To ensure the security of the ECDSA operation process, the ECDSA accelerator implements a variety of security functions.

#### 28.4.3.1 Dynamic Access Permission

ESP32-P4's ECDSA accelerator has implemented a dynamic access permission mechanism to prevent any possibility of key theft by tampering with the configuration or accessing the data during the operation.

By implementing this dynamic access permission mechanism, the accesses for ECDSA registers are designed to vary in different statuses. For example, [ECDSA\\_CONF\\_REG](#) is only available for reading and writing when the accelerator is in the IDLE status. In this way, the configuration information is protected from reading or writing when the accelerator is in other statuses, such as LOAD and BUSY. For details about all ECDSA working statuses, please refer to Table [28.4-3](#).

For detailed information on the dynamic access permission of each ECDSA register, please refer to Section [Register Summary](#).

#### 28.4.3.2 Hardware Occupation

During the ECDSA operation, the following hardware modules will be occupied by ESP32-P4's ECDSA accelerator:

- SHA Accelerator
- RSA Accelerator
- ECC Accelerator

Among them, the SHA accelerator will be released when the [ECDSA\\_SHA\\_RELEASE\\_INT](#) is triggered. While, the RSA accelerator and the ECC accelerator will be occupied during the whole ECDSA operation.

**Note:**

Hardware occupation is a mechanism to protect multiplexed modules and storage space. When a module is hardware occupied, the user will fail to:

- read or write data to the module's registers or memories.
- disable the module clock.
- reset the module.

At the end of the hardware occupation, the occupied module will be automatically reset. In addition, when the user performs a software reset to the master module, all the occupied modules will be reset at the same time.

## 28.5 Programming Procedures

### 28.5.1 ECDSA Process

The overall ECDSA process consists of the following five stages.

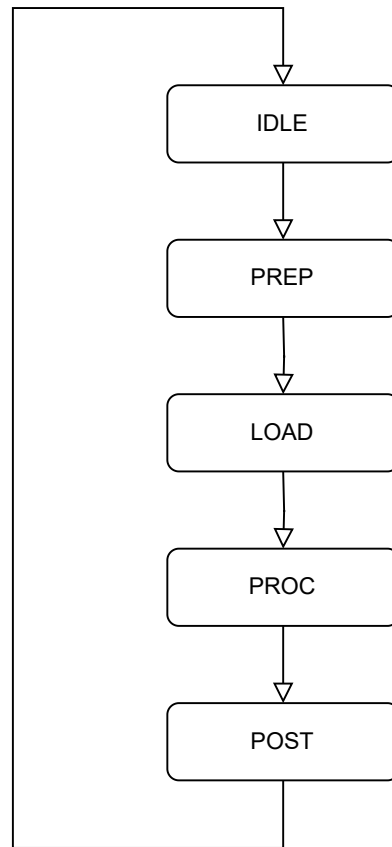

Figure 28.5-1. ECDSA Process

The detailed programming procedures of each stage are described in the following sections.

### 28.5.1.1 IDLE Stage

In the IDLE stage:

1. Configure the static parameters including eFuse bits ECDSA\_KEY, i.e., the value of private key  $d$  in ECDSA. To correctly configure the key value in eFuse, user need to write the key value in KEY $n$  ( $n = 0 \sim 5$ ), and set the corresponding EFUSE\_KEY\_PURPOSE\_ $n$  as ECDSA\_KEY. Please refer to Chapter 7 [eFuse Controller](#) for more detailed configuration steps.
2. Configure the configuration register, including the following fields:
  - (a) [ECDSA\\_ECC\\_CURVE](#): Choose the elliptic curve of the ECDSA accelerator.
  - (b) [ECDSA\\_SOFTWARE\\_SET\\_Z](#): Choose to use direct input  $z$ .
3. Configure the register field [ECDSA\\_START](#) to enter the PREP stage.

### 28.5.1.2 PREP Stage

In the PREP stage, the [ECDSA\\_STATE\\_REG](#) is BUSY, and the ECDSA accelerator performs preparation.

Wait till the PREP stage to end by polling [ECDSA\\_BUSY](#) until it is not BUSY. Then the ECDSA accelerator will automatically enter the LOAD stage.

### 28.5.1.3 LOAD Stage

In the LOAD stage:

1. Provide input  $z$  into the ECDSA accelerator using one of the following options:
  - Direct input  $z$ : write  $z$  to [ECDSA\\_Z\\_MEM](#).
  - ECDSA-SHA interface: generate  $z$  from the message. For details, please refer to Section [28.5.1.6](#).
2. Provide signature and public key required by signature verification:
  - (a) write signature  $(r, s)$  to [ECDSA\\_R\\_MEM](#) and [ECDSA\\_S\\_MEM](#).
  - (b) write public key  $(Qx, Qy)$  to [ECDSA\\_QX\\_MEM](#) and [ECDSA\\_QY\\_MEM](#).
3. Write 1 to [ECDSA\\_LOAD\\_DONE](#), indicating the configuration is done. Then the accelerator will automatically enter the PROC stage.

### 28.5.1.4 PROC Stage

In the PROC stage, the [ECDSA\\_STATE\\_REG](#) is BUSY, and the ECDSA accelerator performs ECDSA signature verification.

Wait till the PROC stage to end by polling [ECDSA\\_BUSY](#) until it is not BUSY. Then the ECDSA accelerator will automatically enter the POST stage.

### 28.5.1.5 POST Stage

In the POST stage, the [ECDSA\\_STATE\\_REG](#) is BUSY, and the ECDSA accelerator performs some wrap-up work of ECDSA operation.

Wait till the POST stage to end by polling [ECDSA\\_BUSY](#) until it is not BUSY. Then the ECDSA accelerator will automatically return to the IDLE stage.

### 28.5.1.6 ECDSA SHA Interface

ESP32-P4's ECDSA accelerator can automatically executes hash operation and generates  $z$  based on a direct input message.

For message hash, ECDSA accelerator supports SHA algorithms SHA-224 (only valid when P-192 is selected as the elliptic curve) and SHA-256.

To use the ECDSA SHA interface, complete the following steps:

1. Pad the message by following the steps described in Section [28.4.2.3](#).
2. Parse the message and its padding into message blocks. See details in Section [28.4.2.4](#).
3. Process the current message block.
  - Write the current message block into [ECDSA\\_MEM\\_M](#).
4. Start the ECDSA SHA interface<sup>1</sup>.
  - If this is the first time to execute this step, write 1 to [ECDSA\\_SHA\\_START](#) to start the ECDSA SHA interface;

- If this is not the first time to execute this step<sup>2</sup>, write 1 to [ECDSA\\_SHA\\_CONTINUE](#) to continue the operation.
5. Check the progress of the current message block processing by polling.
    - Poll register [ECDSA\\_SHA\\_BUSY](#) until it's IDLE, indicating the interface has completed the operation for the current message block.
  6. Process the next message block:
    - If yes, go back to Step 3.
    - If no more message block, exit.

**Note:**

1. In this step, the software can also write the next message block (to be processed) in register [ECDSA\\_MEM\\_M](#), if any, while the interface starts SHA operation, to save time.
2. You are resuming the ECDSA SHA interface with the previously paused operation.

## 28.5.2 Clocks and Resets

ESP32-P4's ECDSA accelerator has one clock module and one reset module. It is activated by setting the [HP\\_SYS\\_CLKRST\\_REG\\_CRYPT0\\_ECDSA\\_CLK\\_EN](#) bit in the [HP\\_SYS\\_CLKRST\\_PERI\\_CLK\\_CTRL25\\_REG](#) register and clearing the [HP\\_SYS\\_CLKRST\\_REG\\_RST\\_EN\\_ECDSA](#) bit in the [HP\\_SYS\\_CLKRST\\_HP\\_RST\\_EN2\\_REG](#) register. For details on how to configure the ECDSA clock and reset, please refer to Chapter 9 [Reset and Clock](#).

## 28.5.3 Interrupts

ESP32-P4's ECDSA accelerator can generate one interrupt signal [ECDSA\\_INTR](#) and send it to [Interrupt Matrix](#).

The ECDSA accelerator has two interrupt sources that can generate the [ECDSA\\_INTR](#) interrupt signal:

- [ECDSA\\_CALC\\_DONE\\_INT](#): triggered on the completion of an ECC operation. This interrupt source is configured by the following registers:
  - [ECDSA\\_CALC\\_DONE\\_INT\\_RAW](#): stores the raw interrupt status of [ECDSA\\_CALC\\_DONE\\_INT](#).
  - [ECDSA\\_CALC\\_DONE\\_INT\\_ST](#): indicates the status of the [ECDSA\\_CALC\\_DONE\\_INT](#) interrupt. This field is generated by enabling/disabling the [ECDSA\\_CALC\\_DONE\\_INT\\_RAW](#) field.
  - [ECDSA\\_CALC\\_DONE\\_INT\\_ENA](#): enables/disables the [ECDSA\\_CALC\\_DONE\\_INT](#) interrupt.
  - [ECDSA\\_CALC\\_DONE\\_INT\\_CLR](#): set this bit to clear the [ECDSA\\_CALC\\_DONE\\_INT](#) interrupt status. By setting this bit to 1, fields [ECDSA\\_CALC\\_DONE\\_INT\\_RAW](#) and [ECDSA\\_CALC\\_DONE\\_INT\\_ST](#) will be cleared.
- [ECDSA\\_SHA\\_RELEASE\\_INT](#): triggered when SHA is released. This interrupt source is configured by the following registers:
  - [ECDSA\\_SHA\\_RELEASE\\_INT\\_RAW](#): stores the raw interrupt status of [ECDSA\\_SHA\\_RELEASE\\_INT](#).

- [ECDSA\\_SHA\\_RELEASE\\_INT\\_ST](#): indicates the status of the ECDSA\_SHA\_RELEASE\_INT interrupt. This field is generated by enabling/disabling the [ECDSA\\_SHA\\_RELEASE\\_INT\\_RAW](#) field via [ECDSA\\_SHA\\_RELEASE\\_INT\\_ENA](#).
- [ECDSA\\_SHA\\_RELEASE\\_INT\\_ENA](#): enables/disables the ECDSA\_SHA\_RELEASE\_INT interrupt.
- [ECDSA\\_SHA\\_RELEASE\\_INT\\_CLR](#): set this bit to clear the ECDSA\_SHA\_RELEASE\_INT interrupt status. By setting this bit to 1, fields [ECDSA\\_SHA\\_RELEASE\\_INT\\_RAW](#) and [ECDSA\\_SHA\\_RELEASE\\_INT\\_ST](#) will be cleared.

**Note:**

For definitions of *interrupt*, *interrupt signal*, *interrupt source*, and their correlations, please refer to Chapter [11 Interrupt Matrix](#) > Section [11.2 Interrupt Terminology in ESP32-P4](#).

## 28.6 Memory Blocks

ECDSA's memory blocks store input data and output data of the ECDSA operation.

Table 28.6-1. ECDSA Memory Blocks

| Memory       | Size (byte) | Starting Address <sup>*</sup> | Ending Address <sup>*</sup> | Access |
|--------------|-------------|-------------------------------|-----------------------------|--------|
| ECDSA_MEM_M  | 64          | 0x280                         | 0x2BF                       | R/W    |
| ECDSA_MEM_R  | 32          | 0xA00                         | 0xA1F                       | R/W    |
| ECDSA_MEM_S  | 32          | 0xA20                         | 0xA3F                       | R/W    |
| ECDSA_MEM_Z  | 32          | 0xA40                         | 0xA5F                       | R/W    |
| ECDSA_MEM_Qx | 32          | 0xA60                         | 0xA7F                       | R/W    |
| ECDSA_MEM_Qy | 32          | 0xA80                         | 0xA9F                       | R/W    |

<sup>\*</sup> Address offset related to the ECDSA accelerator base address is provided in Table 6.3-2 in Chapter 6 *System and Memory*.

## 28.7 Register Summary

The addresses in this section are relative to the ECDSA base address provided in Table 6.3-2 in Chapter 6 [System and Memory](#).

To enhance security, ECDSA registers have different read and write permissions in different operating statuses. The following is the abbreviation and corresponding relationship of each state:

- PI: IDLE status, corresponding to IDLE Stage.
- PL: LOAD status, corresponding to LOAD Stage.
- PB: BUSY status, corresponding to PREP, PROC and POST Stage.

Other abbreviations given in Column **Access** are explained in Section [Access Types for Registers](#).

| Name                                   | Description                                     | Address | Access    |     |     |     |
|--|---|---------|-----------|-----|-----|-----|
|  |   |         | PI        | PL  | PG  | PB  |
| Data Memory                            | See Table 28.6-1.                               |         |           |     |     |     |
| Configuration Registers                |   |         |           |     |     |     |
| <a href="#">ECDSA_CONF_REG</a>         | ECDSA configuration register                    | 0x0004  | R/W       | N/A |     |     |
| <a href="#">ECDSA_START_REG</a>        | ECDSA start register                            | 0x001C  | WT        |     |     | N/A |
| Clock and Reset Register               |   |         |           |     |     |     |
| <a href="#">ECDSA_CLK_REG</a>          | ECDSA clock gate register                       | 0x0008  | R/W       | N/A |     |     |
| Interrupt Registers                    |   |         |           |     |     |     |
| <a href="#">ECDSA_INT_RAW_REG</a>      | ECDSA interrupt raw register                    | 0x000C  | RO/WTC/SS |     |     |     |

## 28.8 Registers

The addresses in this section are relative to the ECDSA base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

For how to program reserved fields, please refer to Section *Programming Reserved Register Field*.

**Register 28.1. ECDSA\_CONF\_REG (0x0004)**

**ECDSA\_ECC\_CURVE** Configures the elliptic curve used.

0: P-192

1: P-256

(R/W)

**ECDSA\_SOFTWARE\_SET\_Z** Configures how the parameter  $z$  is set.

0: generated from SHA result

1: written by software

(R/W)

**Register 28.2. ECDSA\_START\_REG (0x001C)**

**ECDSA\_START** Configures whether to start the ECDSA operation. This bit will be self-cleared after configuration.

0: no effect

1: start the ECDSA operation

(WT)

**ECDSA\_LOAD\_DONE** Write 1 to generate a signal indicating the ECDSA accelerator's LOAD operation is done. This bit will be self-cleared after configuration. (WT)

ECDSA\_CLK\_GATE\_FORCE\_ON

ECDSA\_SHA\_RELEASE\_INT\_RAW  
ECDSA\_CALC\_DONE\_INT\_RAW

### Register 28.5. ECDSA\_INT\_ST\_REG (0x0010)

**ECDSA\_CALC\_DONE\_INT\_ST** The masked interrupt status of the **ECDSA\_CALC\_DONE\_INT** interrupt. (RO)

**ECDISA\_SHA\_RELEASE\_INT\_ST** The masked interrupt status of the [ECDISA\\_SHA\\_RELEASE\\_INT](#) interrupt. (RO)

### Register 28.6. ECDSA\_INT\_ENA\_REG (0x0014)

**ECDSA\_CALC\_DONE\_INT\_ENA** Write 1 to enable the [ECDSA\\_CALC\\_DONE\\_INT](#) interrupt. (R/W)

**ECDSA\_SHA\_RELEASE\_INT\_ENA** Write 1 to enable the [ECDSA\\_SHA\\_RELEASE\\_INT](#) interrupt. (R/W)

### Register 28.7. ECDSA\_INT\_CLR\_REG (0x0018)

**ECDSA\_CALC\_DONE\_INT\_CLR** Write 1 to clear the [ECDSA\\_CALC\\_DONE\\_INT](#) interrupt. (WT)

**ECDSA\_SHA\_RELEASE\_INT\_CLR** Write 1 to clear the **ECDSA\_SHA\_RELEASE\_INT** interrupt. (WT)

Register 28.8. ECDSA\_STATE\_REG (0x0020)

**ECDSA\_BUSY** Represents the working status of the ECDSA accelerator.

- 0: IDLE
- 1: LOAD
- 2: Reserved
- 3: BUSY

(RO)

Register 28.9. ECDSA\_RESULT\_REG (0x0024)

**ECDSA\_OPERATION\_RESULT** Indicates if the ECDSA operation is successful.

- 0: not successful
- 1: successful

Only valid when the ECDSA operation is done. (RO/SS)

**ECDSA\_K\_VALUE\_WARNING** Indicates if the  $k$  value is greater than the base point order.

- 0:  $k$  value is not greater than the base point order. In this case, the  $k$  value is the set  $k$  value.
- 1:  $k$  value is greater than than the base point order. In this case, the  $k$  value is the set  $k \bmod n$ .

Only valid when the ECDSA operation is done. (RO/SS)

Register 28.10. ECDSA\_SHA\_MODE\_REG (0x0200)

**ECDSA\_SHA\_MODE** Configures SHA algorithms for message hash.

- 1: SHA-224
- 2: SHA-256
- Others: invalid

(R/W)

Register 28.11. ECDSA\_SHA\_START\_REG (0x0210)

**ECDSA\_SHA\_START** Write 1 to start the first SHA operation in the ECDSA process. This bit will be self-cleared after configuration. (WT)

Register 28.12. ECDSA\_SHA\_CONTINUE\_REG (0x0214)

**ECDSA\_SHA\_CONTINUE** Write 1 to start the latter SHA operation in the ECDSA process. This bit will be self-cleared after configuration. (WT)

Register 28.13. ECDSA\_SHA\_BUSY\_REG (0x0218)

**ECDSA\_SHA\_BUSY** Represents the working status of the SHA accelerator in the ECDSA process.

- 0: IDLE
- 1: BUSY

(RO)

Register 28.14. ECDSA\_DATE\_REG (0x00FC)

**ECDSA\_DATE** The ECDSA version control register. (R/W)

## Chapter 29

# External Memory Encryption and Decryption (XTS\_AES)

## 29.1 Overview

The ESP32-P4 integrates an External Memory Encryption and Decryption module that complies with the XTS-AES standard algorithm specified in [IEEE Std 1619-2007](#), providing security for users' application code and data stored in the external memory (flash and RAM). Users can store proprietary firmware and sensitive data (e.g., credentials for gaining access to a private network) in the external flash, or store general data in the external RAM.

## 29.2 Features

- General XTS-AES algorithm, compliant with IEEE Std 1619-2007
- Software-based manual encryption
- High-speed auto encryption and decryption without software's participation
- Encryption and decryption functions jointly enabled/disabled by registers configuration, eFuse parameters, and boot mode
- Configurable Anti-DPA

## 29.3 Module Structure

The External Memory Encryption and Decryption module consists of three blocks, namely the Manual Encryption block, Auto Encryption block, and Auto Decryption block. The module architecture is shown in Figure [29.3-1](#).

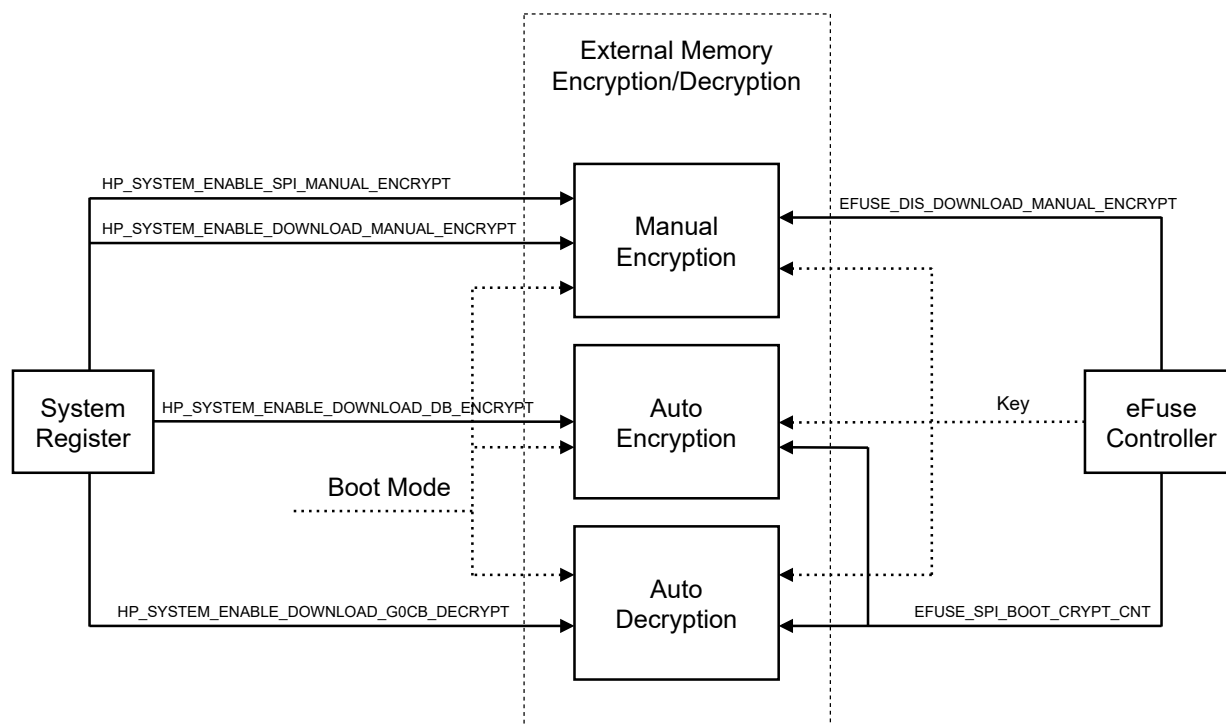

Figure 29.3-1. Architecture of the External Memory Encryption and Decryption

The Manual Encryption block can encrypt instructions and data, which will then be written to the external flash as ciphertext via SPI1.

When the CPU writes data to the external RAM through cache, the Auto Encryption block will automatically encrypt the data first, then the data will be written to the external RAM as ciphertext.

When the CPU reads from the external flash or external RAM through cache, the Auto Decryption block will automatically decrypt the ciphertext to retrieve instructions and data.

In the System Registers peripheral (see [3 System Registers \[to be added later\]](#)), the following four bits in register [HP\\_SYSTEM\\_EXTERNAL\\_DEVICE\\_ENCRYPT\\_DECRYPT\\_CONTROL\\_REG](#) are relevant to the external memory encryption and decryption:

- [HP\\_SYSTEM\\_ENABLE\\_DOWNLOAD\\_MANUAL\\_ENCRYPT](#)
- [HP\\_SYSTEM\\_ENABLE\\_DOWNLOAD\\_GOCB\\_DECRYPT](#)
- [HP\\_SYSTEM\\_ENABLE\\_DOWNLOAD\\_DB\\_ENCRYPT](#)
- [HP\\_SYSTEM\\_ENABLE\\_SPI\\_MANUAL\\_ENCRYPT](#)

The XTS\_AES module also fetches two parameters from the peripheral eFuse Controller, which are: [EFUSE\\_DIS\\_DOWNLOAD\\_MANUAL\\_ENCRYPT](#) and [EFUSE\\_SPI\\_BOOT\\_CRYPT\\_CNT](#). For detailed information, please see Chapter [7 eFuse Controller](#).

## 29.4 Functional Description

## 29.4.1 XTS Algorithm

The manual encryption and auto encryption/decryption all use the same algorithm. During implementation, the XTS algorithm is characterized by a "data unit" of 1024 bits, defined in the Section *XTS-AES encryption procedure* of

[XTS-AES Tweakable Block Cipher](#) Standard. For more information about the XTS-AES algorithm, please refer to [IEEE Std 1619-2007](#).

## 29.4.2 Key

The Manual Encryption block, Auto Encryption block, and Auto Decryption block share the same *Key* when implementing the XTS algorithm. The *Key* is provided by the eFuse hardware and cannot be accessed by users.

The *Key* can be either 256-bit or 512-bit long. The value and length of the *Key* are determined by the content in the eFuse blocks from Block4 ~ Block9 and corresponding eFuse parameters. For easier description, we define:

- Block<sub>A</sub>: the block whose key purpose is EFUSE\_KEY\_PURPOSE\_XTS\_AES\_256\_KEY\_1 (please refer to Table 7.3-2 *Secure Key Purpose Values*). If Block<sub>A</sub> exists, a 256-bit *Key<sub>A</sub>* is stored in it.
- Block<sub>B</sub>: the block whose key purpose is EFUSE\_KEY\_PURPOSE\_XTS\_AES\_256\_KEY\_2 (please refer to Table 7.3-2 *Secure Key Purpose Values*). If Block<sub>B</sub> exists, a 256-bit *Key<sub>B</sub>* is stored in it.
- Block<sub>C</sub>: the block whose key purpose is EFUSE\_KEY\_PURPOSE\_XTS\_AES\_128\_KEY (please refer to Table 7.3-2 *Secure Key Purpose Values*). If Block<sub>C</sub> exists, a 256-bit *Key<sub>C</sub>* is stored in it.

There are five possibilities of how the *Key* is generated depending on whether Block<sub>A</sub>, Block<sub>B</sub>, and Block<sub>C</sub> exist or not, as shown in Table 29.4-1. In each case, the *Key* can be uniquely determined by Block<sub>A</sub>, Block<sub>B</sub> or Block<sub>C</sub>.

**Table 29.4-1. *Key* generated based on *Key<sub>A</sub>*, *Key<sub>B</sub>*, and *Key<sub>C</sub>***

| Block <sub>A</sub> | Block <sub>B</sub> | Block <sub>C</sub> | <i>Key</i>                                       | <i>Key</i> Length (bit) |
|--------------------|--------------------|--------------------|--|-------------------------|
| Yes                | Yes                | Don't care         | <i>Key<sub>A</sub></i>    <i>Key<sub>B</sub></i> | 512                     |
| Yes                | No                 | Don't care         | <i>Key<sub>A</sub></i>   0 <sup>256</sup>        | 512                     |
| No                 | Yes                | Don't care         | 0 <sup>256</sup>    <i>Key<sub>B</sub></i>       | 512                     |
| No                 | No                 | Yes                | <i>Key<sub>C</sub></i>                           | 256                     |
| No                 | No                 | No                 | 0 <sup>256</sup>                                 | 256                     |

### Notes:

- "YES" indicates that the block exists
- "NO" indicates that the block does not exist
- "0<sup>256</sup>" indicates a bit string that consists of 256-bit zeros
- "||" is a bonding operator for joining one-bit string to another

For more information on key purposes, please refer to Table 7.3-2 *Secure Key Purpose Values* in Chapter 7 *eFuse Controller*.

### 29.4.3 Target Memory Space

The target memory space refers to a continuous address space in the external memory where the first encrypted ciphertext is stored. The target memory space can be uniquely determined by three relevant parameters: type, size, and base address, whose definitions are listed below.

- Type: the *type* of the target memory space, either external flash or external RAM. Value 0 indicates external flash, while 1 indicates external RAM.
- Size: the *size* of the target memory space, indicating the number of bytes encrypted in one encryption operation, which supports 16, 32, or 64 bytes.
- Base address: the *base\_addr* of the target memory space. It is a 30-bit physical address, with a range of 0x0000\_0000 ~ 0x3FFF\_FFFF. It should be aligned to *size*, i.e.,  $base\_addr \% size == 0$ .

For example, if there are 16 bytes of instruction data that need to be encrypted and written to address 0x130 ~ 0x13F in the external flash, then the target space is 0x130 ~ 0x13F, type is 0 (external flash), size is 16 (bytes), and the base address is 0x130.

The encryption of any length (must be multiples of 16 bytes) of plaintext instruction/data can be completed separately in multiple operations, and each operation has individual target memory space and relevant parameters.

For Auto Encryption/Decryption blocks, these parameters are automatically defined by hardware. For the Manual Encryption block, these parameters should be configured manually by users.

**Note:**

The “tweak” defined in Chapter 5.1 *Data units and tweaks* of [IEEE Std 1619-2007](#) is a 128-bit non-negative integer (*tweak*), which can be generated according to  $tweak = type * 2^{30} + (base\_addr \& 0x3FFFFFF80)$ . The lowest 7 bits and the highest 97 bits in *tweak* are always zero.

### 29.4.4 Data Writing

For Auto Encryption/Decryption blocks, data writing is automatically applied in hardware. For Manual Encryption blocks, data writing should be applied by users. The Manual Encryption block has a register block which consists of 16 registers, i.e., `XTS_AES_PLAIN_n_REG` ( $n$ : 0 ~ 15), that are dedicated to data writing and can store up to 512 bits of plaintext at a time.

Actually, the Manual Encryption block does not care where the plaintext comes from, but only where the ciphertext will be stored. Because of the strict correspondence between plaintext and ciphertext, in order to better describe how the plaintext is stored in the register block, we assume that the plaintext is stored in the target memory space in the first place and replaced by ciphertext after encryption. Therefore, the following description in this section no longer has the concept of “plaintext”, but uses “target memory space” instead.

**How mapping between target memory space and registers works:**

Assume a word in the target memory space is stored in *address*, define  $offset = address \% 64$ ,  $n = offset / 4$ , then the word will be stored in register `XTS_AES_PLAIN_n_REG`.

For example, when the *size* is 64, all registers in the register block will be used. The mapping between *offset* and registers now is shown in Table 29.4-2.

Table 29.4-2. Mapping Between Offsets and Registers

| <i>offset</i> | Register                            | <i>offset</i> | Register                             |
|---------------|-------------------------------------|---------------|--------------------------------------|
| 0x00          | <a href="#">XTS_AES_PLAIN_0_REG</a> | 0x20          | <a href="#">XTS_AES_PLAIN_8_REG</a>  |
| 0x04          | <a href="#">XTS_AES_PLAIN_1_REG</a> | 0x24          | <a href="#">XTS_AES_PLAIN_9_REG</a>  |
| 0x08          | <a href="#">XTS_AES_PLAIN_2_REG</a> | 0x28          | <a href="#">XTS_AES_PLAIN_10_REG</a> |
| 0x0C          | <a href="#">XTS_AES_PLAIN_3_REG</a> | 0x2C          | <a href="#">XTS_AES_PLAIN_11_REG</a> |
| 0x10          | <a href="#">XTS_AES_PLAIN_4_REG</a> | 0x30          | <a href="#">XTS_AES_PLAIN_12_REG</a> |
| 0x14          | <a href="#">XTS_AES_PLAIN_5_REG</a> | 0x34          | <a href="#">XTS_AES_PLAIN_13_REG</a> |
| 0x18          | <a href="#">XTS_AES_PLAIN_6_REG</a> | 0x38          | <a href="#">XTS_AES_PLAIN_14_REG</a> |
| 0x1C          | <a href="#">XTS_AES_PLAIN_7_REG</a> | 0x3C          | <a href="#">XTS_AES_PLAIN_15_REG</a> |

### 29.4.5 Manual Encryption Block

The Manual Encryption block is a peripheral module. It is equipped with registers and can be accessed by the CPU directly. Registers embedded in this block, the System Registers peripheral, eFuse parameters, and boot mode jointly configure and use this module. Please note that the Manual Encryption block can only encrypt for storage in the external flash.

**The Manual Encryption block is operational only under certain conditions:**

- In SPI Boot mode:

If bit [HP\\_SYSTEM\\_ENABLE\\_SPI\\_MANUAL\\_ENCRYPT](#) in register

[HP\\_SYSTEM\\_EXTERNAL\\_DEVICE\\_ENCRYPT\\_DECRYPT\\_CONTROL\\_REG](#) is 1, the Manual Encryption block can be enabled. Otherwise, it is not operational.

- In Joint Download Boot mode:

If bit [HP\\_SYSTEM\\_ENABLE\\_DOWNLOAD\\_MANUAL\\_ENCRYPT](#) in register

[HP\\_SYSTEM\\_EXTERNAL\\_DEVICE\\_ENCRYPT\\_DECRYPT\\_CONTROL\\_REG](#) is 1 and the eFuse parameter [EFUSE\\_DIS\\_DOWNLOAD\\_MANUAL\\_ENCRYPT](#) is 0, the Manual Encryption block can be enabled.

Otherwise, it is not operational.

**Note:**

Even though the CPU can skip cache and get the encrypted instruction/data directly by reading the external memory, users can by no means access *Key*.

### 29.4.6 Auto Encryption Block

The Auto Encryption block is not a conventional peripheral, so it does not have any registers and cannot be accessed by the CPU directly. The System Registers peripheral, eFuse parameters, and boot mode jointly configure and use this block.

**The Auto Encryption block is operational only under certain conditions:**

- In SPI Boot mode:

when [EFUSE\\_SPI\\_BOOT\\_CRYPT\\_CNT](#) (3 bits) is set to 1, 2, 4 or 7 (i.e., there is an odd number of 1s in its binary representation), then the Auto Encryption block can be enabled. Otherwise, it is not operational.

- In Joint Download Boot mode:

when bit [HP\\_SYSTEM\\_ENABLE\\_DOWNLOAD\\_DB\\_ENCRYPT](#) in register

[HP\\_SYSTEM\\_EXTERNAL\\_DEVICE\\_ENCRYPT\\_DECRYPT\\_CONTROL\\_REG](#) is 1, the Auto Encryption block can be enabled. Otherwise, it is not operational.

**Note:**

- When the Auto Encryption block is enabled, it will automatically encrypt data if the CPU writes data to the external RAM, and then the encrypted ciphertext will be written to the external RAM. The entire encryption process does not need software participation and is transparent to the cache. Users can by no means obtain the encryption *Key* during the process.
- When the Auto Encryption block is disabled, it will ignore the CPU's access request to the cache and not process the data. Therefore, the data will be written to the external RAM as plaintext directly.

## 29.4.7 Auto Decryption Block

The Auto Decryption block is not a conventional peripheral, so it does not have any registers and cannot be accessed by the CPU directly. The System Registers peripheral, eFuse parameters, and boot mode jointly configure and use this block.

**The Auto Decryption block is operational only under certain conditions:**

- In SPI Boot mode:

when [EFUSE\\_SPI\\_BOOT\\_CRYPT\\_CNT](#) (3 bits in total) is set to 1, 2, 4 or 7 (i.e., there is an odd number of 1s in its binary representation), then the Auto Decryption block can be enabled. Otherwise, it is not operational.

- In Joint Download Boot mode:

when bit [HP\\_SYSTEM\\_ENABLE\\_DOWNLOAD\\_GOCB\\_DECRYPT](#) in register

[HP\\_SYSTEM\\_EXTERNAL\\_DEVICE\\_ENCRYPT\\_DECRYPT\\_CONTROL\\_REG](#) is 1, the Auto Decryption block can be enabled. Otherwise, it is not operational.

**Note:**

- When the Auto Decryption block is enabled, it will automatically decrypt the ciphertext if the CPU reads instructions/data from the external memory via cache to retrieve the instructions/data. The entire decryption process does not need software participation and is transparent to the cache. The software can by no means obtain the decryption *Key* during the process.
- When the Auto Decryption block is disabled, it does not have any effect on the contents stored in the external memory, no matter if they are encrypted or not. Therefore, what the CPU reads via cache is the original information stored in the external memory.

## 29.5 Software Process

When the Manual Encryption block operates, software needs to be involved in the process. The steps are as follows:

## 1. Configure XTS\_AES:

- Set register [XTS\\_AES\\_DESTINATION\\_REG](#) to *type* = 0.
- Set register [XTS\\_AES\\_PHYSICAL\\_ADDRESS\\_REG](#) to *base\_addr*.
- Set register [XTS\\_AES\\_LINESIZE\\_REG](#) to  $\frac{size}{32}$ .

For definitions of *base\_addr* and *size*, please refer to Section [29.4.3](#).

2. Write plaintext instructions/data to the registers block XTS\_AES\_PLAIN\_*n*\_REG (*n*: 0-15). For detailed information, please refer to Section [29.4.4](#).

Please write data to registers according to your actual needs, and the unused ones could be set to arbitrary values.

3. Wait for Manual Encryption block to be idle. Poll register [XTS\\_AES\\_STATE\\_REG](#) until it reads 0 which indicates the Manual Encryption block is idle.4. Trigger manual encryption by writing 1 to register [XTS\\_AES\\_TRIGGER\\_REG](#).5. Wait for the encryption process completion. Poll register [XTS\\_AES\\_STATE\\_REG](#) until it reads 2.

*Step 1 to 5 are the steps of encrypting plaintext instructions/data with the Manual Encryption block using the Key.*

6. Write 1 to register [XTS\\_AES\\_RELEASE\\_REG](#) to grant SPI1 the access to the encrypted ciphertext. After this, the value of register [XTS\\_AES\\_STATE\\_REG](#) will become 3.7. Call SPI1 to write the ciphertext in the external flash (see Section [API Reference - Flash Encrypt](#) in [ESP-IDF Programming Guide](#)).8. Write 1 to register [XTS\\_AES\\_DESTROY\\_REG](#) to destroy the ciphertext. After this, the value of register [XTS\\_AES\\_STATE\\_REG](#) will become 0.

Repeat the above steps according to the amount of plaintext instructions/data that need to be encrypted.

## 29.6 Anti-DPA

DPA (Differential Power Analysis) is a side-channel attack method in cryptography, through which an attacker can statistically analyze data collected from multiple encryption operations to calculate intermediate values in the encryption computation. ESP32-P4 XTS\_AES supports Anti-DPA to defend against external DPA attacks.

The XTS-AES algorithm can be divided into two steps, according to [IEEE Std 1619-2007](#):

- Step 1: Calculating T value. In this section, we define this step as "calculating T".
- Step 2: Calculating Cipher/Plain text. In this section, we define this step as "calculating D".

Different security levels can be configured through registers:

- First we define the below parameters for a better description:
  - *select\_reg* = [XTS\\_AES\\_CRYPT\\_DPA\\_SELECT\\_REGISTER](#)
  - *reg\_d\_dpa\_en* = [XTS\\_AES\\_CRYPT\\_CALC\\_D\\_DPA\\_EN](#)
  - *efuse\_dpa\_en* = [EFUSE\\_CRYPT\\_DPA\\_ENABLE](#)

- $reg\_anti\_dpa\_level = XTS\_AES\_CRYPT\_SECURITY\_LEVEL$
- $efuse\_anti\_dpa\_level = 3$

- Configure the security level of Anti-DPA for the XTS\_AES module:

$$Anti\_DPA\_level = select\_reg ? (reg\_anti\_dpa\_level) : (efuse\_dpa\_en * efuse\_anti\_dpa\_level)$$

When  $Anti\_DPA\_level$  equals 0, Anti-DPA is disabled. The higher the value of  $Anti\_DPA\_level$  is, the stronger the Anti-DPA ability is.

- Configure whether to enable Anti-DPA when the XTS-AES algorithm is calculating D:

$$Anti\_DPA\_enabled\_in\_calc\_D = select\_reg ? reg\_d\_dpa\_en : efuse\_dpa\_en$$

If  $Anti\_DPA\_level$  is not 0, when  $Anti\_DPA\_enabled\_in\_calc\_D$  equals to 1, Anti-DPA is enabled when XTS-AES algorithm is calculating D.

If  $Anti\_DPA\_level$  is not 0, Anti-DPA is always enabled when the XTS-AES algorithm is calculating T.

**Note:**

- Even if  $efuse\_dpa\_en$  is set to 1, you can still disable anti-DPA by configuring  $select\_reg = 1$  and  $reg\_anti\_dpa\_level = 0$ .
- Configuring whether or not to enable Anti-DPA will have an impact on the external storage access bandwidth:
  - When Anti-DPA is enabled during the calculation of D, the read and write bandwidth will be reduced by more than 50% when the Anti-DPA level  $\geq 4$ .
  - When Anti-DPA is disabled during the calculation of D, the read and write bandwidth will be reduced by more than 50% when the Anti-DPA level  $\geq 6$ .

## 29.7 Register Summary

The addresses in this section are relative to the External Memory Encryption and Decryption base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

The abbreviations given in Column **Access** are explained in Section *Access Types for Registers*.

| Name   | Description                                | Address | Access |
|--|--|---------|--------|
| <b>Plaintext Register Heap</b>               |  |         |        |
| <a href="#">XTS_AES_PLAIN_0_REG</a>          | Plaintext register 0                       | 0x0300  | R/W    |
| <a href="#">XTS_AES_PLAIN_1_REG</a>          | Plaintext register 1                       | 0x0304  | R/W    |
| <a href="#">XTS_AES_PLAIN_2_REG</a>          | Plaintext register 2                       | 0x0308  | R/W    |
| <a href="#">XTS_AES_PLAIN_3_REG</a>          | Plaintext register 3                       | 0x030C  | R/W    |
| <a href="#">XTS_AES_PLAIN_4_REG</a>          | Plaintext register 4                       | 0x0310  | R/W    |

## 29.8 Registers

The addresses in this section are relative to the External Memory Encryption and Decryption base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

For how to program reserved fields, please refer to Section [Programming Reserved Register Field](#).

Register 29.1. XTS\_AES\_PLAIN\_ *n* \_REG (*n*: 0-15) (0x0300+4\**n*)

XTS\_AES\_PLAIN\_ *n* Configures the *n*th 32-bit piece of plain text. (R/W)

Register 29.2. XTS\_AES\_LINESIZE\_REG (0x0340)

XTS\_AES\_LINESIZE Configures the data size of one encryption operation.

- 0: 16 bytes
  - 1: 32 bytes
  - 2: 64 bytes
  - 3: Invalid
- (R/W)

Register 29.3. XTS\_AES\_DESTINATION\_REG (0x0344)

**XTS\_AES\_DESTINATION** Configures the type of external memory for Manual Encryption. Currently, it must be set to 0, as the Manual Encryption block only supports flash encryption. Set this bit to 1 may cause an error.

0: flash  
1: external RAM  
(R/W)

Register 29.4. XTS\_AES\_PHYSICAL\_ADDRESS\_REG (0x0348)

**XTS\_AES\_PHYSICAL\_ADDRESS** Configures physical address. Note that its value should be within the range between 0x0000\_0000 and 0x00FF\_FFFF. (R/W)

**Register 29.5. XTS\_AES\_DPA\_CTRL\_REG (0x0388)**

|            |  |  |  |  |  |  |  |  |  |  |     |   |     |   |     |                                   |       |  |  |  |
|------------|--|--|--|--|--|--|--|--|--|--|-----|---|-----|---|-----|-----------------------------------|-------|--|--|--|
| (reserved) |  |  |  |  |  |  |  |  |  |  |     |   |     |   |     | XTS_AES_CRYPT_DPA_SELECT_REGISTER |       |  |  |  |
|            |  |  |  |  |  |  |  |  |  |  |     |   |     |   |     | XTS_AES_CRYPT_CALC_D_DPA_EN       |       |  |  |  |
|            |  |  |  |  |  |  |  |  |  |  |     |   |     |   |     | XTS_AES_CRYPT_SECURITY_LEVEL      |       |  |  |  |
| 31         |  |  |  |  |  |  |  |  |  |  | 5   | 4 | 3   | 2 | 0   |                                   |       |  |  |  |
| 0x00000000 |  |  |  |  |  |  |  |  |  |  | 0x0 |   | 0x1 |   | 0x7 |                                   | Reset |  |  |  |

**XTS\_AES\_CRYPT\_DPA\_SELECT\_REGISTER** Configures whether the Anti-DPA function is controlled by eFuse or register.

0: The Anti-DPA function is configured by register.

1: The Anti-DPA function is configured by eFuse.

(R/W)

**XTS\_AES\_CRYPT\_CALC\_D\_DPA\_EN** Configures whether to enable Anti-DPA in the XTS\_AES algorithm.

0: Enable Anti-DPA only when calculating T

1: Enable Anti-DPA both when calculating T and D

Note that this field is only effective when [XTS\\_AES\\_CRYPT\\_SECURITY\\_LEVEL](#) is not 0.

(R/W)

**XTS\_AES\_CRYPT\_SECURITY\_LEVEL** Configures the security level of external memory encryption and decryption.

0: Disable the Anti-DPA function

1-7: The bigger the number is, the more secure the encryption and decryption are

(R/W)

**Register 29.6. XTS\_AES\_TRIGGER\_REG (0x034C)**

|            |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                 |  |       |  |
|------------|--|--|--|--|--|--|--|--|--|--|--|--|--|--|--|-----------------|--|-------|--|
| (reserved) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | XTS_AES_TRIGGER |  |       |  |
| 31         |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 1               |  | 0     |  |
| 0x00000000 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | x               |  | Reset |  |

**XTS\_AES\_TRIGGER** Configures whether or not to enable manual encryption.

0: Disable manual encryption

1: Enable manual encryption

(WO)

**Register 29.7. XTS\_AES\_RELEASE\_REG (0x0350)**

|            |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |                 |       |
|------------|--|--|--|--|--|--|--|--|--|--|--|--|--|--|---|-----------------|-------|
| (reserved) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   | XTS_AES_RELEASE |       |
| 31         |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 1 | 0               | Reset |
| 0x00000000 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   | x               |       |

**XTS\_AES\_RELEASE** Configures whether to grant SPI1 access to the encrypted result.

0: No effect

1: Grant SPI1 access

(WO)

**Register 29.8. XTS\_AES\_DESTROY\_REG (0x0354)**

|            |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |                 |       |
|------------|--|--|--|--|--|--|--|--|--|--|--|--|--|--|---|-----------------|-------|
| (reserved) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   | XTS_AES_DESTROY |       |
| 31         |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 1 | 0               | Reset |
| 0x00000000 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   | x               |       |

**XTS\_AES\_DESTROY** Configures whether to destroy the encrypted result.

0: No effect

1: Destroy encrypted result

(WO)

**Register 29.9. XTS\_AES\_STATE\_REG (0x0358)**

|            |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |               |   |  |       |
|------------|--|--|--|--|--|--|--|--|--|--|--|--|--|--|---|---------------|---|--|-------|
| (reserved) |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   | XTS_AES_STATE |   |  |       |
| 31         |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 2 | 1             | 0 |  |       |

**XTS\_AES\_DATE** Version control register. (R/W)

## Chapter 30

# Random Number Generator (RNG)

## 30.1 Introduction

The ESP32-P4 contains a true random number generator, which generates 32-bit random numbers that can be used for cryptographical operations, among other things.

## 30.2 Feature List

The random number generator in ESP32-P4 generates true random numbers, which means random numbers generated from a physical process, rather than by means of an algorithm. No number generated within the specified range is more or less likely to appear than any other number.

## 30.3 Functional Description

Every 32-bit value that the system reads from the [LPSYSREG\\_RNG\\_DATA\\_REG](#) register of the random number generator is a true random number. These true random numbers are generated based on the **thermal noise** in the system and the **asynchronous clock mismatch**.

- **Thermal noise** comes from the SAR ADC. Whenever the SAR ADC is enabled, bit streams will be generated and fed into the random number generator through an XOR logic gate as random seeds.
- RC\_FAST\_CLK is an **asynchronous clock** source and it increases the RNG entropy by introducing circuit metastability. Please refer to the [Note](#) about the RC\_FAST\_CLK.

Figure 30.3-1. Noise Source

When there is noise coming from the SAR ADC, the random number generator is fed with a 1-bit entropy in one clock cycle of RC\_FAST\_CLK, which is generated from an internal RC oscillator (see Chapter 9 [Reset and Clock](#) for details). Thus, it is advisable to read the [LPSYSREG\\_RNG\\_DATA\\_REG](#) register at a maximum rate of 1 MHz to obtain the maximum entropy.

## 30.4 Programming Procedure

When using the random number generator, make sure at least either the SAR ADC or RC\_FAST\_CLK is enabled. Otherwise, pseudo-random numbers will be returned.

- For SAR ADC, please refer to Chapter [57 ADC Controller \(ADC\)](#).
- RC\_FAST\_CLK is enabled by setting the PMU\_HP\_SLEEP\_XPD\_FOSC\_CLK bit in the [PMU\\_HP\\_SLEEP\\_LP\\_CK\\_POWER\\_REG](#) register. Please refer to the [Note](#) about the RC\_FAST\_CLK.
- RC\_FAST\_CLK is gated by setting the [LPPERI\\_CK\\_EN\\_RNG](#) bit in the [LPPERI\\_CLK\\_EN\\_REG](#) register.

**Note:**

Enabling RC\_FAST\_CLK increases the RNG entropy. However, to ensure maximum entropy, it's recommended to always enable an ADC source as well.

When using the random number generator, read the [LPSYSREG\\_RNG\\_DATA\\_REG](#) register multiple times until sufficient random numbers have been generated. Ensure the rate at which the register is read does not exceed the frequencies described in section [30.3](#) above.

## 30.5 Register Summary

The abbreviations given in Column **Access** are explained in Section [Access Types for Registers](#).

| Name                                  | Description  | Address     | Access |
|---------------------------------------|--|-------------|--------|
| <a href="#">LPSYSREG_RNG_DATA_REG</a> | Random source data                                   | 0x5011_01A4 | RO     |
| <a href="#">LPPERI_CLK_EN_REG</a>     | Integrated clock gating enable signal of RC_FAST_CLK | 0x5012_0000 | R/W    |

# 30.6 Registers

For how to program reserved fields, please refer to Section [Programming Reserved Register Field](#).

Register 30.1. LPSYSREG\_RNG\_DATA\_REG (0x5011\_01A4)

**LPSYSREG\_RNG\_DATA** Random number source. (RO)

## Part VI

# Image and Voice Processing

Focusing on multimedia processing, this part classifies components related to image and voice processing, including camera controllers, video encoders, image signal processors, and voice activity detection.

## Chapter 31

### JPEG Codec

ESP32-P4's JPEG codec is an image codec, which is based on the JPEG baseline standard, for compressing (encoding) and decompressing (decoding) images to reduce the bandwidth required to transmit images or the space required to store images, making it possible to process large-resolution images. The image encoding process mainly includes discrete cosine transform (DCT), zigzag scanning, quantization, and Huffman coding. The image decoding process, which is the inverse operation of the encoding process, mainly includes Huffman decoding, inverse quantization, inverse zigzag scanning, and inverse discrete cosine transform (IDCT).

#### 31.1 Terminology

|                         |   |
|-------------------------|---|
| <b>MCU</b>              | Minimum coded unit. The basic unit of codec processing  |
| <b>baseline</b>         | A particular sequential DCT-based encoding and decoding process specified in the standard, which is required for all DCT-based decoding processes   |
| <b>image</b>            | A set of two-dimensional arrays of integer data   |
| <b>component</b>        | One of the two-dimensional arrays that comprise an image  |
| <b>data unit</b>        | An $8 \times 8$ block of pixels of one component  |
| <b>marker</b>           | A two-byte code in which the first byte is hexadecimal FF (0xFF) and the second byte is a value between 1 and hexadecimal FE (0xFE). It is served to identify the various structural parts of the compressed data formats |
| <b>restart marker</b>   | Used to isolate coded data segments and for application-specific uses, such as decoder re-synchronization and error recovery  |
| <b>restart interval</b> | The integer number of MCUs processed between two restart markers  |
| <b>scan</b>             | A single pass through the data for one or more of the components in an image  |

Figure 31.1-1 shows the schematic diagram of JPEG bitstream format. In this diagram, the dashed lines mark the structural composition of the corresponding parts of the bitstream, and the orange blocks indicate the marker codes.

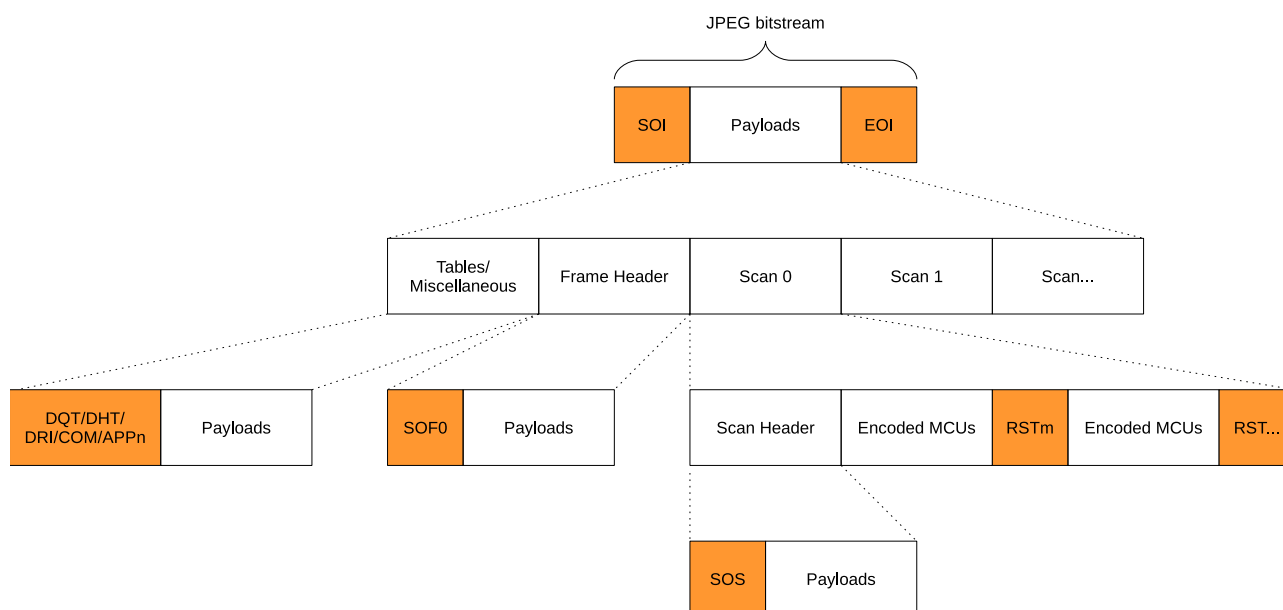

Figure 31.1-1. JPEG Bitstream Format

The marker code assignments are shown in Table 31.1-2.

Table 31.1-2. Marker Code Assignments

| Code Assignment | Marker | Description                                      |
|-----------------|--------|--|
| 0xFFC0          | SOF0   | Start of frame (Baseline DCT)                    |
| 0xFFC4          | DHT    | Define Huffman table(s)                          |
| 0xFFDm          | RSTm   | Restart with modulo 8 count “m”                  |
| 0xFFD8          | SOI    | Start of image                                   |
| 0xFFD9          | EOI    | End of image                                     |
| 0xFFDA          | SOS    | Start of scan                                    |
| 0xFFDB          | DQT    | Define quantization table(s)                     |
| 0xFFDD          | DRI    | Define restart interval                          |
| 0xFFEn          | APPn   | Reserved for application segments, “n” is 0 to F |
| 0xFFFE          | COM    | Comment  |

## 31.2 Introduction

The JPEG codec is based on the JPEG baseline standard, which specifies that an encoding process is completed through one or more scans. A scan contains one or more MCUs. MCU is the sequence of data units defined by the sampling factors of the image components in the scan, which means MCU of different image formats contains different sequence of data units, as shown in Table 31.2-1.

Table 31.2-1. The Number of Data Units in the MCU of Different Image Format

| Image Format | MCU <sup>1</sup>      |                         |                         |
|--------------|-----------------------|-------------------------|-------------------------|
|              | Luminance Component Y | Chrominance Component U | Chrominance Component V |
| YUV444       | 1 x 1                 | 1 x 1                   | 1 x 1                   |

|        |       |       |       |
|--------|-------|-------|-------|
| YUV422 | 2 x 1 | 1 x 1 | 1 x 1 |
| YUV420 | 2 x 2 | 1 x 1 | 1 x 1 |
| GRAY   | 1 x 1 | none  | none  |

<sup>1</sup> The MCU of each image format is represented by the number of data units in the horizontal direction x the number of data units in the vertical direction of each component.

At a time, the JPEG codec can only be configured as an encoder or a decoder, that is, it cannot work as an encoder and a decoder at the same time.

- When used as an encoder, it obtains the image to be compressed through 2D DMA and sends the encoded bitstream to the 2D DMA.
- When used as a decoder, it obtains the coded bitstream through 2D DMA and sends the decoded image to 2D DMA.

The workflow of JPEG codec is shown in Figure 31.2-1.

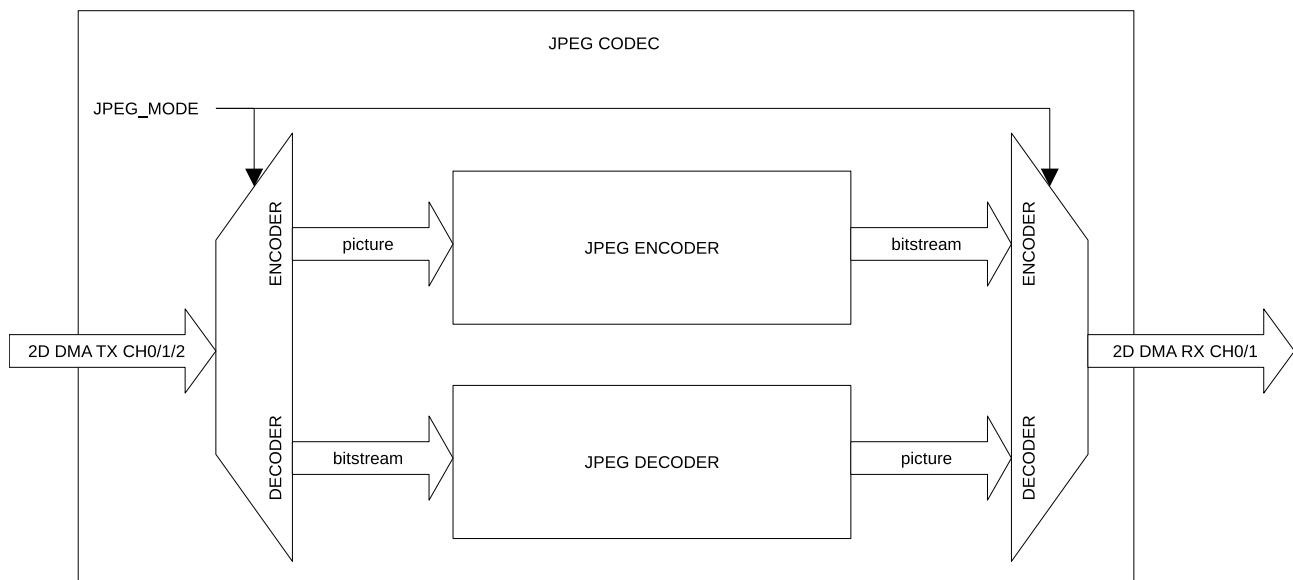

Figure 31.2-1. JPEG codec system connection block diagram

The function clock of the JPEG codec is SYS\_CLK.

## 31.3 Features

When used as an encoder, the JPEG codec has the following features:

- integrated discrete cosine transform algorithm
- integrated canonical Huffman coding
- RGB888, RGB565, YUV422 and GRAY as original input image formats
- conversion of RGB888 and RGB565 into YUV444, YUV422 or YUV420 (the only formats supported by impression) for image compression

- 4 x configurable quantization coefficient tables with 8-bit or 16-bit precision
- performance:
  - still image compression: up to 4K resolution
  - dynamic image compression: up to 1080P@40fps, 720P@70fps (excluding header encoding time)
- automatically added stuffed zero byte
- automatically added EOI marker

When used as a decoder, the JPEG codec has the following features:

- integrated inverse discrete cosine transform algorithm
- integrated Huffman decoding
- supported image formats for compressed bitstream decoding: YUV444, YUV422, YUV420, and GRAY.
- 4 x configurable quantization coefficient tables with 8-bit or 16-bit precision
- 2 x DC and 2 x AC Huffman tables
- supports image decoding of any resolution. However, the resolution of output decoded image differs from the format of the input image:
  - YUV444, GRAY: both the horizontal and vertical resolutions of the output decoded image are multiples of 8, i.e., 150 × 150 images with an output resolution of 152 × 152
  - YUV422: the horizontal resolution of the output decoded image is the multiples of 16 and the vertical resolution is multiples of 8, i.e., 150 × 150 images with an output resolution of 160 × 152
  - YUV420: both the horizontal and vertical resolutions of the output decoded image are multiples of 16, i.e., 150 × 150 images with an output resolution of 160 × 160
- performance:
  - still image decoding: up to 4K resolution
  - dynamic image decoding: up to 1080P@40fps, 720P@70fps (excluding header parsing time)

## 31.4 Architectural Overview

When the JPEG codec is configured as an encoder, its architecture is shown in Figure 31.4-1.

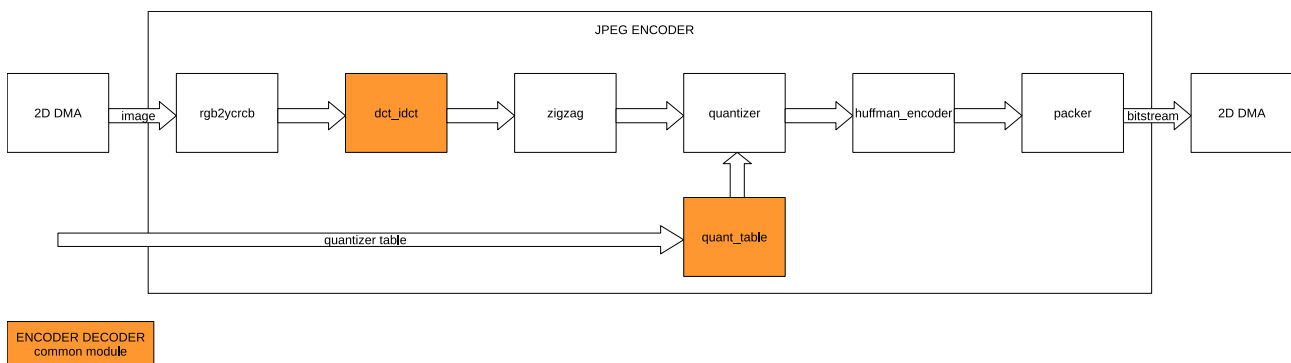

Figure 31.4-1. JPEG encoder architecture

- **rgb2ycrcb** implements the color space conversion, and converts the original image into an image format supported by the codec for compressing.
- **dct\_idct** implements two-dimensional DCT transformation of data units.
- **zigzag** performs zigzag scanning and sorting on the DCT transformed data units.
- **quant\_table** stores the quantization coefficient table delivered by the software.
- **quantizer** quantifies the zigzag sorted data units based on the quantization coefficient table stored in **quant\_table**.
- **huffman\_encoder** performs Huffman encoding on the quantized result of the data units.
- **packer** packs the Huffman-encoded data into groups of 32 bits, and outputs the final encoded bitstream.

When the JPEG codec is configured as a decoder, its architecture is shown in figure 31.4-2.

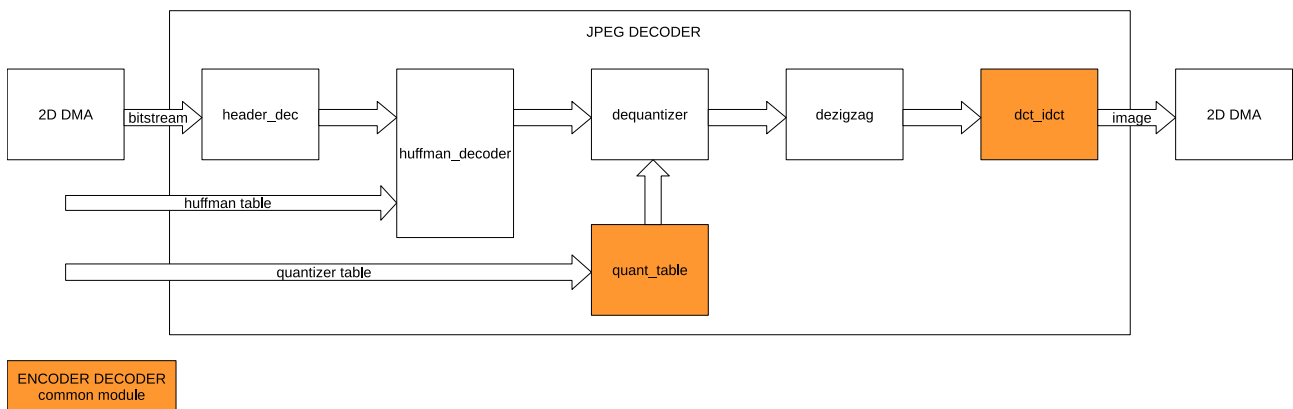

Figure 31.4-2. JPEG decoder architecture

- **header\_dec** implements bitstream extraction and marker SOS and EOI parsing, and controls the decoding process.
- **huffman\_decoder** stores the Huffman table delivered by the software, and implements Huffman decoding of the bitstream.
- **quant\_table** stores the quantization coefficient table delivered by the software.
- **dequantizer** dequantizes the Huffman decoded data based on the quantization coefficient table stored in **quant\_table**.
- **dezigzag** implements reverse zigzag scanning and sorting on the dequantized data units, and combines them into dequantized data units
- **dct\_idct** implements the two-dimensional inverse DCT transformation of the dequantized data units, and outputs the final decoded data units.

Since the JPEG codec cannot be used as an encoder and decoder at the same time, the encoder and decoder share the **quant\_table** and **dct\_idct** modules to save hardware resources.

## 31.5 Functional Description

The JPEG Codec can be configured to work as an encoder or a decoder.

## 31.5.1 JPEG Encoder

### 31.5.1.1 Pause

The JPEG encoder can be paused during the operation for other higher priority tasks. This feature is controlled by register field [JPEG\\_PAUSE\\_EN](#).

- Set [JPEG\\_PAUSE\\_EN](#) to 1, the JPEG encoder will no longer output the bitstream to the 2D DMA RX channel.
- Set [JPEG\\_PAUSE\\_EN](#) back to 0, the JPEG encoder will be resumed, and output the bitstream normally.

### 31.5.1.2 Color Space Conversion

According to the standard, the image formats supported by the JPEG encoder are YUV444, YUV422, YUV420, and GRAY. However, ESP32-P4's JPEG encoder has integrated a color space conversion function to convert RGB888 and RGB565 formats into the above-mentioned image formats supported by the encoder before encoding. In this way, the range of supported image formats is expanded.

The color space conversion formulas for converting RGB to YUV is:

$$\begin{aligned}
 Y &= (0.299 * R) + (0.587 * G) + (0.114 * B) \\
 U &= (-0.1687 * R) + (-0.3313 * G) + (0.5 * B) + 128 \\
 V &= (0.5 * R) + (-0.4187 * G) + (-0.0813 * B) + 128
 \end{aligned}$$

The image format before conversion is represented by its format as well as pixel order. Table [31.5-1](#) demonstrates the representations of the supported image formats for color space conversion:

**Table 31.5-1. Supported Image Formats for Color Space Conversion**

| <a href="#">JPEG_COLOR_SPACE</a> | Format <sup>1</sup> | <a href="#">JPEG_PIXEL_REV</a> | Pixel Order |
|----------------------------------|---------------------|--------------------------------|-------------|
| 0                                | RGB888              | 0                              | RGB         |
|                                  |                     | 1                              | BGR         |
| 1                                | YUV422 <sup>2</sup> | 0                              | YUYV        |
|                                  |                     | 1                              | UYVY        |
| 2                                | RGB565              | 0                              | RGB         |
|                                  |                     | 1                              | BGR         |
| 3                                | GRAY <sup>2</sup>   | N/A                            | YYY         |

<sup>1</sup> The image formats can be converted into other formats supported by the encoder via configuring register field [JPEG\\_SAMPLE\\_SEL](#):

- 0: YUV444
- 1: YUV422
- 2: YUV420

<sup>2</sup> Image formats YUV422 and GRAY will not be converted, regardless of the value of [JPEG\\_SAMPLE\\_SEL](#).

### 31.5.1.3 Configurable Quantization Coefficient Table

ESP32-P4 JPEG encoder has implemented four 8 x 8 quantization coefficient tables in its hardware, which allows 64 software-configurable coefficient values per table.

The precision of each quantization table is configurable via [JPEG\\_QNR\\_PRECISION](#):

- 0: low 8-bit effective
- 1: low 16-bit effective

The coefficient values for each table can be configured in FIFO mode or non-FIFO mode depending on the value of [JPEG\\_QNR\\_FIFO\\_EN](#):

- 0: non-FIFO mode, in which each coefficient is written to a specific address
- 1: FIFO mode, in which all coefficients are written to the same address

**Table 31.5-2. Position Number of Coefficients in a Quantization Coefficient Table (Example)**

|     |    |    |    |    |    |    |    |
|-----|----|----|----|----|----|----|----|
| 0   | 1  | 2  | 3  | 4  | 5  | 6  | 7  |
| 8   | 9  | 10 | 11 | 12 | 13 | 14 | 15 |
| ... |    |    |    |    |    |    |    |
| 56  | 57 | 58 | 59 | 60 | 61 | 62 | 63 |

In different modes, the configuration of the quantization coefficient table is different. Note,  $n$  ( $n = 0, 1, 2, 3$ ) indicates the number of each quantization coefficient table:

- non-FIFO mode: each quantization coefficient in a specific position of a quantization coefficient table  $n$  must be written to a specific address, which is (JPEG codec base address +  $n * 0x100 + \text{quantization coefficient position number} * 0x4$ ), in which the *quantization coefficient position number* can be 0, 1, 2, ..., 63 (see Table 31.5-2). In this mode, since each coefficient is written to a specific address, configuring the 64 quantization coefficients in sequence is not required.
- FIFO mode: all 64 quantization coefficients of the quantization table  $n$  are written to the same address, which is [JPEG\\_TnQNR\\_REG](#). In this mode, since all coefficients are written to the same address, configuring the 64 quantization coefficients one by one in sequence is required. Afterwards, the hardware will automatically store these 64 quantization coefficients in sequence as shown in Table 31.5-2.

If there are less than 4 quantization tables, the corresponding quantization table will not be written.

To use a specific quantization coefficient table  $n$  for the luminance component or the chrominance component, just set the corresponding register fields to  $n$ :

- luminance component: [JPEG\\_LQNR\\_TBL\\_SEL](#)
- chrominance component: [JPEG\\_CQNR\\_TBL\\_SEL](#)

The JPEG baseline standard recommended 8-bit precision quantization coefficient tables for the luminance component and the chrominance component are shown in Table 31.5-3 and Table 31.5-4.

**Table 31.5-3. Recommended 8-bit Precision Quantization Coefficient Table for the Luminance Component**

|    |    |    |    |    |     |     |    |
|----|----|----|----|----|-----|-----|----|
| 16 | 11 | 10 | 16 | 24 | 40  | 51  | 61 |
| 12 | 12 | 14 | 19 | 26 | 58  | 60  | 55 |
| 14 | 13 | 16 | 24 | 40 | 57  | 69  | 56 |
| 14 | 17 | 22 | 29 | 51 | 87  | 80  | 62 |
| 18 | 22 | 37 | 56 | 68 | 109 | 103 | 77 |
| 24 | 35 | 55 | 64 | 81 | 104 | 113 | 92 |

|    |    |    |    |     |     |     |     |
|----|----|----|----|-----|-----|-----|-----|
| 49 | 64 | 78 | 87 | 103 | 121 | 120 | 101 |
| 72 | 92 | 95 | 98 | 112 | 100 | 103 | 99  |

**Table 31.5-4. Recommended 8-bit Precision Quantization Coefficient Table for the Chrominance Component**

|    |    |    |    |    |    |    |    |
|----|----|----|----|----|----|----|----|
| 17 | 18 | 24 | 47 | 99 | 99 | 99 | 99 |
| 18 | 21 | 26 | 66 | 99 | 99 | 99 | 99 |
| 24 | 26 | 56 | 99 | 99 | 99 | 99 | 99 |
| 47 | 66 | 99 | 99 | 99 | 99 | 99 | 99 |
| 99 | 99 | 99 | 99 | 99 | 99 | 99 | 99 |
| 99 | 99 | 99 | 99 | 99 | 99 | 99 | 99 |
| 99 | 99 | 99 | 99 | 99 | 99 | 99 | 99 |
| 99 | 99 | 99 | 99 | 99 | 99 | 99 | 99 |

More information can be found in [ITU T.81 Recommendation](#). Adjusting the quantization table can change the compression ratio (the ratio between the uncompressed image size and compressed image size) and the quality of encoded images (the larger the quantization coefficient, the greater the compression ratio and the worse the image quality).

#### 31.5.1.4 Stuffed Zero Byte

As required in the JPEG baseline standard to avoid any marker within a Huffman-coded segment, any 0xFF byte generated by the Huffman coding should be followed by a “stuffed” zero byte.

JPEG encoder has implemented a mechanism to automatically add this “stuffed” 0x00 byte after each 0xFF byte in the Huffman-coded segment of bitstream.

Users can configure whether to add 0x00 byte after each 0xFF byte via [JPEG\\_FF\\_CHECK\\_EN](#):

- 0: not add
- 1: add (by default)

#### 31.5.1.5 EOI Marker

The end of Image (EOI) marker is used to mark the end of the bitstream of a compressed image. The EOI marker code is 0xFFD9.

JPEG encoder has implemented a mechanism to automatically add the EOI marker at the end of the bitstream.

Users can configure whether to add EOF marker via [JPEG\\_TAILER\\_EN](#):

- 0: not add
- 1: add

### 31.5.2 JPEG Decoder

The information in the bitstream must be parsed by the software, then sent to the hardware through the APB configuration bus. Note that the hardware does not support parsing any marker segments, except the SOS,

RST and EOI marker segments.

### 31.5.2.1 Multiple Chrominance Components

The frame header contains information about the number of chrominance components of the image, the ID of each component, and the sampling factors in the horizontal and vertical directions of each component.

JPEG decoder's software must parse such information and pass it to respective registers

[JPEG\\_COMPONENT\\_NUM](#), [JPEG\\_Cn\\_ID](#), [JPEG\\_Cn\\_X\\_FACTOR](#), and [JPEG\\_Cn\\_Y\\_FACTOR](#). Here, *n* can be 0, 1, 2, indicating that up to 3 chrominance components are supported by hardware. Note that if less than 3 components are involved, just do not configure the rest of the registers.

According to the value of register [JPEG\\_Cn\\_ID](#) of each chrominance component, the hardware will check whether it is consistent with the ID in the scan header information. The sampling factor indicates the number of data units of this component that an MCU contains in both the horizontal and vertical directions. So according to the value of register [JPEG\\_COMPONENT\\_NUM](#), [JPEG\\_Cn\\_X\\_FACTOR](#) and [JPEG\\_Cn\\_Y\\_FACTOR](#), the hardware can obtain the proportional relationship of chrominance components, that is, the format of the image to be decoded. See Table 31.5-5.

**Table 31.5-5. Sampling Factor and Image Format**

| <a href="#">JPEG_COMPONENT_NUM</a> | <a href="#">JPEG_Cn_X/Y_FACTOR</a>   | Format of the Image to be Decoded |
|------------------------------------|--|-----------------------------------|
| 0                                  | -  | invalid                           |
| 1                                  | CO_X_FACTOR is 1<br>CO_Y_FACTOR is 1   | GRAY                              |
| 2                                  | -  | invalid                           |
| 3                                  | CO_X_FACTOR is 1<br>CO_Y_FACTOR is 1<br>C1_X_FACTOR is 1<br>C1_Y_FACTOR is 1<br>C2_X_FACTOR is 1<br>C2_Y_FACTOR is 1 | YUV444                            |
|                                    | CO_X_FACTOR is 2<br>CO_Y_FACTOR is 1<br>C1_X_FACTOR is 1<br>C1_Y_FACTOR is 1<br>C2_X_FACTOR is 1<br>C2_Y_FACTOR is 1 | YUV422                            |
|                                    | CO_X_FACTOR is 2<br>CO_Y_FACTOR is 2<br>C1_X_FACTOR is 1<br>C1_Y_FACTOR is 1<br>C2_X_FACTOR is 1<br>C2_Y_FACTOR is 1 | YUV420                            |

Regardless of the format of the image to be decoded, the decoder only supports one scan, which contains all components. After decoding, the image will be sent to 2D DMA, so please refer to Chapter 5 [2D-DMA Controller \(2D-DMA\)](#) for the layout of the decoded image in each format.

### 31.5.2.2 Parsing RST Marker

The bitstream may have a restart (RST) marker in the scan segment. The RST marker code is 0xFFD $x$  ( $x = 0, 1, \dots, 7$ ).

JPEG decoder's hardware can parse RST markers and check whether the actual number of MCUs between two RST markers is the same as the restart interval defined in the DRI segment of the Tables/Miscellaneous segment.

Firstly, the software parses the DRI segment and pass the defined restart interval to register [JPEG\\_RESTART\\_INTERVAL](#). Then, the hardware will check whether the subsequent bitstream has an RST marker every time [JPEG\\_RESTART\\_INTERVAL](#) MCUs are decoded.

Configuring [JPEG\\_RESTART\\_INTERVAL](#) to 0 indicates the bitstream does not contain any RST marker. In this case, the hardware will not check RST markers.

### 31.5.2.3 Configurable Quantization Coefficient Table

ESP32-P4 JPEG decoder also supports 4 configurable quantization coefficient tables. Since the JPEG codec cannot be used as an encoder and decoder at the same time, decoder can share the same four configurable quantization coefficient tables with the encoder to save hardware resources.

Therefore, the configuration of decoder's quantization coefficient tables is similar to that of the encoder (see Section [31.5.1.3](#)) with some exceptions described below:

- The software needs to parse the DQT segment in the Tables/Miscellaneous segment to obtain the quantization coefficient tables of the decoder. The recommended quantization coefficient tables are the same as the encoder shown in Table [31.5-3](#) and Table [31.5-4](#).
- The precision of the quantization table $n$  is configured via higher 4 bits of register [JPEG\\_T \$n\$ \\_DQT\\_INFO](#):
  - 0: low 8-bit effective
  - 1: low 16-bit effective

The precision is also obtained from the DQT segment in the Tables/Miscellaneous segment.

- For each chrominance component, a different quantization coefficient table can be selected. The lower 4 bits of register [JPEG\\_T \$n\$ \\_DQT\\_INFO](#) specify the ID of each quantization coefficient table, and each chrominance component selects the quantization coefficient table whose ID is the value of register [JPEG\\_C \$n\$ \\_DQT\\_TBL\\_SEL](#). The ID of each quantization coefficient table is also obtained from the DQT segment in the Tables/Miscellaneous segment.

### 31.5.2.4 Configurable Huffman Table

ESP32-P4 supports up to 2 DC Huffman tables and 2 AC Huffman tables. Users can configure as many Huffman tables as needed within the limits.

Each Huffman table can be established with three types of information, which can be obtained from the DHT segment in the Tables/Miscellaneous segment:

- the number of codeword with a codeword length of 1 to 16 bits,
- the symbols corresponding to the decoded codeword
  - DC table: up to 16 symbols

- AC table: up to 256 symbols
- the minimum codeword with a codeword length of 1 to 16 bits.

Both of the DC and AC Huffman tables can be configured in a FIFO fashion or a non-FIFO fashion depending on the value of `JPEG_DHT_FIFO_EN`:

- 0: non-FIFO mode
- 1: FIFO mode

In different modes, the configuration of the Huffman table is different. Here is the configuration of DC tables $n$  ( $n = 0, 1$ ):

- non-FIFO mode: each piece in different type of information used to establish the DC $n$  Huffman table must be written to a specific address.
  - the number of codeword with a codeword length of 1 to 16 bits: JPEG codec base address + 0x500 +  $n * 0x80 + (\text{codeword length} - 1) * 0x4$ , in which *codeword length* = 1, 2, ..., 16.
  - the symbols corresponding to the decoded codeword: JPEG codec base address + 0x600 +  $n * 0x40 + \text{symbol number} * 0x4$ , in which *symbol number* = 0, 1, ..., 15.
  - the minimum codeword with a codeword length of 1 to 16 bits: JPEG codec base address + 0xF00 +  $n * 0x80 + (\text{codeword length} - 1) * 0x4$ , in which *codeword length* = 1, 2, ..., 16.

In this mode, since each piece of different type of information is written to a specific address, configuring each piece of information in sequence is not required.

- FIFO mode: all pieces of the same type of information used to establish the DC $n$  Huffman table must be written to the same address, respectively.
  - the number of codeword with a codeword length of 1 to 16 bits: `JPEG_DHT_TOTLEN_DC $n$ _REG`.
  - all symbols corresponding to the decoded codeword (DC table has up to 16 symbols): `JPEG_DHT_VAL_DC $n$ _REG`.
  - the minimum codeword with a codeword length of 1 to 16 bits: `JPEG_DHT_CODEMIN_DC $n$ _REG`.

In this mode, since all pieces of the same type of information are written to the same address, configuring each piece of same type of information one by one in sequence is required. Afterwards, the hardware will automatically store such information in sequence.

The configuration of AC $n$  ( $n = 0, 1$ ) tables is very similar to that of the DC $n$  ( $n = 0, 1$ ) tables. Here below is the configuration of AC $n$  ( $n = 0, 1$ ) tables:

- non-FIFO mode: each piece in different type of information used to establish the AC $n$  Huffman table must be written to a specific address.
  - the number of codeword with a codeword length of 1 to 16 bits: JPEG codec base address + 0x540 +  $n * 0x80 + (\text{codeword length} - 1) * 0x4$ , in which *codeword length* = 1, 2, ..., 16.
  - the symbols corresponding to the decoded codeword: JPEG codec base address + 0x680 +  $n * 0x400 + \text{symbol number} * 0x4$ , in which *symbol number* = 0, 1, ..., 256.
  - the minimum codeword with a codeword length of 1 to 16 bits: JPEG codec base address + 0xF40 +  $n * 0x80 + (\text{codeword length} - 1) * 0x4$ , in which *codeword length* = 1, 2, ..., 16.

In this mode, since each piece of different type of information is written to a specific address, configuring each piece of information in sequence is not required.

- FIFO mode: all pieces of the same type of information used to establish the AC $n$  Huffman table must be written to the same address, respectively.
  - the number of codeword with a codeword length of 1 to 16 bits: `JPEG_DHT_TOTLEN_AC $n$ _REG`.
  - all symbols corresponding to the decoded codeword (AC table has up to 256 symbols): `JPEG_DHT_VAL_AC $n$ _REG`.
  - the minimum codeword with a codeword length of 1 to 16 bits: `JPEG_DHT_CODEMIN_AC $n$ _REG`.

In this mode, since all pieces of the same type of information are written to the same address, configuring each piece of same type of information one by one in sequence is required. Afterwards, the hardware will automatically store such information in sequence.

For the minimum codeword with a codeword length of 1 to 16 bits, it should be moved left to the high bit of the 16-bit configuration data. If a codeword length does not exist, the configuration value is 0xFFFF. For example, if a minimum codeword is 0x7C, the 16-bit configuration data should be 0x7C00.

The JPEG baseline standard recommended DC and AC Huffman tables can be found in [ITU T.81 Recommendation](#).

The software can obtain the IDs of DC $n$  and AC $n$  Huffman tables by parsing the DHT segment in the Tables/Miscellaneous segment, then pass these ID to the corresponding register `JPEG_DC $n$ _DHT_ID` and `JPEG_AC $n$ _DHT_ID`.

The hardware will automatically use the DC $n$  and AC $n$  Huffman tables with the same ID from `JPEG_DC $n$ _DHT_ID` and `JPEG_AC $n$ _DHT_ID`.

### 31.5.2.5 Timeout Detection

Additionally, timeout detection is supported when the JPEG codec is working as a decoder. The hardware triggers the timeout interrupt `JPEG_DECODE_TIMEOUT_INT`:

- when the decoder stops reading the bitstream for more than  $(2^{JPEG\_DECODE\_TIMEOUT\_THRES} - 1)$  clock cycles,
- or when the number of clock cycles consumed for decoding an image exceeds the value of  $(2^{JPEG\_DECODE\_TIMEOUT\_THRES} - 1)$

In this case, the decoder will be reset depending on the configuration of `JPEG_DECODE_TIMEOUT_TASK_SEL`:

- 0: the hardware will not perform any operation, and the software is required to configure the `JPEG_SOFT_RST` or `JPEG_FSM_RST` to perform a reset operation.
- 1: the hardware will automatically reset the decoder to exit the timeout state and enter the initial state.

## 31.6 Interrupts

ESP32-P4's JPEG Codec can generate the `JPEG_INTR` interrupt signal that will be sent to the [Interrupt Matrix](#).

Interrupt signal JPEG\_INTR can be generated by the following internal interrupt sources:

- JPEG\_DONE\_INT: Triggered when a frame of image encoding or decoding ends.
- JPEG\_RLE\_PARALLEL\_ERR\_INT: Triggered when a run-length encoding error occurs.
- JPEG\_CID\_ERR\_INT: Triggered when the decoded component ID is different from the component ID configured by the software.
- JPEG\_C\_DHT\_DC\_ID\_ERR\_INT: Triggered when the decoded DC Huffman table ID of each component is not the software configured DCO Huffman table ID or DC1 Huffman table ID.
- JPEG\_C\_DHT\_AC\_ID\_ERR\_INT: Triggered when the decoded AC Huffman table ID of each component is not the software configured ACO Huffman table ID or AC1 Huffman table ID.
- JPEG\_C\_DQT\_ID\_ERR\_INT: Triggered when the decoded quantization table ID of each component is different from the software configured quantization table ID.
- JPEG\_RST\_UXP\_ERR\_INT: Triggered when the [JPEG\\_RESTART\\_INTERVAL](#) configured by the software is 0 but the RST marker is parsed by the decoder.
- JPEG\_RST\_CHECK\_NONE\_ERR\_INT: Triggered when the [JPEG\\_RESTART\\_INTERVAL](#) configured by the software is non-0 but the RST marker cannot be parsed by the decoder.
- JPEG\_RST\_CHECK\_POS\_ERR\_INT: Triggered when the MCU number between two parsed RST markers is not equal to the [JPEG\\_RESTART\\_INTERVAL](#) configured by the software.
- JPEG\_OUT\_EOF\_INT: Triggered when the EOF marker is read from the TX channel of 2D DMA.
- JPEG\_SR\_COLOR\_MODE\_ERR\_INT: This interrupt is invalid.
- JPEG\_DCT\_DONE\_INT: Triggered when the DCT or IDCT calculation of one data unit is completed.
- JPEG\_BS\_LAST\_BLOCK\_EOF\_INT: Triggered when the encoding of the last data unit is completed.
- JPEG\_SCAN\_CHECK\_NONE\_ERR\_INT: Triggered when an image frame has multiple scans to be decoded and the SOS marker is not parsed within ([JPEG\\_SOS\\_CHECK\\_BYTE\\_NUM](#) + 1) bytes in any scan header information.
- JPEG\_SCAN\_CHECK\_POS\_ERR\_INT: Triggered when the position of the scan header information parsed by the decoder is wrong.
- JPEG\_UXP\_DET\_INT: Triggered when the marker parsed by the decoder is not supported by the hardware.
- JPEG\_EN\_FRAME\_EOF\_ERR\_INT: Triggered when the number of data units to be encoded read from 2D DMA is less than the number of data units calculated based on the image resolution configured by the software.
- JPEG\_EN\_FRAME\_EOF\_LACK\_INT: Triggered when a frame of image to be encoded is completely read from 2D DMA but the EOF marker is not read.
- JPEG\_DE\_FRAME\_EOF\_ERR\_INT: Triggered when the number of data units obtained after decoding a frame of image is different from the number of data units calculated based on the image resolution configured by the software.
- JPEG\_DE\_FRAME\_EOF\_LACK\_INT: Triggered when the bitstream of a image is completely read from 2D DMA but the EOF marker or EOI marker is not read.

- **JPEG\_SOS\_UNMATCH\_ERR\_INT**: Triggered when the number of components in the scan header information parsed by the decoder is 0 or the header length in the scan header information parsed by the decoder does not match the actual header length.
- **JPEG\_MARKER\_ERR\_FST\_SCAN\_INT**: Triggered when there is an error in the first scan header information parsed by the decoder. The errors include errors triggering **JPEG\_CID\_ERR\_INT**, errors triggering **JPEG\_C\_DHT\_DC\_ID\_ERR\_INT**, errors triggering **JPEG\_C\_DHT\_AC\_ID\_ERR\_INT**, errors triggering **JPEG\_C\_DQT\_ID\_ERR\_INT** and errors triggering **JPEG\_SOS\_UNMATCH\_ERR\_INT**.
- **JPEG\_MARKER\_ERR\_OTHER\_SCAN\_INT**: Triggered when there is an error in the non-first scan header information parsed by the decoder. The error type is the same as the errors that trigger **JPEG\_MARKER\_ERR\_FST\_SCAN\_INT**.
- **JPEG\_UNDET\_INT**: Triggered when the bitstream of an image is completely read from 2D DMA but the SOS marker is not read.
- **JPEG\_DECODE\_TIMEOUT\_INT**: Triggered when the decoder is timeout. Section [31.7.2](#) describes how this interrupt will occur.

The above interrupt sources can only be triggered when the interrupt enable register *interrupt\_source\_name*\_ENA is set to 1. Write 1 to *interrupt\_source\_name*\_CLR will clear the interrupt.

**Note:**

For definitions of *interrupt*, *interrupt signal*, *interrupt source*, and their correlations, please refer to Chapter [11 Interrupt Matrix](#) > Section [11.2 Interrupt Terminology in ESP32-P4](#).

Each interrupt source can be configured by a common set of registers that are described in Section [Interrupt Configuration Registers](#). The specific registers can be found in Section [31.8 Register Summary](#).

## 31.7 Programming Procedures

### 31.7.1 JPEG Encoder

When the JPEG codec is working as an encoder, the configuration process is:

1. Activate the JPEG codec:
  - Set [HP\\_SYS\\_CLKRST\\_JPEG\\_SYS\\_CLK\\_EN](#) to 1 to enable the JPEG codec clock;
  - Set [HP\\_SYS\\_CLKRST\\_RST\\_EN\\_JPEG](#) to 0 to release the JPEG codec system level reset.
2. Configure the JPEG codec:
  - Set [JPEG\\_SOFT\\_RST](#) to 1 to reset the JPEG codec, and then set [JPEG\\_SOFT\\_RST](#) to 0 to release the JPEG codec reset.
  - Set [JPEG\\_MODE](#) to 0 to configure the JPEG codec to be used as an encoder.
  - Select the original image format by configuring the following two registers:
    - Format: [JPEG\\_COLOR\\_SPACE](#)
    - Pixel order: [JPEG\\_PIXEL\\_REV](#)

See details in Table 31.5-1.

- Select whether to add the EOI marker (0xFFD9) at the end of the bitstream by configuring [JPEG\\_TAILER\\_EN](#):
  - 0: disable
  - 1: enable
- Select the image format to be compressed by configuring [JPEG\\_SAMPLE\\_SEL](#):
  - 0: YUV444
  - 1: YUV422
  - 2: YUV420

Note that this register is valid only when the original image format is RGB. See details in Table 31.5-1.

- Configure [JPEG\\_HA](#) as the original image width and [JPEG\\_VA](#) as the original image height.
- Configure the quantization coefficient table by following the instructions in Section 31.5.1.3.

### 3. Configure 2D DMA (For detailed instructions or introduction to related concepts, please refer to Chapter 5 *2D-DMA Controller (2D-DMA)*.)

#### (a) Configure the linked list of 2D DMA TX channel.

- Set 2DEN to 1 to enable 2D function.
- Configure the Buffer address pointer as the starting address where the original image is stored.
- Configure pbyte to select the number of bytes of one pixel of the original image.
- Configure HA as the width of the original image and VA as the height of the original image.
- Configure hb as the number of pixels in the horizontal direction of an image block and vb as the number of pixels in the vertical direction of an image block.
- Configure mod as 1, which means continuous reading of image blocks of hb × vb size.
- Configure (X, Y) as the coordinate of the first pixel in the starting image block. Among them, according to the original image format and the format of the image to be compressed, there are restrictions on hb and vb, as shown in the table 31.7-1:

**Table 31.7-1. JPEG Encoder hb and vb Configuration**

| Format of Original Image | Format of the Image to be Compressed | hb              | vb              |
|--------------------------|--------------------------------------|-----------------|-----------------|
| RGB                      | YUV444                               | Multiples of 8  | Multiples of 8  |
| RGB                      | YUV422                               | Multiples of 16 | Multiples of 8  |
| RGB                      | YUV420                               | Multiples of 16 | Multiples of 16 |
| YUV422                   | YUV422                               | Multiples of 16 | Multiples of 8  |
| GRAY                     | GRAY                                 | Multiples of 8  | Multiples of 8  |

#### (b) Configure the linked list of the 2D DMA RX channel:

- Set 2DEN to 0 to enable 1D function.

- Configure the Buffer address pointer as the starting address where the encoded bitstream will be stored.
  - Configure size as the number of bytes in the space to store the encoded bitstream.
  - configure mod as 0, which means one-time reading of image blocks of  $hb \times vb$  size.
- (c) Connect 2D DMA channels to JPEG codec:
- Connect the TX channel  $n$  to the JPEG codec by configuring `DMA2D_OUT_PERI_SEL_CHn` to 0;
  - Connect the RX channel  $n$  to the JPEG codec by configuring `DMA2D_IN_PERI_SEL_CHn` to 0.
- (d) Reset 2D DMA channels:
- 2D DMA TX channel  $n$ : Set `DMA2D_OUT_RST_CHn` to 1 to reset 2D DMA TX channel  $n$ , then set `DMA2D_OUT_RST_CHn` to 0 to release the reset of 2D DMA TX channel  $n$ .
  - 2D DMA RX channel  $n$ : Set `DMA2D_IN_RST_CHn` to 1 to reset 2D DMA RX channel  $n$ , then set `DMA2D_IN_RST_CHn` to 0 to release the reset of 2D DMA RX channel  $n$ .
- (e) Select the burst length of 2D DMA channels:
- Configure `DMA2D_OUT_MEM_BURST_LENGTH_CHn` to select the burst length of 2D DMA TX channel  $n$ .
  - Configure `DMA2D_IN_MEM_BURST_LENGTH_CHn` to select the burst length of 2D DMA RX channel  $n$ .
- (f) Select the 2D DMA output image block size by configuring `DMA2D_OUT_MACRO_BLOCK_SIZE_CHn` according to the format of original image and the format of the image to be compressed. See details in Table 31.7-2:
- 0: 8x8
  - 1: 16x8
  - 2: 16x16

Table 31.7-2. `DMA2D_OUT_MACRO_BLOCK_SIZE_CHn` Configuration

| Format of Original Image | Format of the Image to be Compressed | <code>DMA2D_OUT_MACRO_BLOCK_SIZE_CHn</code> |
|--------------------------|--------------------------------------|---|
| RGB                      | YUV444                               | 0   |
| RGB                      | YUV422                               | 1   |
| RGB                      | YUV420                               | 2   |
| YUV422                   | YUV422                               | 1   |
| GRAY                     | GRAY                                 | 0   |

- (g) Enable the reorder function to improve bandwidth utilization by setting `DMA2D_OUT_REORDER_EN_CHO` to 1. Note that, this function is only available for 2D DMA TX channel0, not for any other TX channels.
- (h) Configure 2D DMA channel linked list address:
- 2D DMA TX channel: `DMA2D_OUTLINK_ADDR_CHn`
  - 2D DMA RX channel: `DMA2D_INLINK_ADDR_CHn`

4. Enable interrupt sources:
  - [DMA2D\\_OUT\\_INT\\_ENA\\_CH \$n\$ \\_REG](#)
  - [DMA2D\\_IN\\_INT\\_ENA\\_CH \$n\$ \\_REG](#)
  - [JPEG\\_INT\\_ENA\\_REG](#)
5. Start the transmission of 2D DMA channels:
  - 2D DMA TX channel: set [DMA2D\\_OUTLINK\\_START\\_CH \$n\$](#)  to 1 and then to 0
  - 2D DMA RX channel: set [DMA2D\\_INLINK\\_START\\_CH \$n\$](#)  to 1 and then to 0
6. Start the JPEG codec encoding by setting the [JPEG\\_JPEG\\_START](#) field.
7. Wait till [DMA2D\\_IN\\_SUC\\_EOF\\_CH \$n\$ \\_INT](#) becomes 1, indicating that the encoded bitstream has been completely written to the memory.

## 31.7.2 JPEG Decoder

When the JPEG codec is working as a decoder, the configuration process is:

1. Activate the JPEG codec:
  - Set [HP\\_SYS\\_CLKRST\\_JPEG\\_SYS\\_CLK\\_EN](#) to 1 to enable the JPEG codec clock
  - Set [HP\\_SYS\\_CLKRST\\_RST\\_EN\\_JPEG](#) to 0 to release the JPEG codec system level reset.
2. Configure the JPEG codec:
  - Set [JPEG\\_SOFT\\_RST](#) to 1 to reset the JPEG codec, and then set [JPEG\\_SOFT\\_RST](#) to 0 to release the JPEG codec reset.
  - Set [JPEG\\_MODE](#) to 1 to configure the JPEG codec to be used as a decoder.
  - Enable the RST marker check following the instructions in Section [31.5.2.2](#), if required.
  - Configure the quantization coefficient tables by following the instructions in Section [31.5.2.3](#).
  - Configure the Huffman tables by following the instructions in Section [31.5.2.4](#).
  - Configure the width and height of the decoded image:
    - Width: write width of the decoded image to [JPEG\\_HA](#).
    - Height: write the height of the decoded image to [JPEG\\_VA](#).
    - According to different decoded image formats, [JPEG\\_HA](#) and [JPEG\\_VA](#) must meet the requirements of Table [31.7-3](#).

**Table 31.7-3. JPEG Decoder [JPEG\\_HA](#) and [JPEG\\_VA](#) Configuration**

| Format of Decoded Image | <a href="#">JPEG_HA</a> | <a href="#">JPEG_VA</a> |
|-------------------------|-------------------------|-------------------------|
| YUV444                  | Multiples of 8          | Multiples of 8          |
| YUV422                  | Multiples of 16         | Multiples of 8          |
| YUV420                  | Multiples of 16         | Multiples of 16         |
| GRAY                    | Multiples of 8          | Multiples of 8          |

3. Configure 2D DMA (For detailed instructions or introduction to related concepts, please refer to Chapter [5 2D-DMA Controller \(2D-DMA\)](#).)

(a) Configure the linked list of the 2D DMA TX channel.

- Set 2DEN to 0 to enable the 1D function.
- Configure the Buffer address pointer as the starting address where the bitstream to be decoded is stored.
- Configure the length and size as the number of bytes in the space to store the bitstream to be decoded.
- configure mod as 0, which means one-time reading of image blocks of hb x vb size.

(b) Configure the linked list of 2D DMA RX channel.

- Set 2DEN to 1 to enable 2D function.
- Configure the Buffer address pointer as the starting address where the decoded image will be stored.
- Configure pbyte to select the number of bytes of one pixel of the image which is decoded and has undergone 2D DMA color space conversion.
- Configure HA as the width of the output decoded image, configure VA as the height of the output decoded image, configure hb as the number of pixels in the horizontal direction of an image block, configure vb as the number of pixels in the vertical direction of an image block.
- Configure mod as 1, which means continuous reading of image blocks of hb × vb size.
- Configure (X, Y) as the coordinates of the first pixel in the starting image block. Among them, according to the decoded image format, there are restrictions on hb and vb, as shown in the table [31.7-4](#):

**Table 31.7-4. JPEG Decoder hb and vb Configuration**

| Decoded image format | hb              | vb              |
|----------------------|-----------------|-----------------|
| YUV444               | Multiples of 8  | Multiples of 8  |
| YUV422               | Multiples of 16 | Multiples of 8  |
| YUV420               | Multiples of 16 | Multiples of 16 |
| GRAY                 | Multiples of 8  | Multiples of 8  |

(c) Connect 2D DMA channels to JPEG codec:

- Connect the TX channel *n* to the JPEG codec by configuring [DMA2D\\_OUT\\_PERI\\_SEL\\_CHn](#) to 0;
- Connect the RX channel *n* to the JPEG codec by configuring [DMA2D\\_IN\\_PERI\\_SEL\\_CHn](#) to 0.

(d) Reset 2D DMA channels:

- 2D DMA TX channel *n*: set [DMA2D\\_OUT\\_RST\\_CHn](#) to 1 to reset 2D DMA TX channel *n*, then set [DMA2D\\_OUT\\_RST\\_CHn](#) to 0 to release the reset of 2D DMA TX channel *n*.

- 2D DMA RX channel $n$ : set `DMA2D_IN_RST_CH $n$`  to 1 to reset 2D DMA RX channel $n$ , then set `DMA2D_IN_RST_CH $n$`  to 0 to release the reset of 2D DMA RX channel $n$ .
- (e) Select the burst length of 2D DMA channels:
- Configure `DMA2D_OUT_MEM_BURST_LENGTH_CH $n$`  to select the burst length of 2D DMA TX channel $n$
  - Configure `DMA2D_IN_MEM_BURST_LENGTH_CH $n$`  to select the burst length of 2D DMA RX channel $n$
- (f) Select 2D DMA receive image block size by configuring `DMA2D_IN_MACRO_BLOCK_SIZE_CH $n$`  according to the format of the decoded image. See details in Table 31.7-5:
- 0: 8x8
  - 1: 16x8
  - 2: 16x16

Table 31.7-5. `DMA2D_IN_MACRO_BLOCK_SIZE_CH $n$`  Configuration

| Format of Decoded Image | <code>DMA2D_IN_MACRO_BLOCK_SIZE_CH<math>n</math></code> |
|-------------------------|---|
| YUV444                  | 0   |
| YUV422                  | 1   |
| YUV420                  | 2   |
| GRAY                    | 0   |

- (g) Enable the reorder function to improve bandwidth utilization by setting set `DMA2D_IN_REORDER_EN_CHO` to 1. Note that, this function is only available for 2D DMA RX channel0, not for any other RX channels.
- (h) Select whether to scramble the pixel order of the decoded image before 2D DMA color space conversion by configuring `DMA2D_IN_SCRAMBLE_SEL_PRE_CHO`:
- 0: BYTE2-1-0
  - 1: BYTE2-0-1
  - 2: BYTE1-0-2
  - 3: BYTE1-2-0
  - 4: BYTE0-2-1
  - 5: BYTE0-1-2

Configuring `DMA2D_IN_SCRAMBLE_SEL_PRE_CHO` to 5 means swapping the pixel order, for example, swapping YUV444 output by the JPEG decoder to VUY444. Note that, this function is only available for 2D DMA RX channel0, not for any other RX channels.

- (i) Select the color conversion methods by configuring `DMA2D_IN_COLOR_INPUT_SEL_CHO`, `DMA2D_IN_COLOR_3B_PROC_EN_CHO`, and `DMA2D_IN_COLOR_OUTPUT_SEL_CHO`. See details in Table 31.7-6:

Table 31.7-6. 2D DMA Color Space Conversion Configuration

| Color Space Conversion Method         | INPUT_SEL_CHO | 3B_PROC_EN_CHO | OUTPUT_SEL_CHO |
|---------------------------------------|---------------|----------------|----------------|
| YUV420 → RGB                          | 0             | 1              | 1              |
| YUV422 → RGB                          | 0             | 1              | 1              |
| YUV444 → RGB                          | 2             | 1              | 1              |
| YUV444 (only reverse the pixel order) | 2             | 0              | 1              |
| No color space conversion             | 7             | N/A            | N/A            |

Note that, this function is only available for 2D DMA RX channel0, not for any other RX channels.

- (j) Configure parameters required for the color space conversion formula, including DMA2D\_IN\_COLOR\_PARAM\_H0\_CHO, DMA2D\_IN\_COLOR\_PARAM\_H1\_CHO, DMA2D\_IN\_COLOR\_PARAM\_M0\_CHO, DMA2D\_IN\_COLOR\_PARAM\_M1\_CHO, DMA2D\_IN\_COLOR\_PARAM\_LO\_CHO, and DMA2D\_IN\_COLOR\_PARAM\_L1\_CHO. Note that, this function is only available for 2D DMA RX channel0, not for any other RX channels.
- (k) Select whether to reverse the pixel order of the image after 2D DMA color space conversion by configuring DMA2D\_IN\_SCRAMBLE\_SEL\_POST\_CHO:
- 0: BYTE2-1-0
  - 1: BYTE2-0-1
  - 2: BYTE1-0-2
  - 3: BYTE1-2-0
  - 4: BYTE0-2-1
  - 5: BYTE0-1-2

Configuration of 5 means reversing the pixel order, for example, reversing the RGB after 2D DMA color space conversion to BGR. Note that, this function is only available for 2D DMA RX channel0, not for any other RX channels.

- (l) Configure [DMA2D\\_OUTLINK\\_ADDR\\_CHn](#) as the 2D DMA TX channel linked list address, configure [DMA2D\\_INLINK\\_ADDR\\_CHn](#) as the 2D DMA RX channel linked list address.

4. Enable interrupt sources:

- [DMA2D\\_OUT\\_INT\\_ENA\\_CHn\\_REG](#)
- [DMA2D\\_IN\\_INT\\_ENA\\_CHn\\_REG](#)
- [JPEG\\_INT\\_ENA\\_REG](#)

5. Start the transmission of 2D DMA channels:

- 2D DMA TX channeln: set [DMA2D\\_OUTLINK\\_START\\_CHn](#) to 1 and then to 0
- 2D DMA RX channeln: set [DMA2D\\_INLINK\\_START\\_CHn](#) to 1 and then to 0

6. Start JPEG codec decoding by setting the [JPEG\\_JPEG\\_START](#) field.

7. Wait till DMA2D\_IN\_SUC\_EOF\_CHn\_INT becomes 1, indicating that the decoded image has been completely written to the memory.

### 31.7.3 Reset

Users can **reset** JPEG codec entirely or partially, depending on the actual scenarios, at any time during the encoding or decoding process:

- The entire JPEG codec, including all the RAMs and FIFOs as well as all the state machines: set [JPEG\\_SOFT\\_RST](#) to 1. In this case, the register configuration value will not be reset.
- Only all the RAMs and FIFOs inside the JPEG codec, for example, changing the quantization coefficient tables or Huffman tables: set [JPEG\\_FIFO\\_RST](#) to 1.
- Only all the state machines inside the JPEG codec, for example, only stop the current encoding or decoding process: set [JPEG\\_FSM\\_RST](#) to 1.

## 31.8 Register Summary

The addresses in this section are relative to JPEG Codec base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

The abbreviations given in Column **Access** are explained in Section *Access Types for Registers*.

| Name                                       | Description   | Address | Access   |
|--|---|---------|----------|
| <b>Control and Configuration registers</b> |   |         |          |
| JPEG_CONFIG_REG                            | System level control and configuration register     | 0x0000  | varies   |
| JPEG_DQT_INFO_REG                          | Quantization coefficient table information register | 0x0004  | R/W      |
| JPEG_PIC_SIZE_REG                          | Image size register                                 | 0x0008  | R/W      |
| JPEG_TOQNR_REG                             | Quantization coefficient table0 register            | 0x0010  | HRO      |
| JPEG_T1QNR_REG                             | Quantization coefficient table1 register            | 0x0014  | HRO      |
| JPEG_T2QNR_REG                             | Quantization coefficient table2 register            | 0x0018  | HRO      |
| JPEG_T3QNR_REG                             | Quantization coefficient table3 register            | 0x001C  | HRO      |
| JPEG_DECODE_CONF_REG                       | Decoder configuration register                      | 0x0020  | varies   |
| JPEG_CO_REG                                | Color component0 register                           | 0x0024  | R/W      |
| JPEG_C1_REG                                | Color component1 register                           | 0x0028  | R/W      |
| JPEG_C2_REG                                | Color component2 register                           | 0x002C  | R/W      |
| JPEG_C3_REG                                | Color component3 register                           | 0x0030  | R/W      |
| JPEG_DHT_INFO_REG                          | Huffman table information register                  | 0x0034  | R/W      |
| JPEG_DHT_TOTLEN_DCO_REG                    | DC0 Huffman table codeword length register          | 0x0058  | HRO      |
| JPEG_DHT_VAI_DCO_REG                       | DC0 Huffman table symbol register                   | 0x005C  | HRO      |
| JPEG_DHT_TOTLEN_ACO_REG                    | AC0 Huffman table codeword length register          | 0x0060  | HRO      |
| JPEG_DHT_VAI_ACO_REG                       | AC0 Huffman table symbol register                   | 0x0064  | HRO      |
| JPEG_DHT_TOTLEN_DC1_REG                    | DC1 Huffman table codeword length register          | 0x0068  | HRO      |
| JPEG_DHT_VAI_DC1_REG                       | DC1 Huffman table symbol register                   | 0x006C  | HRO      |
| JPEG_DHT_TOTLEN_AC1_REG                    | AC1 Huffman table codeword length register          | 0x0070  | HRO      |
| JPEG_DHT_VAI_AC1_REG                       | AC1 Huffman table symbol register                   | 0x0074  | HRO      |
| JPEG_DHT_CODEMIN_DCO_REG                   | DC0 Huffman table minimum codeword register         | 0x0078  | HRO      |
| JPEG_DHT_CODEMIN_ACO_REG                   | AC0 Huffman table minimum codeword register         | 0x007C  | HRO      |
| JPEG_DHT_CODEMIN_DC1_REG                   | DC1 Huffman table minimum codeword register         | 0x0080  | HRO      |
| JPEG_DHT_CODEMIN_AC1_REG                   | AC1 Huffman table minimum codeword register         | 0x0084  | HRO      |
| JPEG_SYS_REG                               | System configuration register                       | 0x00F8  | R/W      |
| <b>Interrupt registers</b>                 |   |         |          |
| JPEG_INT_RAW_REG                           | Interrupt raw status register                       | 0x0038  | R/WTC/SS |
| JPEG_INT_ENA_REG                           | Interrupt enable register                           | 0x003C  | R/W      |
| JPEG_INT_ST_REG                            | Interrupt masked status register                    | 0x0040  | RO       |
| JPEG_INT_CLR_REG                           | Interrupt clear register                            | 0x0044  | WT       |
| <b>Version Register</b>                    |   |         |          |
| JPEG_VERSION_REG                           | Version control register                            | 0x00FC  | R/W      |

## 31.9 Registers

The addresses in this section are relative to the JPEG Codec base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

For how to program reserved fields, please refer to Section [Programming Reserved Register Field](#).

### Register 31.1. JPEG CONFIG REG (0x0000)

| JPEG_MODE<br>(reserved) |    |    |    |    |    |    |    |    |    |  |  |  |  |  |  |  |    |    |    |    |    |    |    |   |   |   |   | JPEG_PAUSE_EN |   | JPEG_TAILER_EN |   | JPEG_PIXEL_REV |   | JPEG_FIFO_RST |  | JPEG_SOFT_RST |  | JPEG_DECODE_TIMEOUT_TASK_SEL |  | JPEG_DECODE_TIMEOUT_THRES |  | JPEG_MEM_OCLK_FORCE_ON |  | JPEG_DHT_FIFO_EN |  | JPEG_COLOR_SPACE |  | JPEG_CNTR_TBL_SEL |  | JPEG_LQNR_TBL_SEL |  | JPEG_GNR_FIFO_EN |  | JPEG_DEBUG_DIRECT_OUT_EN |  | JPEG_DMA_LINKLIST_MODE |  | JPEG_SAMPLE_SEL |  | JPEG_FF_CHECK_EN |  | JPEG_GNR_PRESTION |  | JPEG_JPEG_START |  | JPEG_FSM_RST |  |
|-------------------------|----|----|----|----|----|----|----|----|----|--|--|--|--|--|--|--|----|----|----|----|----|----|----|---|---|---|---|---------------|---|----------------|---|----------------|---|---------------|--|---------------|--|------------------------------|--|---------------------------|--|------------------------|--|------------------|--|------------------|--|-------------------|--|-------------------|--|------------------|--|--------------------------|--|------------------------|--|-----------------|--|------------------|--|-------------------|--|-----------------|--|--------------|--|
| 31                      | 30 | 29 | 28 | 27 | 26 | 25 | 24 | 23 | 17 |  |  |  |  |  |  |  | 16 | 15 | 14 | 13 | 12 | 11 | 10 | 9 | 8 | 7 | 6 | 5             | 4 | 3              | 2 | 1              | 0 |               |  |               |  |                              |  |                           |  |                        |  |                  |  |                  |  |                   |  |                   |  |                  |  |                          |  |                        |  |                 |  |                  |  |                   |  |                 |  |              |  |
| 0                       | 00 | 0  | 0  | 0  | 0  | 0  | 0  | 0  | 32 |  |  |  |  |  |  |  | 0  | 1  | 0  | 1  | 0  | 0  | 1  | 0 | 1 | 1 | 1 | 1             | 1 | 0              | 0 | 0              | 0 | Reset         |  |               |  |                              |  |                           |  |                        |  |                  |  |                  |  |                   |  |                   |  |                  |  |                          |  |                        |  |                 |  |                  |  |                   |  |                 |  |              |  |

**JPEG\_FSM\_RST** Configures whether or not to reset the state machine of JPEG Codec.

0: Invalid. No effect

1: Reset the state machine

(WT)

**JPEG\_JPEG\_START** Configures whether or not to start compressing a new image.

0: Invalid. No effect

1: Start compressing a new image

(WT)

**JPEG\_QNR\_PRECISION** Configures the quantization coefficient table precision for the encoder.

0: 8-bit precision

1: 16-bit precision

(R/W)

**JPEG\_FF\_CHECK\_EN** Configures whether or not to add “0x00” after “0xFF”.

0: Not add

1: Add

(R/W)

**JPEG\_SAMPLE\_SEL** Configures the format of the image to be compressed.

O: YUV444

1: YUV422

2: YUV420

3: Invalid. No effect

(R/W)

Continued on the next page...

**Register 31.1. JPEG\_CONFIG\_REG (0x0000)**

Continued from the previous page...

**JPEG\_DMA\_LINKLIST\_MODE** Represents 2D DMA linked list mode.

0: Invalid. No effect

1: 2D DMA uses linked lists to configure

(RO)

**JPEG\_DEBUG\_DIRECT\_OUT\_EN** Configures whether or not to enable debug mode for encoder.

0: Disable debug mode, the encoder will work in normal mode

1: Enable debug mode, the input image will be directly output by the encoder

(R/W)

**JPEG\_QNR\_FIFO\_EN** Configures whether or not to enable FIFO mode when configuring quantization coefficient tables.

0: Disable. Use non-FIFO mode

1: Enable

(R/W)

**JPEG\_LQNR\_TBL\_SEL** Configures the luminance quantization table ID for the encoder. (R/W)

**JPEG\_CQNR\_TBL\_SEL** Configures the chrominance quantization table ID for the encoder. (R/W)

**JPEG\_COLOR\_SPACE** Configures the original image's color space.

0: RGB888

1: YUV422

2: RGB565

3: GRAY

(R/W)

**JPEG\_DHT\_FIFO\_EN** Configures whether or not to enable FIFO mode when configuring Huffman tables.

0: Disable. Use non-FIFO mode

1: Enable

Note that to read Huffman tables only non-FIFO mode is supported.

(R/W)

**JPEG\_MEM\_CLK\_FORCE\_ON** Configures whether or not to force on memory's clock gate.

0: Not force on

1: Force on

(R/W)

**JPEG\_DECODE\_TIMEOUT\_THRES** Configures decode timeout period to trigger [JPEG\\_DECODE\\_TIMEOUT\\_INT\\_RAW](#). The clock cycles of timeout period =  $2^{JPEG\_DECODE\_TIMEOUT\_THRES} - 1$ . (R/W)

Continued on the next page...

**Register 31.1. JPEG\_CONFIG\_REG (0x0000)**

Continued from the previous page...

**JPEG\_DECODE\_TIMEOUT\_TASK\_SEL** Configures the reset mode upon the decoder timeout.

0: Software uses reset to abort the decoding process

1: Hardware automatically aborts decoding process

(R/W)

**JPEG\_SOFT\_RST** Configures whether or not to apply soft reset to the JPEG Codec.

0: Release the soft reset

1: Apply soft reset to the JPEG Codec (the register configuration value will not be reset)

(R/W)

**JPEG\_FIFO\_RST** Configures whether or not to apply FIFO reset to the JPEG Codec.

0: Release the FIFO reset

1: Apply FIFO reset to the JPEG Codec

(R/W)

**JPEG\_PIXEL\_REV** Configures whether or not to reverse the original image's pixel order.

0: Not reverse

1: Reverse

(R/W)

**JPEG\_TAILER\_EN** Configures whether or not to add EOI marker "0xFFD9" at the end of bitstream.

0: Not add

1: Add

(R/W)

**JPEG\_PAUSE\_EN** Configures whether or not to pause the JPEG Codec.

0: Not pause

1: Pause

(R/W)

**JPEG\_MODE** Configures if the JPEG Codec is working as an encoder or a decoder.

0: Encoder

1: Decoder

(R/W)

Register 31.2. JPEG\_DQT\_INFO\_REG (0x0004)

|                  |    |    |    |    |   |   |   |
|------------------|----|----|----|----|---|---|---|
| JPEG_T3_DQT_INFO |    |    |    |    |   |   |   |
| JPEG_T2_DQT_INFO |    |    |    |    |   |   |   |
| JPEG_T1_DQT_INFO |    |    |    |    |   |   |   |
| JPEG_T0_DQT_INFO |    |    |    |    |   |   |   |
| 31               | 24 | 23 | 16 | 15 | 8 | 7 | 0 |
| 3                |    | 2  |    | 1  |   | 0 |   |
| Reset            |    |    |    |    |   |   |   |

**JPEG\_T0\_DQT\_INFO** Configures quantization coefficient table0's precision and ID for decoder.

Bit[7:4]: Configures precision

Bit[3:0]: Configures ID

(R/W)

**JPEG\_T1\_DQT\_INFO** Configures quantization coefficient table1's precision and ID for decoder. See details in [JPEG\\_T0\\_DQT\\_INFO](#). (R/W)

**JPEG\_T2\_DQT\_INFO** Configures quantization coefficient table2's precision and ID for decoder. See details in [JPEG\\_T0\\_DQT\\_INFO](#). (R/W)

**JPEG\_T3\_DQT\_INFO** Configures quantization coefficient table3's precision and ID for decoder. See details in [JPEG\\_T0\\_DQT\\_INFO](#). (R/W)

Register 31.3. JPEG\_PIC\_SIZE\_REG (0x0008)

|         |  |  |  |  |  |  |  |     |  |  |  |  |  |  |       |
|---------|--|--|--|--|--|--|--|-----|--|--|--|--|--|--|-------|
| JPEG_HA |  |  |  |  |  |  |  |     |  |  |  |  |  |  |       |
| JPEG_VA |  |  |  |  |  |  |  |     |  |  |  |  |  |  |       |
| 31      |  |  |  |  |  |  |  |     |  |  |  |  |  |  | 0     |
| 640     |  |  |  |  |  |  |  | 480 |  |  |  |  |  |  |       |
|         |  |  |  |  |  |  |  |     |  |  |  |  |  |  | Reset |

**JPEG\_VA** Configures the image's height.

When JPEG Codec works as an encoder, the maximum configurable bits is 14.

When JPEG Codec works as a decoder, the maximum configurable bits is 16.

(R/W)

**JPEG\_HA** Configures the image's width.

When JPEG Codec works as an encoder, the maximum configurable bits is 14.

When JPEG Codec works as a decoder, the maximum configurable bits is 16.

(R/W)

**Register 31.4. JPEG\_T0QNR\_REG (0x0010)**

**JPEG\_TO\_QNR\_VAL** Configures the quantization coefficients of the quantization table 0 in FIFO mode. (HRO)

**Register 31.5. JPEG\_T1QNR\_REG (0x0014)**

**JPEG\_T1\_QNR\_VAL** Configures the quantization coefficients of the quantization table 1 in FIFO mode. (HRO)

**Register 31.6. JPEG\_T2QNR\_REG (0x0018)**

**JPEG\_T2\_QNR\_VAL** Configures the quantization coefficients of the quantization table 2 in FIFO mode. (HRO)

### Register 31.7. JPEG\_T3QNR\_REG (0x001C)

Diagram of the `JPEG_T3_QNR_VAL` register. The register is 32 bits wide, with bit 31 on the left and bit 0 on the right. The value `0x000000` is shown in the lower 24 bits, and the label "Reset" is at the bottom right.

**JPEG\_T3\_QNR\_VAL** Configures the quantization coefficients of the quantization table 3 in FIFO mode. (HRO)

### Register 31.8. JPEG\_DECODE\_CONF\_REG (0x0020)

|    |    |    |    |    |    |    |    |    |    |      |       |
|----|----|----|----|----|----|----|----|----|----|------|-------|
| 31 | 30 | 29 | 28 | 27 | 26 | 25 | 24 | 23 | 16 | 15   | 0     |
| 0  | 1  | 0  | 3  | 3  | 1  | 3  |    |    |    | 0x00 | Reset |

**JPEG\_RESTART\_INTERVAL** Configures the RST interval in DRI segment when decoding. (R/W)

**JPEG\_COMPONENT\_NUM** Configures the number of chrominance components in the image when decoding. (R/W)

**JPEG\_SW\_DHT\_EN** Represents the Huffman table configured by the software for the decoder. The value is always 1. (RO)

**JPEG\_SOS\_CHECK\_BYTE\_NUM** Configures the byte number to check the next SOS marker in the multi-scan image after one scan is decoded down. The actual check number is `JPEG SOS CHECK BYTE NUM + 1 (R/W)`

**JPEG\_RST\_CHECK\_BYTE\_NUM** Configures the byte number to check the next RST marker after one RST interval is decoded down. The actual check number is **JPEG\_RST\_CHECK\_BYTE\_NUM** + 1. (R/W)

**JPEG\_MULTI\_SCAN\_ERR\_CHECK** Reserved for decoder and should not be configured. (R/W)

**JPEG\_DEZIGZAG\_READY\_CTL** Reserved for decoder and should not be configured. (R/W)

**Register 31.9. JPEG\_CO\_REG (0x0024)**

Reset

**JPEG\_CO\_DQT\_TBL\_SEL** Configures the selected quantization coefficient table ID for component0 in decoder mode. (R/W)

**JPEG\_CO\_Y\_FACTOR** Configures the vertical sampling factor of component0 in decoder mode. (R/W)

**JPEG\_CO\_X\_FACTOR** Configures the horizontal sampling factor of component0 in decoder mode. (R/W)

**JPEG\_CO\_ID** Configures the ID of component0 in decoder mode. (R/W)

**Register 31.10. JPEG\_C1\_REG (0x0028)**

**JPEG\_DCO\_DHT\_ID** Configures the ID of DCO Huffman table in decoder mode. (R/W)

**JPEG DC1 DHT ID** Configures the ID of DC1 Huffman table in decoder mode. (R/W)

**JPEG\_ACO\_DHT\_ID** Configures the ID of ACO Huffman table in decoder mode. (R/W)

**JPEG\_AC1\_DHT\_ID** Configures the ID of AC1 Huffman table in decoder mode. (R/W)

### Register 31.14. JPEG INT RAW REG (0x0038)

[illegible]

JPEG DONE INT RAW The raw status of JPEG DONE INT. (R/WTC/SS)

**JPEG\_RLE\_PARALLEL\_ERR\_INT\_RAW** The raw status of JPEG\_RLE\_PARALLEL\_ERR\_INT.  
(R/WTC/SS)

**JPEG CID ERR INT RAW** The raw status of JPEG CID ERR INT. (R/WTC/SS)

**JPEG\_C\_DHT\_DC\_ID\_ERR\_INT\_RAW** The raw status of JPEG\_C\_DHT\_DC\_ID\_ERR\_INT.  
(R/WTC/SS)

**JPEG C DHT AC ID ERR INT RAW** The raw status of JPEG C DHT AC ID ERR INT. (R/WTC/SS)

**JPEG C DQT ID ERR INT RAW** The raw status of JPEG C DQT ID ERR INT. (R/WTC/SS)

**JPEG RST UXP ERR INT RAW** The raw status of JPEG RST UXP ERR INT. (R/WTC/SS)

**JPEG\_RST\_CHECK\_NONE\_ERR\_INT\_RAW** The raw status of JPEG\_RST\_CHECK\_NONE\_ERR\_INT.  
(R/WTC/SS)

Continued on the next page...

**Register 31.14. JPEG\_INT\_RAW\_REG (0x0038)**

Continued from the previous page...

**JPEG\_RST\_CHECK\_POS\_ERR\_INT\_RAW** The raw status of JPEG\_RST\_CHECK\_POS\_ERR\_INT.  
(R/WTC/SS)

**JPEG\_OUT\_EOF\_INT\_RAW** The raw status of JPEG\_OUT\_EOF\_INT. (R/WTC/SS)

**JPEG\_SR\_COLOR\_MODE\_ERR\_INT\_RAW** The raw status of JPEG\_SR\_COLOR\_MODE\_ERR\_INT.  
This interrupt is invalid. (R/WTC/SS)

**JPEG\_DCT\_DONE\_INT\_RAW** The raw status of JPEG\_DCT\_DONE\_INT. (R/WTC/SS)

**JPEG\_BS\_LAST\_BLOCK\_EOF\_INT\_RAW** The raw status of JPEG\_BS\_LAST\_BLOCK\_EOF\_INT.  
(R/WTC/SS)

**JPEG\_SCAN\_CHECK\_NONE\_ERR\_INT\_RAW** The raw status of JPEG\_SCAN\_CHECK\_NONE\_ERR\_INT.  
(R/WTC/SS)

**JPEG\_SCAN\_CHECK\_POS\_ERR\_INT\_RAW** The raw status of JPEG\_SCAN\_CHECK\_POS\_ERR\_INT.  
(R/WTC/SS)

**JPEG\_UXP\_DET\_INT\_RAW** The raw status of JPEG\_UXP\_DET\_INT. (R/WTC/SS)

**JPEG\_EN\_FRAME\_EOF\_ERR\_INT\_RAW** The raw status of JPEG\_EN\_FRAME\_EOF\_ERR\_INT.  
(R/WTC/SS)

**JPEG\_EN\_FRAME\_EOF\_LACK\_INT\_RAW** The raw status of JPEG\_EN\_FRAME\_EOF\_LACK\_INT.  
(R/WTC/SS)

**JPEG\_DE\_FRAME\_EOF\_ERR\_INT\_RAW** The raw status of JPEG\_DE\_FRAME\_EOF\_ERR\_INT.  
(R/WTC/SS)

**JPEG\_DE\_FRAME\_EOF\_LACK\_INT\_RAW** The raw status of JPEG\_DE\_FRAME\_EOF\_LACK\_INT.  
(R/WTC/SS)

**JPEG\_SOS\_UNMATCH\_ERR\_INT\_RAW** The raw status of JPEG\_SOS\_UNMATCH\_ERR\_INT.  
(R/WTC/SS)

**JPEG\_MARKER\_ERR\_FST\_SCAN\_INT\_RAW** The raw status of JPEG\_MARKER\_ERR\_FST\_SCAN\_INT.  
(R/WTC/SS)

**JPEG\_MARKER\_ERR\_OTHER\_SCAN\_INT\_RAW** The raw status of JPEG\_MARKER\_ERR\_OTHER\_SCAN\_INT.  
(R/WTC/SS)

**JPEG\_UNDET\_INT\_RAW** The raw status of JPEG\_UNDET\_INT. (R/WTC/SS)

**JPEG\_DECODE\_TIMEOUT\_INT\_RAW** The raw status of JPEG\_DECODE\_TIMEOUT\_INT. (R/WTC/SS)

### Register 31.15. JPEG\_INT\_ENA\_REG (0x003C)

[illegible]

**JPEG DONE INT ENA** Write 1 to enable JPEG DONE INT ENA. (R/W)

**JPEG RLE PARALLEL ERR INT ENA** Write 1 to enable JPEG RLE PARALLEL ERR INT. (R/W)

**JPEG CID ERR INT ENA** Write 1 to enable JPEG CID ERR INT. (R/W)

**JPEG\_C\_DHT\_DC\_ID\_ERR\_INT\_ENA** Write 1 to enable JPEG\_C\_DHT\_DC\_ID\_ERR\_INT. (R/W)

**JPEG C DHT AC ID ERR INT ENA** Write 1 to enable JPEG C DHT AC ID ERR INT. (R/W)

**JPEG\_C\_DQT\_ID\_ERR\_INT\_ENA** Write 1 to enable JPEG\_C\_DQT\_ID\_ERR\_INT. (R/W)

**JPEG\_RST\_UXP\_ERR\_INT\_ENA** Write 1 to enable JPEG\_RST\_UXP\_ERR\_INT. (R/W)

**JPEG\_RST\_CHECK\_NONE\_ERR\_INT\_ENA** Write 1 to enable JPEG\_RST\_CHECK\_NONE\_ERR\_INT.  
(R/W)

**JPEG\_RST\_CHECK\_POS\_ERR\_INT\_ENA** Write 1 to enable JPEG\_RST\_CHECK\_POS\_ERR\_INT. (R/W)

**JPEG\_OUT\_EOF\_INT\_ENA** Write 1 to enable JPEG\_OUT\_EOF\_INT. (R/W)

**JPEG\_SR\_COLOR\_MODE\_ERR\_INT\_ENA** Write 1 to enable JPEG\_SR\_COLOR\_MODE\_ERR\_INT.  
(R/W)

**JPEG DCT DONE INT ENA** Write 1 to enable JPEG DCT DONE INT. (R/W)

**JPEG\_BS\_LAST\_BLOCK\_EOF\_INT\_ENA** Write 1 to enable JPEG\_BS\_LAST\_BLOCK\_EOF\_INT. (R/W)

**JPEG\_SCAN\_CHECK\_NONE\_ERR\_INT\_ENA** Write 1 to enable JPEG\_SCAN\_CHECK\_NONE\_ERR\_INT.  
(R/W)

**JPEG\_SCAN\_CHECK\_POS\_ERR\_INT\_ENA** Write 1 to enable JPEG\_SCAN\_CHECK\_POS\_ERR\_INT.  
(R/W)

**JPEG UXP DET INT ENA** Write 1 to enable JPEG UXP DET INT. (R/W)

Continued on the next page...

**Register 31.15. JPEG\_INT\_ENA\_REG (0x003C)**

Continued from the previous page...

**JPEG\_EN\_FRAME\_EOF\_ERR\_INT\_ENA** Write 1 to enable JPEG\_EN\_FRAME\_EOF\_ERR\_INT. (R/W)

**JPEG\_EN\_FRAME\_EOF\_LACK\_INT\_ENA** Write 1 to enable JPEG\_EN\_FRAME\_EOF\_LACK\_INT.  
(R/W)

**JPEG\_DE\_FRAME\_EOF\_ERR\_INT\_ENA** Write 1 to enable JPEG\_DE\_FRAME\_EOF\_ERR\_INT. (R/W)

**JPEG\_DE\_FRAME\_EOF\_LACK\_INT\_ENA** Write 1 to enable JPEG\_DE\_FRAME\_EOF\_LACK\_INT.  
(R/W)

**JPEG\_SOS\_UNMATCH\_ERR\_INT\_ENA** Write 1 to enable JPEG\_SOS\_UNMATCH\_ERR\_INT. (R/W)

**JPEG\_MARKER\_ERR\_FST\_SCAN\_INT\_ENA** Write 1 to enable JPEG\_MARKER\_ERR\_FST\_SCAN\_INT.  
(R/W)

**JPEG\_MARKER\_ERR\_OTHER\_SCAN\_INT\_ENA** Write 1 to enable JPEG\_MARKER\_ERR\_OTHER\_SCAN\_INT.  
(R/W)

**JPEG\_UNDET\_INT\_ENA** Write 1 to enable JPEG\_UNDET\_INT. (R/W)

**JPEG\_DECODE\_TIMEOUT\_INT\_ENA** Write 1 to enable JPEG\_DECODE\_TIMEOUT\_INT. (R/W)

Register 31.16. JPEG\_INT\_ST\_REG (0x0040)

## Chapter 32

# Image Signal Processor (ISP)

## 32.1 Introduction

ESP32-P4 includes an image signal processor (ISP), which is a pipeline composed of various image processing algorithms.

ISP reads image data from the DVP or MIPI-CSI camera interface, or from the system memory directly, and writes the processed image data to the system memory through VDMA.

The SoC architecture of ISP is shown in Figure 32.1-1. ISP must work with other modules to read and write data and can not work alone.

- When outputting images, ISP uses CSI\_Bridge to convert data to AXI interface and stores the images to system memory through the VDMA controller. For more information about VDMA, see Chapter 4 [VDMA Controller \(VDMA\)](#)
- When the input image comes from the system memory, ISP must acquire the image data through VDMA
- When the input image comes from the MIPI-CSI camera interface, ISP must acquire the image data through CSI HOST. For details, see Chapter 35 [MIPI CSI](#)
- When the input image comes from the DVP camera interface, ISP acquire the image data through the DVP IO. For details, see Chapter 8 [GPIO Matrix and IO MUX](#)

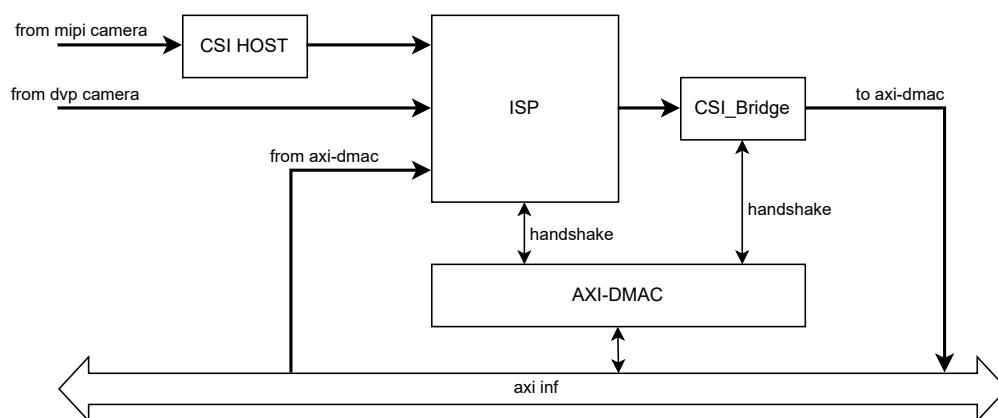

Figure 32.1-1. ESP32-P4 ISP Architecture

## 32.2 Terminology

**MIPI-CSI** Camera serial interface, a high-speed serial interface for cameras complaint with MIPI specifications  
**Image Interface** Image data interface, the output interface of CSI HOST

|            |   |
|------------|---|
|            | Classified into Image Interface 32 and Image Interface 64 based on bit width  |
| <b>DVP</b> | Digital video parallel interface, generally composed of vsync, hsync, de, and data signals  |
| <b>RAW</b> | Unprocessed data directly output from an image sensor, typically divided into R, Gr, Gb, and B channels<br>Classified into RAW8, RAW10, RAW12, etc., based on bit width |
| <b>RGB</b> | Colored image format composed of red, green, and blue colors<br>Classified into RGB888, RGB565, etc., based on the bit width of each color                              |
| <b>YUV</b> | Colored image format composed of luminance and chrominance<br>Classified into YUV444, YUV422, YUV420, etc., based on the data arrangement                               |

## 32.3 Feature List

ISP supports the following features:

- maximum resolution: 1920 x 1080
- three input channels: MIPI-CSI, DVP, and VDMA
- input formats: RAW8, RAW10, and RAW12
- output formats: RAW8, RGB888, RGB565, YUV422, and YUV420
- pipeline features:
  - Bayer filter (BF)
  - Lens shading correction (LSC)
  - Demosaic
  - Color correction matrix (CCM)
  - Gamma correction
  - RGB2YUV
  - Sharpen
  - Contrast/hue/saturation/luminance adjustment (COLOR)
  - YUV\_limit
  - YUV2RGB
  - Automatic exposure statistics (AE)
  - Automatic focus statistics (AF)
  - Automatic white balance statistics (AWB)
  - Histogram statistics (HIST)

## 32.4 Architectural Overview

ISP architecture is shown in Figure 32.4-1, consisting of ISP\_Header, ISP\_Pipeline, ISP\_Tail, and CSI\_Bridge.

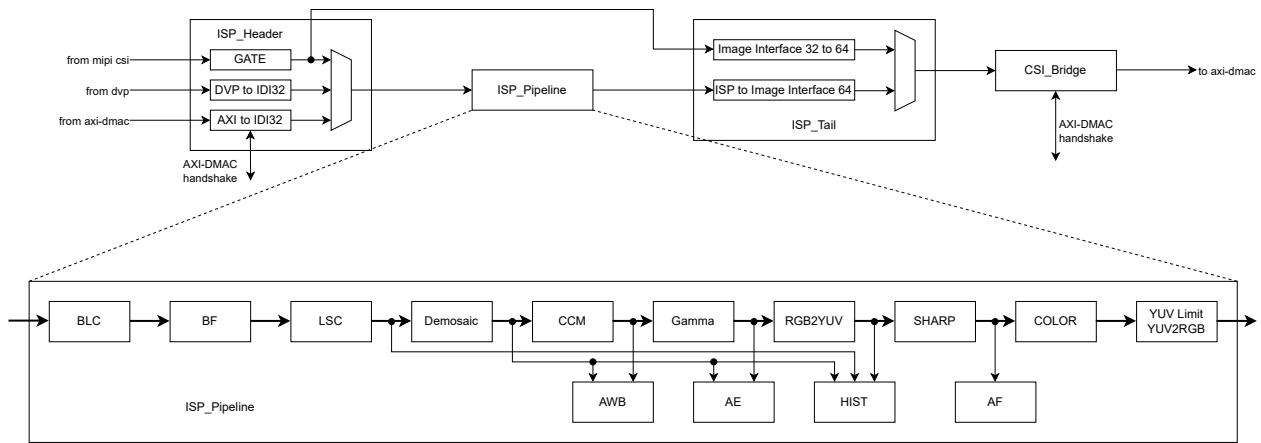

Figure 32.4-1. ISP Architecture

- ISP\_Header selects data from various input sources based on the configuration and buffers it. Then it transmits the buffered data to ISP\_Pipeline in a standardized format.
- ISP\_Pipeline serves as the core module of the ISP, containing all the algorithms for image processing.
- ISP\_Tail has two input sources, MIPI-CSI and ISP\_Pipeline. When ISP is disabled, Image Interface 32 data from MIPI-CSI is converted into Image Interface 64 format by ISP\_Tail and transmitted to CSI\_Bridge. When ISP is enabled, the output of ISP\_Pipeline is cropped and converted into Image Interface 64 format by ISP\_Tail, and then transmitted to CSI\_Bridge.
- As the output of the ISP, CSI\_Bridge transmits the images from ISP to the system memory through VDMA.

## 32.5 Functional Description

### 32.5.1 ISP\_Header

ISP\_Header serves as the input of ISP. The main features are:

- Select image data as input source based on the configuration of [ISP\\_IN\\_SRC](#)
- Buffer image data, and convert images to the format required by ISP\_Pipeline based on the configured type and size of image data
  - When MIPI-CSI is the input, set the input type via [ISP\\_DATA\\_TYPE](#)
  - When DVP is the input, set [ISP\\_DATA\\_TYPE](#) to 0, then set the data type via [ISP\\_CAM\\_DATA\\_TYPE](#)
  - When VDMA is the input, set the input type via [ISP\\_DATA\\_TYPE](#), and configure [ISP\\_DMA\\_DATA\\_TYPE](#) accordingly

### 32.5.2 ISP\_Pipeline

ISP\_Pipeline is the core of ISP, housing all the image processing algorithms. Each algorithm module can be enabled or disabled via the corresponding bit of [ISP\\_CNTL\\_REG](#). Except for modules related to color space conversion (demosaic, RGB2YUV, and YUV2RGB), other modules can be enabled or disabled dynamically without the need to shut down the ISP for reconfiguration. Moreover, once enabled, each algorithm module

generates an end-of-frame interrupt, capable of triggering an interrupt after processing each image frame.

### 32.5.2.1 Bayer Filter (BF)

This module is designed for denoising input images in the Bayer domain. The denoising strength can be adjusted using [ISP\\_SIGMA](#), and the denoising template can be fine-tuned using [ISP\\_GAU\\_TEMPLATE<sub>xx</sub>](#).

### 32.5.2.2 Lens Shading Correction (LSC)

This module is utilized for lens shading correction in the Bayer domain. It corrects the R, Gr, Gb, and B channels independently by dividing each channel into a 32 x 32 grid (equivalent to a 64 x 64 division for the entire image) and stores the correction coefficients for each channel in a lookup table (LUT).

Before using this module, calibration is necessary to obtain the LUT correction coefficients. Specifically, first we capture a white image in a scene with uniform ambient lighting. Divide the image into a 32 x 32 grid for each channel, and use the luminance at the center of the image as a reference. Calculate the luminance gain at each grid vertex based on this reference luminance. For grids extending beyond the image boundaries on the right or bottom, calculate the gain at the image boundary points. Then, use a linear relationship based on the gain of the previous point to calculate the gain at the next grid boundary. Finally, store these gains in the LUT in a left-to-right, top-to-bottom order to complete the initialization.

In the context of a 1920 x 1080 resolution image, each channel operates at 960 x 540 resolution and is divided into a 32 x 32 grid, consisting of 30 grids horizontally and 17 grids vertically. Assuming the image's luminance center aligns with its geometric center, we derive the reference luminance *ref\_lum* from the average luminance of pixels around coordinates (480, 270). Moving methodically from left to right and top to bottom, derive the actual pixel luminance *act\_lum* for each grid vertex. Using the formula  $gain = ref\_lum / act\_lum$ , we compute the correction coefficient, which is then stored sequentially in the LUT.

In cases where grids extend beyond the image boundaries, such as the vertical coordinate of the last grid reaching 543 (beyond the maximum vertical coordinate of 539), we leverage the correction coefficients *gain\_0* at coordinate 511 and *gain\_1* at coordinate 539. Then the gain for coordinate 543 can be calculated based on  $gain = gain\_0 + (gain\_1 - gain\_0) / (539 - 511) * (543 - 511)$ .

LSC employs two LUTs for storing gains related to specific color channels: Gb and B are stored in one LUT, while R and Gr are stored in the other. The gain values are represented as 10-bit fixed-point numbers, with the high 2 bits representing the integer part and the low 8 bits the fractional part. The storage order within the LUTs is detailed in Table 32.5-1. The LUTs can be accessed through specific registers:

- A write operation writes the data from [ISP\\_LUT\\_WDATA\\_REG](#) into the LUT.
- A read operation stores the data read from the LUT into [ISP\\_LUT\\_RDATA\\_REG](#).
- Trigger LUT operations via [ISP\\_LUT\\_CMD\\_REG](#). Each write to this register initiates a read or write operation on the LUT. It is required to write to all the fields within this register at the same time.

Table 32.5-1. Gain Storage Sequence in LSC LUTs

| LUT sel  | bit [19:10] | bit [9:0] |
|----------|-------------|-----------|
| LUT_Gb_B | Gb          | B         |
| LUT_R_Gr | R           | Gr        |

Before enabling LSC, `ISP_LSC_XTABLESIZE` should be configured to set the number of horizontal correction coefficients. The number is determined by  $ISP\_LSC\_XTABLESIZE = \text{fix}((line\_width - 1)/2/32) + 2$ , where  $\text{fix}()$  denotes rounding down. For example, if the input RAW image has a horizontal width of 1920 pixels, then  $ISP\_LSC\_XTABLESIZE = \text{fix}((1920 - 1)/2/32) + 2 = 29 + 2 = 31$ .

### 32.5.2.3 Demosaic

The demosaicing process converts Bayer images to RGB888 images. The conversion effect can be fine-tuned using `ISP_DEMOSAIC_GRAD_RATIO`. This register field comprises 2 integer bits and 4 fractional bits, with a default value of 1.0.

### 32.5.2.4 Color Correction Matrix (CCM)

CCM is a correction matrix for image pixels that can adjust RGB888 pixels, including white balance adjustments. The relationship between the output R', G', B' and the input R, G, B is described by the following matrix. The parameters RR, RG, RB, GR, GG, GB, BR, BG, and BB can be configured with `ISP_CCM_xx`. Each parameter is a 13-bit fixed-point number, where bit [12] is the sign bit, bits [11:0] represent the absolute value of the number, bits [11:10] the integer part, and bits [9:0] the fractional part.

$$\begin{bmatrix} R' \\ G' \\ B' \end{bmatrix} = \begin{bmatrix} RR & RG & RB \\ GR & GG & GB \\ BR & BG & BB \end{bmatrix} \times \begin{bmatrix} R \\ G \\ B \end{bmatrix} \quad (32.1)$$

### 32.5.2.5 Gamma Correction

This module is used to adjust the gamma curve of an image. The gamma curve should be configured before gamma correction is enabled. Gamma curves can be configured using registers, with each R, G, B channel having an independent curve consisting of 16 sampling points. For the X component (input value), the values are indirectly obtained through `ISP_GAMMA_R/G/B_Xn` (where n ranges from 00 to 0F). The Y component (output value) can be directly set using `ISP_GAMMA_R/G/B_Yn` (where n ranges from 00 to 0F). Once configuration is complete, writing 1 to `ISP_GAMMA_UPDATE` applies the gamma curve settings. The gamma curve is illustrated in Figure 32.5-1.

For the X component, taking the R channel as an example,

$ISP\_GAMMA\_R\_X(n) = \log_2(X(n) - X(n-1))$ . This means the nth X coordinate value is obtained by adding 2 to the power of `ISP_GAMMA_R_X(n)` to the (n-1)th X coordinate value. Specifically, for the last coordinate,  $X(0F) = 2^{ISP\_GAMMA\_R\_X(0F)} + X(0E) - 1$ . Since RGB888 in ISP uses 8-bit integers, only the configuration where  $X(0F) = 255$  is considered a valid configuration.

Figure 32.5-1. Gamma Curve

### 32.5.2.6 RGB2YUV

The RGB2YUV module converts RGB888 pixels into full-range YUV422 format. The conversion protocol can be configured with [ISP\\_YUV\\_MODE](#).

### 32.5.2.7 Sharpen

The sharpen module is used to sharpen images. This module separates the low-frequency and high-frequency components of the image using a low-pass filter template (such as a mean template or Gaussian template) via [ISP\\_SHARP\\_FILTER\\_COEFF](#). For low-frequency components, no processing will be done. For high-frequency components, each pixel undergoes the following processing to achieve sharpening:

- Pixels with frequencies below [ISP\\_SHARP\\_THRESHOLD\\_LOW](#) are set to 0.
- Pixels with frequencies above [ISP\\_SHARP\\_THRESHOLD\\_LOW](#) but below [ISP\\_SHARP\\_THRESHOLD\\_HIGH](#) are multiplied by the coefficient [ISP\\_SHARP\\_AMOUNT\\_LOW](#).
- Pixels with frequencies above [ISP\\_SHARP\\_THRESHOLD\\_HIGH](#) are multiplied by the coefficient [ISP\\_SHARP\\_AMOUNT\\_HIGH](#).

At the end of each frame, the maximum value of high-frequency component pixels in that frame can be obtained by reading [ISP\\_SHARP\\_GRADIENT\\_MAX](#). This value can serve as a reference for configuring settings for the next frame.

### 32.5.2.8 Contrast/Hue/Saturation/Luminance Adjustment (COLOR)

This module is designed to modify the contrast, saturation, hue, and luminance of an image using the following registers [ISP\\_COLOR\\_CONTRAST](#), [ISP\\_COLOR\\_HUE](#), [ISP\\_COLOR\\_SATURATION](#), and [ISP\\_COLOR\\_BRIGHTNESS](#).

32.5.2.9 YUV\_Limit and YUV2RGB

The YUV\_Limit module converts full-range YUV422 pixels to limited-range YUV422 pixels. This module is activated only when RGB2YUV is enabled, YUV2RGB is disabled, and [ISP\\_YUV\\_RANGE](#) is set to 1. With this configuration, the ISP output type is either YUV422 or YUV420.

YUV2RGB converts full-range YUV422 pixels to RGB888 format. The conversion protocol can be configured with [ISP\\_YUV\\_MODE](#).

**Note:**

For full-range YUV, Y, U, and V channels range from 0 to 255.

For limited-range YUV, Y channel ranges from 16 to 235, and U and V channels range from 16 to 240.

32.5.2.10 Automatic Exposure Statistics (AE)

Auto Exposure (AE) uses 25 statistical sub-windows for image luminance statistics, forming a 5 x 5 grid of statistical window. The size of these windows is set using the register [ISP\\_AE\\_BX/BY\\_REG](#). Each sub-window is numbered as shown in Figure 32.5-2. The average luminance of each sub-window, represented as an 8-bit value, can be read with [ISP\\_AE\\_Bxx\\_MEAN](#). These statistics can be utilized to implement automatic exposure algorithms for cameras.

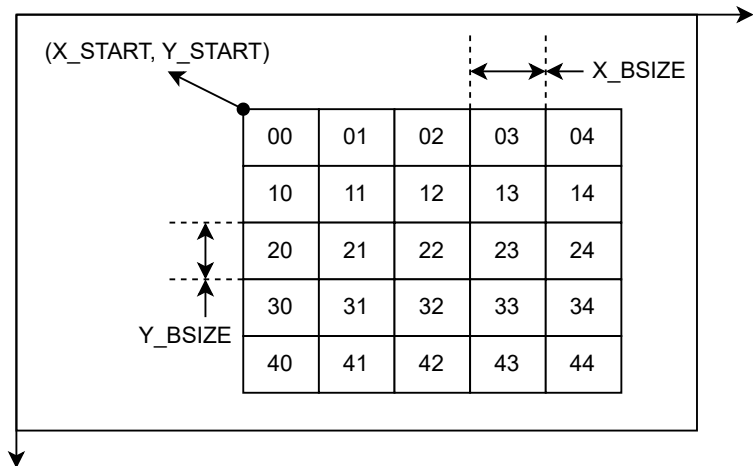

Figure 32.5-2. Sub-Window Numbering

AE utilizes two data sampling points: the output of the [Demosaic](#) module and the output of the [Gamma](#) module. These sampling points can be configured using [ISP\\_AE\\_SELECT](#).

AE also includes a simple luminance monitoring module, implemented either by hardware or software. This module calculates the average luminance of all sub-windows every [ISP\\_AE\\_MONITO\\_RPERIOD](#) frames. If the average luminance falls outside the thresholds set by [ISP\\_AE\\_MONITOR\\_TH/TL](#), interrupt for AE luminance monitoring will be triggered. Note that the luminance monitoring module does not support setting different weights for individual sub-windows. Therefore, if you wish to implement monitoring with different weights (for instance, prioritize highlights), you need to perform software-triggered manual statistics and process the statistical data accordingly.

### 32.5.2.11 Automatic Focus Statistics (AF)

AF gathers luminance and sharpness information within specified statistical windows based on the output of the [sharpen](#) module. There are 3 independent statistical windows, and the size and position of each window can be configured using [ISP\\_AF\\_H/VSCALE\\_A/B/C\\_REG](#). The module supports automatic and manual trigger modes for statistics collection. The results of luminance and sharpness statistics for each window can be accessed using [ISP\\_AF\\_LUMA/B/C](#) and [ISP\\_AF\\_SUMA/B/C](#). These statistics can be used to implement automatic focus algorithms for cameras.

AF also includes a focus scene monitoring module, which users can choose to implement hardware-based monitoring with this module or implement via software. This module evaluates cumulative changes in luminance and sharpness across all statistical windows as criteria. It performs statistics every [ISP\\_AF\\_ENV\\_PERIOD](#) frames. If consecutive statistics show a difference from baseline values for luminance and sharpness that exceeds the specified threshold, an interrupt is triggered indicating a change in the focus scene that requires refocusing. The baseline values are automatically updated after each automatic or manually triggered statistics collection. There are three methods for setting the threshold:

- Directly set the luminance and sharpness thresholds using [ISP\\_AF\\_ENV\\_USER\\_THRESHOLD\\_LUM](#) and [ISP\\_AF\\_ENV\\_USER\\_THRESHOLD\\_SUM](#)
- If [ISP\\_AF\\_ENV\\_USER\\_THRESHOLD\\_SUM](#) is 0, use the corresponding baseline sharpness value multiplied by [ISP\\_AF\\_ENV\\_THRESHOLD](#) (4 fractional bits) as the sharpness threshold
- If [ISP\\_AF\\_ENV\\_USER\\_THRESHOLD\\_LUM](#) is 0, use the corresponding baseline luminance value multiplied by [ISP\\_AF\\_ENV\\_THRESHOLD](#) (4 fractional bits) as the luminance threshold

### 32.5.2.12 Automatic White Balance Statistics (AWB)

AWB gathers white balance information for specified windows containing white patches. The coordinates of the window can be set using [ISP\\_AWB\\_H/VSCALE\\_REG](#). White patches are filtered based on luminance limits [ISP\\_AWB\\_MAX/MIN\\_LUM](#), *R/G* limits [ISP\\_AWB\\_MAX/MIN\\_RG](#), and *B/G* limits [ISP\\_AWB\\_MAX/MIN\\_BG](#).

The statistics include the number of white patches and the accumulated values of the R, G, B components for all white patches. These statistics can be obtained using [ISP\\_AWBO\\_WHITE\\_CNT](#) and [ISP\\_AWBO\\_ACC\\_R/G/B](#). They can be used to implement automatic white balance algorithms in cameras.

AWB relies on two data sampling points: the output of [Demosaic](#) and the output of [CCM](#), which can be configured with [ISP\\_AWB\\_SAMPLE](#).

### 32.5.2.13 Histogram Statistics (HIST)

HIST calculates brightness information for the image through statistical analysis. This module can define a statistical window, which can be divided into 5 x 5 sub-windows similar to AE. The configuration is done using registers [ISP\\_HIST\\_OFFSETS\\_REG](#) and [ISP\\_HIST\\_SIZE\\_REG](#). The weight of each sub-window can be independently adjusted with [ISP\\_HIST\\_WEIGHT\\_xx](#).

The statistics are presented as a histogram with 16 intervals. The x-axis of the histogram is defined using [ISP\\_HIST\\_SEG\\_x\\_x](#), and the final statistics can be retrieved using [ISP\\_HIST\\_BIN\\_x](#).

HIST involves three data sampling points: [BF](#), [demosaic](#), and [RGB2YUV](#), corresponding to RAW, RGB, and YUV data sampling points respectively. These can be configured using [ISP\\_HIST\\_MODE](#). When the sampling point

is set to RGB, RGB weighting coefficients can be adjusted via [ISP\\_HIST\\_COEFF\\_R/G/B](#).

### 32.5.3 ISP\_Tail

ISP\_Tail is the post-processing section that handles data from two input sources, ultimately outputting in Image Interface 64 format to CSI\_Bridge.

When the ISP is turned off, ISP\_Tail receives Image Interface 32 data from the MIPI CSI HOST, converts it to Image Interface 64 format, and outputs it to CSI\_Bridge. The byte order of the input Image Interface 32 data can be adjusted using [ISP\\_BYTE\\_ENDIAN\\_ORDER](#).

When the ISP is turned on, ISP\_Tail receives data from ISP\_Pipeline and processes them before outputting to CSI\_Bridge. This processing includes:

- Converting RGB888 to RGB565 based on register configurations
- Converting YUV422 to YUV420 based on register configurations
- Converting data from ISP\_Pipeline to Image Interface 64 format

### 32.5.4 Sequence Control

For modules involving matrix operations, it is necessary to buffer multiple lines of data before starting operations. In such cases, it is crucial for the module to generate an output sequence when the last few lines of image data are buffered. This output sequence can be controlled using

[ISP\\_BF/DEMOSAIC/SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TH/TL](#), to prevent buffer overflow in the CSI\_Bridge due to excessive speed. Please exercise caution when setting this register too large, as it may disrupt the normal data sequence. TH must be smaller than [ISP\\_HADR\\_NUM](#)-1, and it is recommended to set [ISP\\_BF/DEMOSAIC/SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TH/TL](#) to a value less than or equal to 8.

### 32.5.5 CSI\_Bridge

CSI\_Bridge serves as the interface between the ISP and the system memory. This module utilizes VDMA to transmit data from the ISP into the system memory. The image can be transferred either as a single block or divided into multiple blocks, which can be configured via [CSI\\_BRIG\\_DMA\\_BURST\\_LEN](#) and [CSI\\_BRIG\\_DMABLK\\_SIZE](#).

- [CSI\\_BRIG\\_DMA\\_BURST\\_LEN](#) configures the amount of 64-bit data in a VDMA burst transfer.
- [CSI\\_BRIG\\_DMABLK\\_SIZE](#) configures the number of VDMA bursts in a VDMA block transfer. If an image frame is transferred with only one block, and this block contains  $n$  VDMA bursts, then configure this field to a value greater than  $n$ . It is recommended to set it to the maximum value, 0xFFFF.

### 32.5.6 Color Mode and Byte Order

#### 32.5.6.1 Output Pixel Layout Format

When the ISP is disabled, ISP\_Tail directly receives Image Interface 32 data from the MIPI CSI HOST. The pixel layout can be referenced from Chapter [35 MIPI CSI](#). In this case, the Image Interface 32 data output from CSI HOST can go through two levels of byte ordering in ISP\_Tail and CSI\_Bridge, refer to [Byte Order](#) for details.

After the ISP is enabled and the data has been processed by the ISP\_Pipeline, the layout format of the output pixel is as shown in Table 32.5-2.

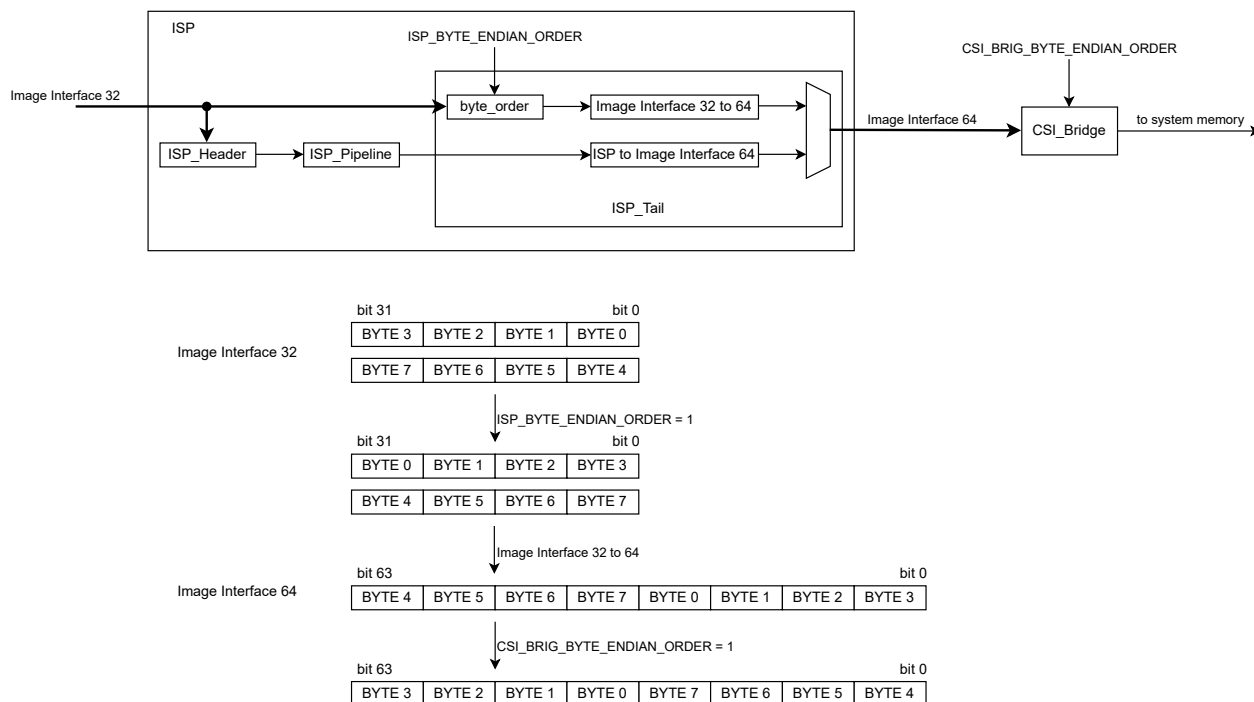

Table 32.5-2. ISP Output Pixel Layout Format

| Color Mode                        | Addr + 7       | Addr + 6       | Addr + 5       | Addr + 4       | Addr + 3       | Addr + 2       | Addr + 1       | Addr + 0       |
|-----------------------------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|----------------|
| RAW8                              | RAW7[7:0]      | RAW6[7:0]      | RAW5[7:0]      | RAW4[7:0]      | RAW3[7:0]      | RAW2[7:0]      | RAW1[7:0]      | RAW0[7:0]      |
| RGB888                            | G2[7:0]        | B2[7:0]        | R1[7:0]        | G1[7:0]        | B1[7:0]        | R0[7:0]        | G0[7:0]        | B0[7:0]        |
|                                   | B5[7:0]        | R4[7:0]        | G4[7:0]        | B4[7:0]        | R3[7:0]        | G3[7:0]        | B3[7:0]        | R2[7:0]        |
|                                   | R7[7:0]        | G7[7:0]        | B7[7:0]        | R6[7:0]        | G6[7:0]        | B6[7:0]        | R5[7:0]        | G5[7:0]        |
| RGB565                            | R3[4:0]G3[5:3] | G3[2:0]B3[4:0] | R2[4:0]G2[5:3] | G2[2:0]B2[4:0] | R1[4:0]G1[5:3] | G1[2:0]B1[4:0] | R0[4:0]G0[5:3] | G0[2:0]B0[4:0] |
| YUV422                            | Y3[7:0]        | V2[7:0]        | Y2[7:0]        | U2[7:0]        | Y1[7:0]        | V0[7:0]        | Y0[7:0]        | U0[7:0]        |
| YUV420<br>(Odd-numbered<br>rows)  | Y4[7:0]        | U4[7:0]        | Y3[7:0]        | Y2[7:0]        | U2[7:0]        | Y1[7:0]        | Y0[7:0]        | U0[7:0]        |
|                                   | U10[7:0]       | Y9[7:0]        | Y8[7:0]        | U8[7:0]        | Y7[7:0]        | Y6[7:0]        | U6[7:0]        | Y5[7:0]        |
|                                   | Y15[7:0]       | Y14[7:0]       | U14[7:0]       | Y13[7:0]       | Y12[7:0]       | U12[7:0]       | Y11[7:0]       | Y10[7:0]       |
| YUV420<br>(Even-numbered<br>rows) | Y4[7:0]        | V4[7:0]        | Y3[7:0]        | Y2[7:0]        | V2[7:0]        | Y1[7:0]        | Y0[7:0]        | V0[7:0]        |
|                                   | V10[7:0]       | Y9[7:0]        | Y8[7:0]        | V8[7:0]        | Y7[7:0]        | Y6[7:0]        | V6[7:0]        | Y5[7:0]        |
|                                   | Y15[7:0]       | Y14[7:0]       | V14[7:0]       | Y13[7:0]       | Y12[7:0]       | V12[7:0]       | Y11[7:0]       | Y10[7:0]       |

### 32.5.6.2 Byte Order

CSI\_Bridge can reorder the bytes of the input 64-bit data via `CSI_BRIG_BYTE_ENDIAN_ORDER`. ISP\_Tail can also reorder the bytes via `ISP_BYTE_ENDIAN_ORDER`. The byte ordering functionality within ISP\_Tail differs from that of CSI\_Bridge, as illustrated in Figure 32.5-3.

- **ISP\_Tail byte ordering:** This operation applies to its Image Interface 32 input. It reverses the high and low bytes of the 32-bit input data and then concatenates them to output 64-bit data. This step only functions when the ISP is disabled and is mainly used for processing Image Interface 32 YUV422 and YUV420 input types.
- **CSI\_Bridge byte ordering:** This operation acts on the 64-bit input data (i.e., the output data from ISP\_Tail) by reversing its high and low bytes.

## 32.6 Interrupts

ESP32-P4's ISP can generate the following interrupt signals that will be sent to the [Interrupt Matrix](#).

- `isp_interrupt`
- `csi_bridge_interrupt`

There are several internal interrupt sources from ISP that can generate the above interrupt signal. The interrupt sources from ISP are listed with their trigger conditions and the resulted interrupt signal in Table 32.6-1.

**Table 32.6-1. ISP's Internal Interrupt Sources**

| Internal Interrupt Source     | Trigger Condition  | Interrupt Signal           |
|-------------------------------|--|----------------------------|
| ISP_HEADER_IDI_FRAME_INT      | After MIPI-CSI inputs a frame. This interrupt is not affected by whether <a href="#">ISP_MIPI_DATA_EN</a> is enabled | <code>isp_interrupt</code> |
| ISP_TAIL_IDI_FRAME_INT        | After ISP_Tail outputs a frame   | <code>isp_interrupt</code> |
| ISP_YUV2RGB_FRAME_INT         | After module YUV2RGB processes a frame   | <code>isp_interrupt</code> |
| ISP_COLOR_FRAME_INT           | After module contrast/hue/saturation/luminance adjustment processes a frame  | <code>isp_interrupt</code> |
| ISP_SHARP_FRAME_INT           | After module sharpen processes a frame   | <code>isp_interrupt</code> |
| ISP_RGB2YUV_FRAME_INT         | After module RGB2YUV processes a frame   | <code>isp_interrupt</code> |
| ISP_GAMMA_FRAME_INT           | After module gamma correction processes a frame  | <code>isp_interrupt</code> |
| ISP_CCM_FRAME_INT             | After module CCM processes a frame   | <code>isp_interrupt</code> |
| ISP_DEMOSAIC_FRAME_INT        | After module demosaic processes a frame  | <code>isp_interrupt</code> |
| ISP_BF_FRAME_INT              | After module BF processes a frame  | <code>isp_interrupt</code> |
| ISP_LSC_FRAME_INT             | After module LSC processes a frame   | <code>isp_interrupt</code> |
| ISP_FRAME_INT                 | After ISP_Pipeline outputs a frame   | <code>isp_interrupt</code> |
| ISP_HIST_FDONE_INT            | After module HIST processes a frame  | <code>isp_interrupt</code> |
| ISP_AWB_FDONE_INT             | After module AWB processes a frame   | <code>isp_interrupt</code> |
| ISP_AF_ENV_INT                | When module AF detects a change in the focus scene   | <code>isp_interrupt</code> |
| ISP_AF_FDONE_INT              | After module AF processes a frame  | <code>isp_interrupt</code> |
| ISP_AE_FRAME_DONE_INT         | After module AE processes a frame  | <code>isp_interrupt</code> |
| ISP_AE_MONITOR_INT            | When module AE detects a change in the luminance   | <code>isp_interrupt</code> |
| ISP_MIPI_HNUM_UNMATCH_INT     | When the width HNUM settings do not match the actual input from MIPI-CSI   | <code>isp_interrupt</code> |
| ISP_DATA_TYPE_SETTING_ERR_INT | When DATA_TYPE settings do not match the actual input data   | <code>isp_interrupt</code> |

|                                  |   |                      |
|----------------------------------|---|----------------------|
| ISP_HVNUM_SETTING_ERR_INT        | When the width HNUM and the height VNUM settings are incorrect: Image dimensions must be even; with the RAW10 input, HNUM must be a multiple of 4 | isp_interrupt        |
| ISP_BUF_FULL_INT                 | When ISP_Header buffer is full  | isp_interrupt        |
| ISP_ASYNC_FIFO_OVF_INT           | When asynchronous FIFO of ISP_Header is overflowed  | isp_interrupt        |
| ISP_DATA_TYPE_ERR_INT            | When illegal DATA_TYPE is used for input data (not RAW8/RAW10/RAW12)  | isp_interrupt        |
| CSI_BRIG_DMA_CFG_HAS_UPDATED_INT | When VDMA configuration of CSI_Bridge is updated  | csi_bridge_interrupt |
| CSI_BRIG_CSI_ASYNC_FIFO_OVF_INT  | When asynchronous FIFO of CSI_Bridge is overflowed  | csi_bridge_interrupt |
| CSI_BRIG_CSI_BUF_OVERRUN_INT     | When CSI_Bridge buffer is overflowed  | csi_bridge_interrupt |
| CSI_BRIG_DISCARD_INT             | When any frame is discarded in CSI_Bridge   | csi_bridge_interrupt |
| CSI_BRIG_VADR_NUM_LT_INT         | When <a href="#">CSI_BRIG_VADR_NUM</a> is less than the actual value  | csi_bridge_interrupt |
| CSI_BRIG_VADR_NUM_GT_INT         | When <a href="#">CSI_BRIG_VADR_NUM</a> is greater than the actual value   | csi_bridge_interrupt |

**Note:**

For definitions of *interrupt*, *interrupt signal*, *interrupt source*, and their correlations, please refer to Chapter [11 Interrupt Matrix](#) > Section [11.2 Interrupt Terminology in ESP32-P4](#).

Each interrupt source can be configured by a common set of registers that are described in Section [Interrupt Configuration Registers](#). The specific registers can be found in Section [32.8 Register Summary](#).

## 32.7 Programming Procedures

### 32.7.1 ISP Clock Reset Configuration

1. Enable the bus clock for the ISP and CSI\_Bridge modules;
  - Set [HP\\_SYS\\_CLKRST\\_CSI\\_BRG\\_SYS\\_CLK\\_EN](#) to 1 to activate the clock for ISP and CSI\_Bridge
2. Configure the working clock for ISP;
  - Choose the clock source via [HP\\_SYS\\_CLKRST\\_ISP\\_CLK\\_SRC\\_SEL](#)
  - Configure the clock divisor via [HP\\_SYS\\_CLKRST\\_ISP\\_CLK\\_DIV\\_NUM](#)
  - Set [HP\\_SYS\\_CLKRST\\_ISP\\_CLK\\_EN](#) to 1 to activate the ISP working clock
3. Reset ISP and CSI\_Bridge modules.

- Set [HP\\_SYS\\_CLKRST\\_RST\\_EN\\_CSI\\_BRG](#) to 1 and then 0 to reset ISP and CSI\_Bridge

### 32.7.2 CSI\_Bridge Configuration

1. Set the width and height of the image via [CSI\\_BRIG\\_HADR\\_NUM](#) and [CSI\\_BRIG\\_VADR\\_NUM](#). The width is measured in "64-bit" units, and the height is measured in rows;
2. Set the valid range for DATA\_TYPE via [CSI\\_BRIG\\_DATA\\_TYPE\\_MIN](#) and [CSI\\_BRIG\\_DATA\\_TYPE\\_MAX](#);
3. Specify the burst length via [CSI\\_BRIG\\_DMA\\_BURST\\_LEN](#). Ensure that this value matches the SRC\_MSIZ (length per burst) and SRC\_TR\_WIDTH (data width) of the corresponding VDMA channel. The data width for CSI\_Bridge is measured in "64-bit" units;
4. If the image is transferred in multiple blocks, specify the maximum number of VDMA bursts per block via [CSI\\_BRIG\\_DMABLK\\_SIZE](#);
5. Enable CSI\_Bridge by writing 1 to [CSI\\_BRIG\\_CSI\\_BRIG\\_EN](#).

### 32.7.3 VDMA Configuration

1. Configure the register corresponding to the channel;
  - Set SRC/DST\_MULTBLK\_TYPE to 3 (configure with linked list)
  - Configure TT\_FC
    - For CSI\_Bridge, set TT\_FC to 4 (peripheral to memory with peripheral flow control)
    - For memory to ISP, set TT\_FC to 6 (memory to peripheral with peripheral flow control)
  - Configure HS\_SEL
    - For CSI\_Bridge, set HS\_SEL\_SRC to 0 (peripheral uses hardware handshake), and set HS\_SEL\_DST to 1 (memory uses software handshake)
    - For memory to ISP, set HS\_SEL\_SRC to 1 (memory uses software handshake), and set HS\_SEL\_DST to 0 (peripheral uses hardware handshake)
  - Assign hardware handshake channels
    - For CSI\_Bridge, set SRC\_PER to 1
    - For memory to ISP, set DST\_PER to 2
  - Set SRC/DST\_TR\_WIDTH to 3 (data width of 64 bits)
2. Establish the linked list based on the configured registers.

**Note:**

The VDMA configuration outlined in this section covers essential steps. For detailed procedures, refer to Chapter 4 [VDMA Controller \(VDMA\)](#).

Ensure that image dimensions and start addresses are aligned to 8 bytes.

## 32.7.4 ISP General Configuration

1. Configure the input image size via [ISP\\_HADR\\_NUM](#) and [ISP\\_VADR\\_NUM](#)
2. Set image arrangement mode in the Bayer domain via [ISP\\_BAYER\\_MODE](#);
3. Specify the ISP output data format via [ISP\\_OUT\\_TYPE](#);
4. Configure each module in ISP\_Pipeline. Refer to the corresponding section in [32.5.2](#) for details;
5. Enable the necessary Pipeline modules by setting the fields in register [ISP\\_CNTL\\_REG](#). Ensure that the format conversion-related modules ([Demosaic](#), [RGB2YUV](#), [YUV2RGB](#)) are enabled before enabling the ISP, and that they match the final output format.

## 32.7.5 Enabling ISP for Image Capture from MIPI-CSI

1. Configure ISP and CSI\_Bridge clocks and reset as described in Section [32.7.1](#);
2. Configure CSI\_Bridge as described in Section [32.7.2](#);
3. Configure VDMA as described in Section [32.7.3](#);
4. Configure MIPI CSI HOST according to Chapter [35 MIPI CSI](#);
5. Configure ISP general settings as described in Section [32.7.4](#);
6. Select the input source as MIPI-CSI by setting [ISP\\_IN\\_SRC](#) to 0;
7. Configure the input data type via [ISP\\_DATA\\_TYPE](#);
8. Enable the ISP by setting [ISP\\_EN](#) to 1;
9. Enable MIPI-CSI data input by setting [ISP\\_MIPI\\_DATA\\_EN](#) to 1.

## 32.7.6 Enabling ISP for Image Capture from DVP

1. Configure ISP and CSI\_Bridge clocks and reset as described in Section [32.7.1](#);
2. Configure CSI\_Bridge as described in Section [32.7.2](#);
3. Configure VDMA as described in Section [32.7.3](#);
4. Configure ISP general settings as described in Section [32.7.4](#);
5. Select the input source as DVP by setting [ISP\\_IN\\_SRC](#) to 1;
6. Configure the input data type via [ISP\\_CAM\\_DATA\\_TYPE](#), and write 0 to [ISP\\_DATA\\_TYPE](#);
7. Enable the ISP by setting [ISP\\_EN](#) to 1;
8. Configure the data mode for DVP interface via [ISP\\_CAM\\_CONF\\_REG](#);
9. Reset the DVP interface by setting [ISP\\_CAM\\_RESET](#) to 1, waiting for a period, then setting it to 0;
10. Write 1 to [ISP\\_CAM\\_UPDATE\\_REG](#);
11. Enable the DVP interface by setting [ISP\\_CAM\\_EN](#) to 1;
12. Wait for [ISP\\_CAM\\_UPDATE\\_REG](#) to automatically clear for initialization.

## 32.7.7 Enabling ISP for Image Capture from VDMA

1. Configure ISP and CSI\_Bridge clocks and reset as described in Section [32.7.1](#);
2. Configure CSI\_Bridge as described in Section [32.7.2](#);
3. Configure VDMA as described in Section [32.7.3](#);
4. Configure ISP general settings as described in Section [32.7.4](#);
5. Select the input source as VDMA by setting [ISP\\_IN\\_SRC](#) to 2;
6. Configure the input data type via [ISP\\_DMA\\_DATA\\_TYPE](#) and [ISP\\_DATA\\_TYPE](#);
7. Configure the total amount of raw image data for one frame in "64-bit" units using [ISP\\_DMA\\_RAW\\_NUM\\_TOTAL](#), which value should equal image width x image height x bits per pixel/64. Then, write 1 to [ISP\\_DMA\\_RAW\\_NUM\\_TOTAL\\_SET](#) to activate the configuration;
8. Configure the burst length via [ISP\\_DMA\\_BURST\\_LEN](#), which needs to align with the VDMA configuration;
9. Write 1 to [ISP\\_DMA\\_UPDATE\\_REG](#) to update the VDMA configuration, and wait for the update to complete;
10. Send a frame of data by setting [ISP\\_DMA\\_EN](#) to 1.

## 32.7.8 LSC LUT Configuration

LSC can be configured after the ISP is enabled. Before enabling LSC, initialize the LSC LUT as follows:

1. Write to LUT;
  - Write the data to be stored in the LUT by writing to [ISP\\_LUT\\_WDATA\\_REG](#)
  - Store the data at the specified address by writing to [ISP\\_LUT\\_CMD\\_REG](#)
2. Read from LUT.
  - Retrieve the data stored at the specified address by writing to [ISP\\_LUT\\_CMD\\_REG](#)
  - Obtain the data read from the LUT by reading from [ISP\\_LUT\\_RDATA\\_REG](#)

## 32.7.9 AE Configuration

AE can be configured after the ISP is enabled as follows:

1. Select sampling points via [ISP\\_AE\\_SELECT](#);
2. Set up statistical windows;
  - Set the horizontal starting point with [ISP\\_AE\\_X\\_START](#)
  - Configure the horizontal dimension of each sub-window with [ISP\\_AE\\_X\\_BSIZE](#)
  - Set the vertical starting point with [ISP\\_AE\\_Y\\_START](#)
  - Configure the vertical dimension of each sub-window with [ISP\\_AE\\_Y\\_BSIZE](#)
  - Specify the number of pixels in each sub-window with [ISP\\_AE\\_SUBWIN\\_PIXNUM](#)
  - Set the reciprocal of the number of pixels in each sub-window with [ISP\\_AE\\_SUBWIN\\_RECIP](#) (20 fractional bits)

## 3. Enable luminance monitoring;

- If monitoring is required, set [ISP\\_AE\\_MONITOR\\_TH](#) and [ISP\\_AE\\_MONITOR\\_TL](#) to non-zero values
- Specify the monitoring statistical period in frames via [ISP\\_AE\\_MONITOR\\_PERIOD](#)

4. Enable AE by writing 1 to [ISP\\_AE\\_EN](#);

## 5. Obtain statistics;

- Clear the completion status by writing 1 to [ISP\\_AE\\_FRAME\\_DONE\\_INT\\_CLR](#)
- Initiate statistics by writing 1 to [ISP\\_AE\\_UPDATE](#). Each write to this register resets the frame count for monitoring. It is recommended to disable monitoring before manual statistics and re-enable it after completion to prevent automatic results from overwriting manual results prematurely
- Wait for the statistics to complete
  - Wait for the ISP interrupt triggered by [AE\\_FDONE\\_INT](#)
  - Or query the status using [ISP\\_AE\\_FRAME\\_DONE\\_INT\\_RAW](#)
- Obtain statistics for each sub-window by reading [ISP\\_AE\\_Bxx\\_MEAN](#)

## 6. Perform luminance monitoring.

- Wait for the ISP interrupt triggered by [AE\\_MONITOR\\_INT](#)
- Or query the status using [ISP\\_AE\\_MONITOR\\_INT\\_RAW](#)
- After detecting a change in luminance, disable luminance monitoring, re-initiate camera exposure, and then re-enable monitoring

### 32.7.10 AF Configuration

AF can be configured after the ISP is enabled as follows:

## 1. Set up three statistical windows A, B, and C, ensuring each window does not exceed 1024 x 1024;

- Set the left boundary using [ISP\\_AF\\_LPOINT\\_A/B/C](#)
- Set the right boundary using [ISP\\_AF\\_RPOINT\\_A/B/C](#)
- Set the top boundary using [ISP\\_AF\\_TPOINT\\_A/B/C](#)
- Set the bottom boundary using [ISP\\_AF\\_BPOINT\\_A/B/C](#)

2. Set the sharpness threshold via [ISP\\_AF\\_THRESHOLD](#);

## 3. Configure focus scene monitoring;

- If focus scene monitoring is required, set the monitoring period [ISP\\_AF\\_ENV\\_PERIOD](#) to a non-zero value
- There are two ways to set the threshold
  - If [ISP\\_AF\\_ENV\\_USER\\_THRESHOLD\\_SUM](#) or [ISP\\_AF\\_ENV\\_USER\\_THRESHOLD\\_LUM](#) is non-zero, use the specified values as thresholds for sharpness and brightness changes

- If `ISP_AF_ENV_USER_THRESHOLD_SUM` or `ISP_AF_ENV_USER_THRESHOLD_LUM` is zero, use the sharpness and brightness of the most recent statistics multiplied by `ISP_AF_ENV_THRESHOLD` (4 fractional bits) as the change threshold
4. Configure the statistical trigger mode. After each trigger completes, update the monitoring baseline;
    - If `ISP_AF_AUTO_UPDATE` is 1, it is in automatic triggering mode, which performs statistics for every frame with AF enabled. Since each statistical calculation clears the frame count for monitoring, the monitoring will be disabled
    - If `ISP_AF_AUTO_UPDATE` is 0, it is in manual triggering mode. The monitoring is working only under this condition
  5. Enable AF by writing 1 to `ISP_AF_EN`;
  6. Obtain statistics;
    - Clear the completion status by writing 1 to `ISP_AF_FDONE_INT_CLR`
    - Trigger statistics
      - With automatic triggering, statistics are performed for every frame
      - With manual triggering, write 1 to `ISP_AF_MANUAL_UPDATE` to trigger statistics manually
    - Wait for the statistics to complete
      - Wait for the ISP interrupt triggered by `AF_FDONE_INT`.
      - Or query the status using `ISP_AF_FDONE_INT_RAW`
    - Obtain sharpness statistics by reading `ISP_AF_SUMA/B/C` and obtain brightness statistics by reading `ISP_AF_LUMA/B/C`
  7. Performs focus scene monitoring.
    - Wait for the ISP interrupt triggered by `AF_ENV_INT`
    - Or query the status using `ISP_AF_ENV_INT_RAW`
    - After detecting a change in the focus scene, disable monitoring, refocus the camera, and then re-enable monitoring

### 32.7.11 AWB Configuration

AWB can be configured after the ISP is enabled.

1. Select sampling points via `ISP_AWB_SAMPLE` and write 1 to `ISP_AWB_MODE`;
2. Set up statistical windows;
  - Set the left boundary using `ISP_AWB_LPOINT`
  - Set the right boundary using `ISP_AWB_RPOINT`
  - Set the top boundary using `ISP_AWB_TPOINT`
  - Set the bottom boundary using `ISP_AWB_BPOINT`
3. Configure white patch constraints;

- Set maximum luminance with [ISP\\_AWB\\_MAX\\_LUM](#)
- Set minimum luminance with [ISP\\_AWB\\_MIN\\_LUM](#)
- Set maximum R/G ratio with [ISP\\_AWB\\_MAX\\_RG](#) (2 integer bits, 8 fractional bits)
- Set minimum R/G ratio with [ISP\\_AWB\\_MIN\\_RG](#) (2 integer bits, 8 fractional bits)
- Set maximum B/G ratio with [ISP\\_AWB\\_MAX\\_BG](#) (2 integer bits, 8 fractional bits)
- Set minimum B/G ratio with [ISP\\_AWB\\_MIN\\_BG](#) (2 integer bits, 8 fractional bits)

#### 4. Obtain statistics;

- Clear the completion status by writing 1 to [ISP\\_AWB\\_FDONE\\_INT\\_CLR](#)
- Trigger statistics by writing 0 and then 1 to [ISP\\_AWB\\_EN](#)
- Wait for the statistics to complete
  - Wait for the ISP interrupt triggered by [AWB\\_FDONE\\_INT](#)
  - Or query the status using [ISP\\_AWB\\_FDONE\\_INT\\_RAW](#)
- Get the number of white patches within the statistical window by reading [ISP\\_AWBO\\_WHITE\\_CNT](#)
- Get the accumulated values of the R, G, B components for the white patches within the statistical window by reading [ISP\\_AWBO\\_ACC\\_R/G/B](#)

## 32.7.12 HIST Configuration

HIST can be configured after the ISP is enabled.

1. Select sampling points via [ISP\\_HIST\\_MODE](#);
  - If sampling points are set to RGB, use [ISP\\_HIST\\_COEFF\\_R/G/B](#) to set RGB weights with 8 fractional bits
2. Set up statistical windows;
  - Set the horizontal start point with [ISP\\_HIST\\_X\\_OFFS](#)
  - Configure the horizontal dimension of each sub-window with [ISP\\_HIST\\_X\\_SIZE](#)
  - Set the vertical start point with [ISP\\_HIST\\_Y\\_OFFS](#)
  - Configure the vertical dimension of each sub-window with [ISP\\_HIST\\_Y\\_SIZE](#)
3. Configure histograms;
  - Set histogram interval divisions using [ISP\\_HIST\\_SEG\\_x\\_x](#)
  - Set window weights using [ISP\\_HIST\\_WEIGHT\\_xx](#) with 8 fractional bits
4. Enable HIST by writing 1 to [ISP\\_HIST\\_EN](#);
5. Obtain statistics.
  - Clear the completion status by writing 1 to [ISP\\_HIST\\_FDONE\\_INT\\_CLR](#)
  - With HIST enabled, statistics are performed at the end of every frame. Wait for the statistics to complete

- Wait for the ISP interrupt triggered by HIST\_FDONE\_INT
- Or query the status using [ISP\\_HIST\\_FDONE\\_INT\\_RAW](#).
- Obtain the statistics for each interval by reading [ISP\\_HIST\\_BIN\\_x](#).

### 32.7.13 ISP\_Pipeline Module Update Configuration

1. Disable the module via [ISP\\_CNTL\\_REG](#);
2. Wait for the interrupt from the corresponding module;
3. Update module configurations;
4. Re-enable the module.

## 32.8 Register Summary

### 32.8.1 ISP Register Summary

The addresses in this section are relative to **ISP** base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

The abbreviations given in Column **Access** are explained in Section *Access Types for Registers*.

| Name   | Description   | Address | Access |
|--|---|---------|--------|
| <b>Configuration Registers</b>               |   |         |        |
| <a href="#">ISP_CLK_EN_REG</a>               | ISP clock control register                            | 0x0004  | R/W    |
| <a href="#">ISP_CNTL_REG</a>                 | ISP enable register                                   | 0x0008  | R/W    |
| <a href="#">ISP_HSYNC_CNT_REG</a>            | Hsync interval control register                       | 0x000C  | R/W    |
| <a href="#">ISP_FRAME_CFG_REG</a>            | Image control register                                | 0x0010  | R/W    |
| <a href="#">ISP_CCM_COEF0_REG</a>            | CCM parameter register 0                              | 0x0014  | R/W    |
| <a href="#">ISP_CCM_COEF1_REG</a>            | CCM parameter register 1                              | 0x0018  | R/W    |
| <a href="#">ISP_CCM_COEF3_REG</a>            | CCM parameter register 3                              | 0x001C  | R/W    |
| <a href="#">ISP_CCM_COEF4_REG</a>            | CCM parameter register 4                              | 0x0020  | R/W    |
| <a href="#">ISP_CCM_COEF5_REG</a>            | CCM parameter register 5                              | 0x0024  | R/W    |
| <a href="#">ISP_BF_MATRIX_CTRL_REG</a>       | BF pixel-to-matrix control register                   | 0x0028  | R/W    |
| <a href="#">ISP_BF_SIGMA_REG</a>             | BF noise reduction strength control register          | 0x002C  | R/W    |
| <a href="#">ISP_BF_GAU0_REG</a>              | BF noise reduction template register 0                | 0x0030  | R/W    |
| <a href="#">ISP_BF_GAU1_REG</a>              | BF noise reduction template register 1                | 0x0034  | R/W    |

### 32.8.2 MIPI CSI\_Bridge Register Summary

The addresses in this section are relative to **MIPI CSI\_Bridge** base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

The abbreviations given in Column **Access** are explained in Section [Access Types for Registers](#).

| Name  | Description                              | Address | Access           |
|---|--|---------|------------------|
| <b>Clock Gating Control Register</b>          |  |         |                  |
| <a href="#">CSI_BRIG_CLK_EN_REG</a>           | CSI_Bridge clock gate register           | 0x0000  | R/W              |
| <b>CSI_Bridge Control Registers</b>           |  |         |                  |
| <a href="#">CSI_BRIG_CSI_EN_REG</a>           | CSI_Bridge enable register               | 0x0004  | R/W              |
| <a href="#">CSI_BRIG_BUF_FLOW_CTL_REG</a>     | CSI_Bridge buffer control register       | 0x000C  | varies           |
| <b>DMA Control Registers</b>                  |  |         |                  |
| <a href="#">CSI_BRIG_DMA_REQ_CFG_REG</a>      | DMA request control register             | 0x0008  | R/W              |
| <a href="#">CSI_BRIG_DMA_REQ_INTERVAL_REG</a> | DMA request interval register            | 0x002C  | R/W              |
| <a href="#">CSI_BRIG_DMABLK_SIZE_REG</a>      | DMA data block size control register     | 0x0030  | R/W              |
| <b>Frame Format Configuration Registers</b>   |  |         |                  |
| <a href="#">CSI_BRIG_DATA_TYPE_CFG_REG</a>    | DATA_TYPE control register               | 0x0010  | R/W              |

## 32.9 Registers

### 32.9.1 ISP Registers

The addresses in this section are relative to **ISP** base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

For how to program reserved fields, please refer to Section [Programming Reserved Register Field](#).

Register 32.1. ISP\_VER\_DATE\_REG (0x0000)

**ISP\_VER\_DATA** ISP version control register. (R/W)

Register 32.2. ISP\_CLK\_EN\_REG (0x0004)

**ISP\_CLK\_EN** Configures whether the ISP clock is always on.

0: The clock is enabled only during register access

1: The clock is always on

(R/W)

**ISP\_CLK\_BF\_FORCE\_ON** Configures whether to force enable the BF clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_LSC\_FORCE\_ON** Configures whether to force enable the LSC clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_DEMOSAIC\_FORCE\_ON** Configures whether to force enable the demosaic clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_CCM\_FORCE\_ON** Configures whether to force enable the CCM clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_GAMMA\_FORCE\_ON** Configures whether to force enable the gamma correction clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_RGB2YUV\_FORCE\_ON** Configures whether to force enable the RGB2YUV clock.

0: Not force enable

1: Force enable

(R/W)

Continued on the next page...

**Register 32.2. ISP\_CLK\_EN\_REG (0x0004)**

Continued from the previous page...

**ISP\_CLK\_SHARP\_FORCE\_ON** Configures whether to force enable the sharpen clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_COLOR\_FORCE\_ON** Configures whether to force enable the contrast/hue/saturation/luminance clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_YUV2RGB\_FORCE\_ON** Configures whether to force enable the YUV2RGB clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_AE\_FORCE\_ON** Configures whether to force enable the AE clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_AF\_FORCE\_ON** Configures whether to force enable the AF clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_AWB\_FORCE\_ON** Configures whether to force enable the AWB clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_HIST\_FORCE\_ON** Configures whether to force enable the HIST clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_CLK\_MIPI\_IDI\_FORCE\_ON** Configures whether to force enable the MIPI Image Interface 32 input clock.

0: Not force enable

1: Force enable

(R/W)

**ISP\_MEM\_CLK\_FORCE\_ON** Configures whether to force enable all the ISP memory clocks.

0: Not force enable

1: Force enable

(R/W)

**Register 32.3. ISP\_CNTL\_REG (0x0008)**

0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

**ISP\_MIPI\_DATA\_EN** Configures whether to enable the MIPI Image Interface 32 input.

0: Disable

1: Enable

(R/W)

**ISP\_EN** Configures whether to enable the ISP.

0: Disable

1: Enable

(R/W)

**ISP\_BF\_EN** Configures whether to enable the BF module.

0: Disable

1: Enable

(R/W)

**ISP\_LSC\_EN** Configures whether to enable the LSC module.

0: Disable

1: Enable

(R/W)

**ISP\_DEMOSAIC\_EN** Configures whether to enable the demosaic module.

0: Disable

1: Enable

(R/W)

**ISP\_CCM\_EN** Configures whether to enable the CCM module.

0: Disable

1: Enable

(R/W)

**ISP\_GAMMA\_EN** Configures whether to enable the gamma correction module.

0: Disable

1: Enable

(R/W)

Continued on the next page...

**Register 32.3. ISP\_CNTL\_REG (0x0008)**

Continued from the previous page...

**ISP\_RGB2YUV\_EN** Configures whether to enable the RGB2YUV module.

0: Disable

1: Enable

(R/W)

**ISP\_SHARP\_EN** Configures whether to enable the sharpen module.

0: Disable

1: Enable

(R/W)

**ISP\_COLOR\_EN** Configures whether to enable the contrast/hue/saturation/luminance module.

0: Disable

1: Enable

(R/W)

**ISP\_YUV2RGB\_EN** Configures whether to enable the YUV2RGB module.

0: Disable

1: Enable

(R/W)

**ISP\_AE\_EN** Configures whether to enable the AE module.

0: Disable

1: Enable

(R/W)

**ISP\_AF\_EN** Configures whether to enable the AF module.

0: Disable

1: Enable

(R/W)

**ISP\_AWB\_EN** Configures whether to enable the AWB module.

0: Disable

1: Enable

(R/W)

**ISP\_HIST\_EN** Configures whether to enable the HIST module.

0: Disable

1: Enable

(R/W)

**ISP\_BYTE\_ENDIAN\_ORDER** Configures the byte order for MIPI Image Interface 32 input when ISP is disabled.

0: csi\_data[31:0]

1: [7:0], [15:8], [23:16], [31:24]

(R/W)

Continued on the next page...

Register 32.3. ISP\_CNTL\_REG (0x0008)

Continued from the previous page...

**ISP\_DATA\_TYPE** Configures the input data type.

- 0: RAW8
- 1: RAW10
- 2: RAW12
- 3: invalid

(R/W)

**ISP\_IN\_SRC** Configures the input data source.

- 0: MIPI Image Interface 32 data from CSI HOST
- 1: Data from DVP
- 2: Data from VDMA
- 3: invalid

(R/W)

**ISP\_OUT\_TYPE** Configures the output data type.

- 0: RAW8
- 1: YUV422
- 2: RGB888
- 3: YUV420
- 4: RGB565
- Others: Invalid

(R/W)

Register 32.4. ISP\_HSYNC\_CNT\_REG (0x000C)

**ISP\_HSYNC\_CNT** Configures the interval between hsync and the previous vsync or line\_end when converting Image Interface 32 data to ISP data. Generally, the default value is used. Measurement unit: Number of ISP\_CLK clock cycles. (R/W)

### Register 32.5. ISP\_FRAME\_CFG\_REG (0x0010)

|   |    |    |    |    |    |    |     |    |    |       |
|---|----|----|----|----|----|----|-----|----|----|-------|
| <div>(reserved)</div> <div>ISP_HSYNC_END_EXIST</div> <div>ISP_HSYNC_START_EXIST</div> <div>ISP_BAYER_MODE</div> <div>(reserved)</div> <div>ISP_HADR_NUM</div> <div>ISP_VADR_NUM</div> |    |    |    |    |    |    |     |    |    |       |
| 31  | 30 | 29 | 28 | 27 | 26 | 24 | 23  | 12 | 11 | 0     |
| 0   | 1  | 1  | 0  | 0  | 0  | 0  | 480 |    |    | 480   |
|   |    |    |    |    |    |    |     |    |    | Reset |

**ISP\_VADR\_NUM** Configures the height of the input image, which should be set as the actual number of lines - 1. (R/W)

**ISP\_HADR\_NUM** Configures the width of the input image, which should be set as the actual width of lines - 1. (R/W)

**ISP\_BAYER\_MODE** Configures the Bayer mode of the input image.

O: BG/GR

1: GB/RG

2: GR/BG

3: RG/GB

(R/W)

**ISP\_HSYNC\_START\_EXIST** Configures whether the hsync\_start packet exists.

0: Not exist

1: Exist

(R/W)

**ISP\_HSYNC\_END\_EXIST** Configures whether the hsync\_end packet exists. This must have the same value as the [ISP\\_HSYNC\\_START\\_EXIST](#) field.

0: Not exist

1: Exist

(R/W)

| (reserved) |  |  |  |  |  |  |  | ISP_BF_PADDING_MODE |  |  |  |  |  |  |  | ISP_BF_PADDING_DATA |    |  |  |  |  |  |  | ISP_BF_TAIL_PIXEN_PULSE_TH |    |  |  |  |  |  |  | ISP_BF_TAIL_PIXEN_PULSE_TL |    |   |  |  |  |  |  |       |  |   |   |  |  |  |  |  |  |  |
| 31         |  |  |  |  |  |  |  | 25                  |  |  |  |  |  |  |  | 24                  | 23 |  |  |  |  |  |  |                            | 16 |  |  |  |  |  |  |                            | 15 | 8 |  |  |  |  |  |       |  | 7 | 0 |  |  |  |  |  |  |  |
| 0          |  |  |  |  |  |  |  | 0                   |  |  |  |  |  |  |  | 0x0                 |    |  |  |  |  |  |  | 0x0                        |    |  |  |  |  |  |  | 0x0                        |    |   |  |  |  |  |  | Reset |  |   |   |  |  |  |  |  |  |  |

**ISP\_BF\_TAIL\_PIXEN\_PULSE\_TL** Configures the data control cycle for the tail-row data rate during pixel-to-matrix conversion in the BF module.

Within [ISP\\_BF\\_TAIL\\_PIXEN\\_PULSE\\_TL](#) clock cycles, only the first [ISP\\_BF\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) cycles are valid. Be cautious to configure this field, to prevent data processing from being deferred to the next frame.

This feature is enabled only when both [ISP\\_BF\\_TAIL\\_PIXEN\\_PULSE\\_TL](#) and [ISP\\_BF\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) are non-zero, and [ISP\\_BF\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) < [ISP\\_BF\\_TAIL\\_PIXEN\\_PULSE\\_TL](#). (R/W)

**ISP\_BF\_TAIL\_PIXEN\_PULSE\_TH** Configures the valid data period of the tail-row data rate during pixel-to-matrix conversion in the BF module, which must be less than [ISP\\_HADR\\_NUM](#) - 1. (R/W)

**ISP\_BF\_PADDING\_DATA** Configures the padding data used during image edge expansion in pixel-to-matrix conversion of the BF module. (R/W)

**ISP\_BF\_PADDING\_MODE** Configures the method of image edge expansion during pixel-to-matrix conversion in the BF module.

0: Automatically padded with pixel values from the image edge

1: Padded with the data in [ISP\\_BF\\_PADDING\\_DATA](#)

(R/W)

**Register 32.12. ISP\_BF\_SIGMA\_REG (0x002C)**

|            |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |           |   |  |  |       |
|------------|---|---|---|---|---|---|---|---|---|---|---|---|---|---|---|-----------|---|--|--|-------|
| (reserved) |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   | ISP_SIGMA |   |  |  |       |
| 31         |   |   |   |   |   |   |   |   |   |   |   |   |   |   | 6 | 5         |   |  |  | 0     |
| 0          | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0 | 0         | 2 |  |  | Reset |

**ISP\_SIGMA** Configures the strength of noise reduction in the BF module. Values from 2 to 20 represent increasing strength, while other values indicate maximum strength. (R/W)

**Register 32.13. ISP\_BF\_GAUO\_REG (0x0030)**

|                    |    |  |  |                    |    |  |  |                    |    |  |  |                    |    |  |  |                    |    |  |  |                    |   |  |  |                    |   |  |  |                    |   |  |  |       |  |  |  |

| 31                              |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 17          |  | 16          |  | 15           |  | 12  |  | 11 |  |  |  |  |  |  |  |  |  |  |  |       |  |  |  | 0 |  |
| 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 0 |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  | 0           |  | 0x0         |  |              |  | 0x0 |  |    |  |  |  |  |  |  |  |  |  |  |  |       |  |  |  |   |  |

**ISP\_LUT\_ADDR** Configures the LUT address. When **ISP\_LUT\_NUM** selects LSC LUT, [11:10] being 0 indicates selecting Gb\_B LUT, and being 1 indicates selecting R\_Gr LUT. Bits [9:0] represent the actual LUT address.

(WT)

**ISP\_LUT\_NUM** Configures the LUT selection.

0: Select LSC LUT

Others: Invalid

(WT)

**ISP\_LUT\_CMD** Configures whether to read from or write to the LUT.

0: Read from the LUT

### 1: Write to the LUT

(WT)

### Register 32.16. ISP\_LUT\_WDATA\_REG (0x004C)

Diagram of the ISP\_LUT\_WDATA register. The register is 32 bits wide, with bit 31 on the left and bit 0 on the right. The value 0x000000 is shown inside the register box. A label 'ISP\_LUT\_WDATA' is placed above the register box. A 'Reset' label is at the bottom right.

**ISP\_LUT\_WDATA** Data to be written to the LUT, which must be configured before writing to [ISP\\_LUT\\_CMD\\_REG](#). (R/W)

Register 32.17. ISP\_LSC\_TABLESIZE\_REG (0x0054)

|   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |                    |  |  |  |       |  |  |  |   |  |  |  |  |  |  |  |

| 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  | 0 |  |  |  |  |  |  |  |

**ISP\_DEMOSAIC\_TAIL\_PIXEN\_PULSE\_TL** Configures the data control cycle for the tail-row data rate during pixel-to-matrix conversion in the demosaic module.

Within [ISP\\_DEMOSAIC\\_TAIL\\_PIXEN\\_PULSE\\_TL](#) clock cycles, only the first [ISP\\_DEMOSAIC\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) cycles are valid. Be cautious to configure this field, to prevent data processing from being deferred to the next frame.

This feature is enabled only when both [ISP\\_DEMOSAIC\\_TAIL\\_PIXEN\\_PULSE\\_TL](#) and [ISP\\_DEMOSAIC\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) are non-zero, and  $ISP\_DEMOSAIC\_TAIL\_PIXEN\_PULSE\_TH < ISP\_DEMOSAIC\_TAIL\_PIXEN\_PULSE\_TL$ . (R/W)

**ISP\_DEMOSAIC\_TAIL\_PIXEN\_PULSE\_TH** Configures the valid data period of the tail-row data rate during pixel-to-matrix conversion in the demosaic module, which must be less than [ISP\\_HADR\\_NUM](#) - 1. (R/W)

**ISP\_DEMOSAIC\_PADDING\_DATA** Configures the padding data used during image edge expansion in pixel-to-matrix conversion of the demosaic module. (R/W)

**ISP\_DEMOSAIC\_PADDING\_MODE** Configures the method of image edge expansion during pixel-to-matrix conversion in the demosaic module.

0: Automatically padded with pixel values from the image edge

1: Padded with the data in [ISP\\_DEMOSAIC\\_PADDING\\_DATA](#)

(R/W)

**Register 32.19. ISP\_DEMOSAIC\_GRAD\_RATIO\_REG (0x005C)**

**ISP\_DEMOSAIC\_GRAD\_RATIO** Configures the demosaic effect, with bits [5:4] as the integer part and bits [3:0] as the fractional part. (R/W)

**Register 32.20. ISP\_GAMMA\_CTRL\_REG (0x0074)**

**ISP\_GAMMA\_UPDATE** Configures whether to update the gamma curve parameters. Writing 1 to this field updates the gamma curve parameters. It will be automatically cleared to 0 after the update is complete. (R/W)

**ISP\_GAMMA\_B\_LAST\_CORRECT** Configures whether to enable correction for the parameters of the last interval on the X axis of B channel gamma curve.  
 0: Not enable  
 1: Enable  
 (R/W)

**ISP\_GAMMA\_G\_LAST\_CORRECT** Configures whether to enable correction for the parameters of the last interval on the X axis of G channel gamma curve.  
 0: Not enable  
 1: Enable  
 (R/W)

**ISP\_GAMMA\_R\_LAST\_CORRECT** Configures whether to enable correction for the parameters of the last interval on the X axis of X channel gamma curve.  
 0: Not enable  
 1: Enable  
 (R/W)

**Register 32.21. ISP\_GAMMA\_RY1\_REG (0x0078)**

**ISP\_SHARP\_TAIL\_PIXEN\_PULSE\_TL** Configures the data control cycle for the tail-row data rate during pixel-to-matrix conversion in the sharpen module.

Within [ISP\\_SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TL](#) clock cycles, only the first [ISP\\_SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) cycles are valid. Be cautious to configure this field, to prevent data processing from being deferred to the next frame.

This feature is enabled only when both [ISP\\_SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TL](#) and [ISP\\_SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) are non-zero, and [ISP\\_SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TH](#) < [ISP\\_SHARP\\_TAIL\\_PIXEN\\_PULSE\\_TL](#). (R/W)

**ISP\_SHARP\_TAIL\_PIXEN\_PULSE\_TH** Configures the valid data period of the tail-row data rate during pixel-to-matrix conversion in the sharpen module, which must be less than [ISP\\_HADR\\_NUM](#) - 1. (R/W)

**ISP\_SHARP\_PADDING\_DATA** Configures the padding data used during image edge expansion in pixel-to-matrix conversion of the sharpen module. (R/W)

**ISP\_SHARP\_PADDING\_MODE** Configures the method of image edge expansion during pixel-to-matrix conversion in the sharpen module.

0: Automatically padded with pixel values from the image edge

1: Padded with the data in [ISP\\_SHARP\\_PADDING\\_DATA](#)

(R/W)

Reset

**ISP\_CAM\_DATA\_ORDER** Configures the order of DVP input data.

0: cam\_data\_in

1: cam\_data\_in[7:0], cam\_data\_in[15:8]

(R/W)

**ISP\_CAM\_2BYTE\_MODE** Configures whether to enable the 2-byte mode.

0: Disable

1: Enable

(R/W)

**ISP\_CAM\_DATA\_TYPE** Configures the format of DVP input data.

0x2a: RAW8

0x2b: RAW10

0x2c: RAW12

(R/W)

**ISP\_CAM\_DE\_INV** Configures whether to invert the DVP de signal.

0: Not invert

1: Invert

(R/W)

**ISP\_CAM\_HSYNC\_INV** Configures whether to invert the DVP hsync signal.

0: Not invert

1: Invert

(R/W)

**ISP\_CAM\_VSYNC\_INV** Configures whether to invert the DVP vsync signal.

0: Not invert

1: Invert

(R/W)

**ISP\_CAM\_VSYNC\_FILTER\_THRES** Configures vsync filtering. Vsyzns shorter than this length will be filtered out. (R/W)**ISP\_CAM\_VSYNC\_FILTER\_EN** Configures whether to enable the vsync filtering.

0: Disable

1: Enable

(R/W)

**ISP\_AF\_AUTO\_UPDATE** Configures whether to enable AF automatic statistics.

0: Disable automatic statistics, and manual trigger is required

1: Enable automatic statistics, and AF will perform statistics for every frame with the AF module enabled

(R/W)

**ISP\_AF\_MANUAL\_UPDATE** Configures AF manual statistics. With AF automatic statistics disabled, writing 1 triggers a statistics collection. (WT)

**ISP\_AF\_ENV\_THRESHOLD** Configures the threshold for AF scene monitoring. If **ISP\_AF\_ENV\_USER\_THRESHOLD\_SUM** or **ISP\_AF\_ENV\_USER\_THRESHOLD\_LUM** is 0, an interrupt for scene monitoring will be triggered when the changes in sharpness or luminance exceed the product of the baseline value and this field for two consecutive times. 4 fractional bits. (R/W)

**ISP\_AF\_ENV\_PERIOD** Configures the statistical interval frames for AF scene monitoring. Setting this filed to 0 disables the scene monitoring. (R/W)

### Register 32.56. ISP\_AF\_ENV\_USER\_TH\_SUM\_REG (0x0128)

Diagram of the `ISP_AF_ENV_USER_THRESHOLD_SUM` register. The register is 32 bits wide, with bit 31 on the left and bit 0 on the right. The value `0x000000` is shown below the register, indicating the reset value.

|  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  | |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  | |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  | |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  | |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  | |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  | |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |   |  |  |  |  | ### Register 32.124. ISP\_INT\_ENA\_REG (0x006C)

[illegible]

**ISP\_DATA\_TYPE\_ERR\_INT\_ENA** Write 1 to enable ISP\_DATA\_TYPE\_ERR\_INT. (R/W)

**ISP\_ASYNC\_FIFO\_OVF\_INT\_ENA** Write 1 to enable ISP\_ASYNC\_FIFO\_OVF\_INT. (R/W)

**ISP\_BUF\_FULL\_INT\_ENA** Write 1 to enable ISP\_BUF\_FULL\_INT. (R/W)

**ISP\_HVNUM\_SETTING\_ERR\_INT\_ENA** Write 1 to enable ISP\_HVNUM\_SETTING\_ERR\_INT. (R/W)

ISP\_DATA\_TYPE\_SETTING\_ERR\_INT\_ENA Write 1 to enable ISP\_DATA\_TYPE\_SETTING\_ERR\_INT.  
(R/W)

**ISP\_MIPI\_HNUM\_UNMATCH\_INT\_ENA** Write 1 to enable ISP\_MIPI\_HNUM\_UNMATCH\_INT. (R/W)

**ISP\_AE\_MONITOR\_INT\_ENA** Write 1 to enable ISP\_AE\_MONITOR\_INT. (R/W)

**ISP\_AE\_FRAME\_DONE\_INT\_ENA** Write 1 to enable ISP\_AE\_FRAME\_DONE\_INT. (R/W)

**ISP\_AF\_FDONE\_INT\_ENA** Write 1 to enable ISP\_AF\_FDONE\_INT. (R/W)

**ISP\_AF\_ENV\_INT\_ENA** Write 1 to enable ISP\_AF\_ENV\_INT. (R/W)

**ISP\_AWB\_FDONE\_INT\_ENA** Write 1 to enable ISP\_AWB\_FDONE\_INT. (R/W)

**ISP\_HIST\_FDONE\_INT\_ENA** Write 1 to enable ISP\_HIST\_FDONE\_INT. (R/W)

**ISP\_FRAME\_INT\_ENA** Write 1 to enable ISP\_FRAME\_INT. (R/W)

**ISP\_LSC\_FRAME\_INT\_ENA** Write 1 to enable ISP\_LSC\_FRAME\_INT. (R/W)

**ISP\_BF\_FRAME\_INT\_ENA** Write 1 to enable ISP\_BF\_FRAME\_INT. (R/W)

**ISP\_DEMOSAIC\_FRAME\_INT\_ENA** Write 1 to enable ISP\_DEMOSAIC\_FRAME\_INT. (R/W)

**ISP\_CCM\_FRAME\_INT\_ENA** Write 1 to enable ISP\_CCM\_FRAME\_INT. (R/W)

**ISP\_GAMMA\_FRAME\_INT\_ENA** Write 1 to enable ISP\_GAMMA\_FRAME\_INT. (R/W)

**ISP\_RGB2YUV\_FRAME\_INT\_ENA** Write 1 to enable ISP\_RGB2YUV\_FRAME\_INT. (R/W)

**ISP SHARP FRAME INT ENA** Write 1 to enable ISP SHARP FRAME INT. (R/W)

Continued on the next page...

**Register 32.124. ISP\_INT\_RAW\_REG (0x0064)**

Continued from the previous page...

**ISP\_COLOR\_FRAME\_INT\_ENA** Write 1 to enable ISP\_COLOR\_FRAME\_INT. (R/W)

**ISP\_YUV2RGB\_FRAME\_INT\_ENA** Write 1 to enable ISP\_YUV2RGB\_FRAME\_INT. (R/W)

**ISP\_TAIL\_IDI\_FRAME\_INT\_ENA** Write 1 to enable ISP\_TAIL\_IDI\_FRAME\_INT. (R/W)

**ISP\_HEADER\_IDI\_FRAME\_INT\_ENA** Write 1 to enable ISP\_HEADER\_IDI\_FRAME\_INT. (R/W)

### Register 32.125. ISP\_INT\_CLR\_REG (0x0070)

[illegible]

**ISP\_DATA\_TYPE\_ERR\_INT\_CLR** Write 1 to clear ISP\_DATA\_TYPE\_ERR\_INT. (WT)

**ISP\_ASYNC\_FIFO\_OVF\_INT\_CLR** Write 1 to clear ISP\_ASYNC\_FIFO\_OVF\_INT. (WT)

**ISP\_BUF\_FULL\_INT\_CLR** Write 1 to clear ISP\_BUF\_FULL\_INT. (WT)

**ISP\_HVNUM\_SETTING\_ERR\_INT\_CLR** Write 1 to clear ISP\_HVNUM\_SETTING\_ERR\_INT. (WT)

**ISP\_DATA\_TYPE\_SETTING\_ERR\_INT\_CLR** Write 1 to clear ISP\_DATA\_TYPE\_SETTING\_ERR\_INT. (WT)

**ISP\_MIPI\_HNUM\_UNMATCH\_INT\_CLR** Write 1 to clear ISP\_MIPI\_HNUM\_UNMATCH\_INT. (WT)

**ISP\_AE\_MONITOR\_INT\_CLR** Write 1 to clear ISP\_AE\_MONITOR\_INT. (WT)

**ISP AE FRAME DONE INT CLR** Write 1 to clear ISP AE FRAME DONE INT. (WT)

**ISP\_AF\_FDONE\_INT\_CLR** Write 1 to clear ISP\_AF\_FDONE\_INT. (WT)

**ISP\_AF\_ENV\_INT\_CLR** Write 1 to clear ISP\_AF\_ENV\_INT. (WT)

ISP AWB FDONE INT CLR Write 1 to clear ISP AWB FDONE INT. (WT)

**ISP\_HIST\_FDONE\_INT\_CLR** Write 1 to clear ISP\_HIST\_FDONE\_INT. (WT)

**ISP\_FRAME\_INT\_CLR** Write 1 to clear ISP\_FRAME\_INT. (WT)

**ISP\_LSC\_FRAME\_INT\_CLR** Write 1 to clear ISP\_LSC\_FRAME\_INT. (WT)

**ISP BF FRAME INT CLR** Write 1 to clear ISP BF FRAME INT. (WT)

**ISP\_DEMOSAIC\_FRAME\_INT\_CLR** Write 1 to clear ISP\_DEMOSAIC\_FRAME\_INT. (WT)

**ISP\_CCM\_FRAME\_INT\_CLR** Write 1 to clear ISP\_CCM\_FRAME\_INT. (WT)

**ISP\_GAMMA\_FRAME\_INT\_CLR** Write 1 to clear ISP\_GAMMA\_FRAME\_INT. (WT)

**ISP\_RGB2YUV\_FRAME\_INT\_CLR** Write 1 to clear ISP\_RGB2YUV\_FRAME\_INT. (WT)

**ISP SHARP FRAME INT CLR** Write 1 to clear ISP SHARP FRAME INT. (WT)

**ISP\_COLOR\_FRAME\_INT\_CLR** Write 1 to clear ISP\_COLOR\_FRAME\_INT. (WT)

Continued on the next page...

**Register 32.125. ISP\_INT\_CLR\_REG (0x0070)**

Continued from the previous page...

**ISP\_YUV2RGB\_FRAME\_INT\_CLR** Write 1 to clear ISP\_YUV2RGB\_FRAME\_INT. (WT)**ISP\_TAIL\_IDI\_FRAME\_INT\_CLR** Write 1 to clear ISP\_TAIL\_IDI\_FRAME\_INT. (WT)**ISP\_HEADER\_IDI\_FRAME\_INT\_CLR** Write 1 to clear ISP\_HEADER\_IDI\_FRAME\_INT. (WT)**32.9.2 MIPI CSI\_Bridge Registers**

The addresses in this section are relative to **MIPI CSI\_Bridge** base address provided in Table 6.3-2 in Chapter 6 *System and Memory*.

For how to program reserved fields, please refer to Section [Programming Reserved Register Field](#).

**Register 32.126. CSI\_BRIG\_CLK\_EN\_REG (0x0000)**

|            |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |   |                 |   |   |   |       |
